Olaf Münster

Economic Integration and National Economic Policy
Table of Contents

1 Introduction ......................................................................................................................... 1

1.1 Motivation and Precursory Thoughts .............................................................................. 1
1.2 Scientific Approach ........................................................................................................ 6

2 Does Economic Integration Eliminate a Government's Ability
to Independently Redistribute Income? .............................................................................. 13

2.1 Introduction .................................................................................................................. 14
2.2 The Model ...................................................................................................................... 18
2.3 Redistribution under Autarky ....................................................................................... 19
2.4 Redistribution within an Integrated Economy .............................................................. 22
   2.4.1 Welfare Effects of Labor Mobility
       on Redistribution Systems .......................................................................................... 23
   2.4.2 Welfare Effects of Labor Mobility
       on Redistribution Preferences .................................................................................... 29
2.5 Conclusion ...................................................................................................................... 36
Appendix 2.A Graphical Illustrations ....................................................................................
   2.A.1 Basic Model ............................................................................................................. 37
   2.A.2 Welfare Effects of Labor Mobility
       on Redistribution Systems .......................................................................................... 39
   2.A.3 Welfare Effects of Labor Mobility
       on Redistribution Preferences .................................................................................... 43

3 Regional Infrastructure and Tax Competition
   with Two Instruments ....................................................................................................... 47

3.1 Introduction ..................................................................................................................... 48
3.2 The Model ....................................................................................................................... 51
   3.2.1 Basic Structure ....................................................................................................... 51
   3.2.2 Utility and Demand ................................................................................................. 52
   3.2.3 Production ............................................................................................................... 53
   3.2.4 The Government ..................................................................................................... 55
   3.2.5 International Equilibrium ....................................................................................... 55
3.3 Industry Location and Relative Infrastructure .............................................................. 56
