Contents

Preface ................................................................. vii
Contributors and Addresses ........................................... ix

Part I. Stochastic Analysis and Systems
1. Multidimensional Wick-Itô Formula for Gaussian Processes ....... 3
   D. Nualart and S. Ortiz-Latorre
2. Fractional White Noise Multiplication .............................. 27
   A. H. Tsoi
3. Invariance Principle of Regime-Switching Diffusions ............... 43
   C. Zhu and G. Yin

Part II. Finance and Stochastics
4. Real Options and Competition ..................................... 63
   A. Bensoussan, J. D. Diltz, and S. R. Hoe
5. Finding Expectations of Monotone Functions of Binary Random
   Variables by Simulation, with Applications to Reliability,
   Finance, and Round Robin Tournaments .......................... 101
   M. Brown, E. A. Peköz, and S. M. Ross
6. Filtering with Counting Process Observations and Other
   Factors: Applications to Bond Price Tick Data .................. 115
   X. Hu, D. R. Kuipers, and Y. Zeng
   M. Kohlmann and D. Xiong

8. Recombining Tree for Regime-Switching Model: Algorithm and Weak Convergence ............................................. 193
   R. H. Liu

   S. Luo

10. Applications of Counting Processes and Martingales in Survival Analysis ......................................................... 231
    J. Sun

11. Stochastic Algorithms and Numerics for Mean-Reverting Asset Trading ................................................................. 245
    Q. Zhang, C. Zhuang, and G. Yin
