Creating a Lean R&D System

Lean Principles and Approaches for Pharmaceutical and Research-Based Organizations

Terence M. Barnhart

## Chapter 1  Seeing and Removing Barriers in the R&D Environment

- Mental Models ........................................... 2
- Removing Barriers to Innovation ...................... 5
- Impact on R&D Innovation ................................ 6
  - Physical Barriers ....................................... 8
  - Emotional Barriers ..................................... 10
  - Observational and Thinking Barriers ................. 11
  - Lean and the Removal of Barriers .................... 13

## Chapter 2  Lean in Research and Development

- Purpose .................................................. 16
- Continuous Improvement in Manufacturing and R&D ... 18
- The Purpose of Lean .................................... 19
- What Lean Is ........................................... 20
- Lean R&D ................................................ 22
- Implications ............................................ 23
- Connection with People ................................ 23
- Conclusions ............................................. 25

## Chapter 3  The Individual in the Lean R&D Community

- The Individual/Community Continuum in R&D .......... 28
  - An Example of the Lean R&D Community ............... 28
- Qualities of the Individual in a Lean Environment .... 30
- Commitment ............................................... 30
Contents

Commitment to Craft ............................................. 31
Commitment to the Team ...................................... 33
Awareness of the Community ................................ 34
Skill at Learning .................................................. 37
Pulling It Together .............................................. 41

Chapter 4  Lean Exercises for the R&D Professional .......... 43

Seeing ..................................................................... 43
  Skill-Building Exercise 1: Seeing without Prior
  Mental Context ..................................................... 46
  Skill-Building Exercise 2: Seeing Beliefs .................. 49
Reframing to Innovate .......................................... 50
  Deconstruction and Synthesis to Increase Value
  Content ................................................................ 51
  Making Snowmobiles .......................................... 51
  The Role of Language in Reframing for Innovation .... 53
  Skill-Building Exercise 3: Reframing by Converting
  Statements into Questions ...................................... 56
  Skill-Building Exercise 4: Seeing and Reframing
  through Value Stream Mapping .............................. 56
  Skill-Building Exercise 5: Reframing by Making
  Snowmobiles ....................................................... 57
The Value of Experience in Innovation ...................... 59
  Skill-Building Exercise 6: Improving Innovation
  Experience through Daily Experimental Practice ...... 61
Growing Yourself and Your Environment ..................... 61
  Practice to Grow .................................................. 63
Pulling It Together—Seeing, Reframing, Experiencing,
and Growing: A Learning Loop for Innovation .......... 63
Integrated Exercises ............................................. 65
  Skill-Building Exercise 7: The A3 Format ............ 65
  Skill-Building Exercise 8: Good-Better-Best .......... 66
  Skill-Building Exercise 9: Mapping ...................... 66
Apply Liberally ...................................................... 67
Apply in Your Work, Start Small, Grow in Scale,
and Spread Outward ............................................ 68
Contents

Chapter 5  The A3 in Developing R&D Thinking ........................................ 71
  Description of the A3................................................................. 71
  Purpose of the A3........................................................................ 73
Section 1: Problem Statement, Business Value,
  Performance Goals—Defining the Problem and the
  Terms for Its Successful Resolution ........................................ 74
  The First Step in Creating Thought Clarity—
  Separating Problem and Solution with a Well-
  Constructed Problem Statement or Valuable
  Question ...................................................................................... 74
  Business Value—Creating a Stage for Buy-In................................ 77
  Goals—Defining Criteria for Successful
  Completion, a.k.a. "When Do I Stop?" ........................................ 78
  Other Types of Stop-Gap Goals.................................................... 79
  Section 1 Summary..................................................................... 80
Section 2: Current State ............................................................... 81
  Section 2 Summary..................................................................... 83
Section 3: Analysis/Synthesis—Finding the Root Cause
  of a Problem and Developing Countermeasures to
  Address Root Cause .................................................................... 84
  Considerations in Analysis/Synthesis.......................................... 86
  Section 3 Summary..................................................................... 89
Section 4: The Learning Plan .......................................................... 89
  Learning Plan Structure................................................................ 90
  Predicting Plan Timing.................................................................. 92
  Building Fast Learning into Our Planning Process.................... 92
  Thinking and Cadence in the Learning Plan............................... 93
  Thoughts on the Learning Plan.................................................... 95
  Section 4 Summary..................................................................... 98
Section 5: Results and Future Considerations................................. 98
  Pulling It Together to Get the Most from the A3....................... 99

Chapter 6  The Lean R&D Manager..................................................... 101
  Skills a Lean Manager Must Possess........................................... 102
  Seeing Exercises........................................................................ 102
  Skill-Building Exercise 1: Seeing Group and System
  Dynamics in an External Setting............................................... 103
Skill-Building Exercise 2: Letting the Environment Tell You Its Problems.................................................103
Skill-Building Exercise 3: Observing the Internal Environment (Walking the Gemba) ..................................105
Skill-Building Exercise 4: Seeing and Reframing through Mapping..............................................................107
Reframing Exercises.............................................................................108
Skill-Building Exercise 5: Disbelieving Your Own Beliefs .................................................................109
Skill-Building Exercise 6: Identifying Other Possible Beliefs ......................................................................109
Experience.............................................................................................110
Skill-Building Exercise 7: Small-Scale/High-Velocity Experimentation.........................................................110
Growth.................................................................................................112
Skill-Building Exercise 8: Setting Targets........................................113
Skill-Building Exercise 9: Assessing Performance and Reflecting on Results................................................114
Pulling It Together..................................................................114

Chapter 7  Removing Barriers within the R&D Community...... 115
Noninnovation Work........................................................................116
  Supporting Basic Work Requirements ........................................116
  Supporting Interfaces................................................................116
  Supporting Management Systems.............................................117
  Seeing the Noninnovation Work................................................120
  Creating Purpose........................................................................120
Seeing without Prejudice................................................................122
  Group Exercise 1: Seeing without Prejudice, the Current-State Value Stream Map .........................122
  Issues in Value Stream Mapping in R&D.................................124
  Group Exercise 2: Seeing Team Assumptions .........................125
  Group Exercise 3: Bypass Assumptions Entirely—Critical Question Mapping ..................................126
Reframing Exercises......................................................................127
Building Group Experience...............................................................129
Pulling It Together to Remove Barriers..............................................130
