Are Metro Manila Households Willing to Pay for Cleaner Public Transport?

Jamil Paolo S. Francisco

September 2010
# TABLE OF CONTENTS

EXECUTIVE SUMMARY  
1.0 INTRODUCTION  
1.1 Background  
1.1.1 The electric jeepney as a viable alternative  
1.1.2 Proposed buy-back program for diesel jeepneys  
1.1.3 Air quality improvement due to cleaner public transport  
1.2 Research Objectives  
1.3 Significance of the Study  
2.0 REVIEW OF RELATED LITERATURE  
2.1 CV Methodology: General Issues  
2.2 Eliciting WTP and the Use of Secret Ballots  
3.0 FRAMEWORK AND RESEARCH METHODOLOGY  
3.1 Analytical Tools  
3.1.1 Parametric estimation  
3.1.2 Non-parametric estimation  
3.2 Pre-test and Pre-survey Activities  
3.3 Sampling Procedure  
3.4 Survey Instrument and CV Question  
3.5 Protest Bids and Certainty Calibration  
4.0 RESULTS AND DISCUSSION  
4.1 Respondent and Household Characteristics  
4.2 Survey of Public Transport Use  
4.3 Awareness, Attitudes and Perception  
4.4 Willingness to Support and the Effects of WTP Elicitation Method  
4.5 Willingness-to-Pay for Cleaner Public Transport  
4.6 Determinants of WTP  
4.7 Benefit Aggregation, Cost-Benefit Analysis and Financial Viability  
5.0 CONCLUSIONS AND RECOMMENDATIONS  
5.1 On Willingness to Pay for Cleaner Public Transport  
5.2 On the Use of Secret Ballots
