1. Introduction and Quick start to the Income Approach 1
   Introduction 1
The income approach – a quick start 5

2. Financial Mathematics for Valuers 11
   Introduction 11
   The six functions of £1 11
      The amount of £1(A) 12
      The amount of £1 per annum (A £1 pa) 13
      Annual sinking fund 15
      The present value of £1 (PV£1) 16
      The PV of £1 pa (PV£1 pa or Years’ Purchase) 17
      Present Value of £1 pa in perpetuity deferred n years
         (PV£1 pa in perp defd or YP of a reversion to perpetuity) 20
      PV of £1 pa dual rate (YP dual rate) 22
      Annuity £1 will purchase (A £1 wp) 24
   Mortgages 29
   The Interrelationship of the functions 31
      Properties of exponents 32
   Nominal and effective rates of interest 33
      Continuous compounding 35
   Incomes in advance and non-annual incomes 36
   Incomes receivable quarterly or monthly in advance 37
      Health warning 38
   Summary 38
   Spreadsheet user 40
      Project 1 40
      Project 2 41

3. Discounted Cash Flow (DCF) 43
   Introduction 43
   Net Present Value (NPV) 43
   Internal Rate of Return (IRR) 46
   Comparative use of NPV and IRR 49
   Incremental analysis 51
   Summary 52
   Spreadsheet user 52
      Project 1: Calculating the NPV 52
      Calculate the NPV of the scheme and the IRR 53
      Project 2: Calculating the IRR 54
      Project 3: Goal Seek 55
4. Basic Principles

Introduction
Definitions
Market value
Value in exchange
Investment value or worth
Price
Valuation
Valuation report

The Income approach
Valuation process
Income or rent
The concept of zoning
Landlords' expenses
Purchase expenses
Income capitalisation or DCF
DCF
Summary

5. The Income Approach: Freeholds

Introduction
The income approach
Capitalisation approaches
DCF approaches
DCF and the over-rented property
Advance or arrears
Analysing sale prices to find the equivalent yield
A final adjustment
Sub-markets
Summary
Spreadsheet user
Project 1
Project 2

6. The Income Approach: Leaseholds

Introduction
Occupation leases
Investment leases
Medium to long-term leaseholds at a fixed head rent
Fixed profit rent
Single rate valuation of leaseholds
DCF valuation of leaseholds
DCF solution
Summary

7. The Income Approach: Taxation and Valuation

Introduction
Incomes in perpetuity
Finite or terminable incomes
8. **Landlord and Tenant**

Valuations and negotiations
- Premiums
- Future costs and receipts
- Extensions and renewals of leases
- Marriage or synergistic value
- Market rent, non standard reviews, constant rent theory
- Quarterly to monthly

Summary

9. **The Effects of Legislation**

Introduction

Business premises
- Compensation for improvements
- Security of tenure
- Compensation for loss of security
- Terms of the new lease
- Landlord and tenant negotiations

Residential property
- Private sector tenancies
- Assured tenancies
- Assured Shorthold Tenancies (ASTs)
- Tenancies subject to the provisions of the Rent Act 1977
- Tenancies with high Rateable Values (RVs)
- Resident landlords
- Tenancies on long leases

10. **Development Opportunities**

Introduction

Incorporating a ‘big picture’ approach

Garbage in – garbage out

Professional frameworks and methodologies

The highest and best use methodology

RICS Valuation Information Paper No 12: ‘The Valuation of Development Land’

The residual method
- Exploring the main inputs to a residual appraisal

Sensitivity analysis

The need for adoption of the cash flow approach
- The cash flow approach explained

Viability studies
11. The Profits Method of Valuation 219

Rationale behind the use of the profits method of valuation 219

Fair Maintainable Turnover (FMT) 220
Gross profitability 221
Costs 221
Fair Maintainable Operating Profit (FMOP) 221

Commentary on use of actual accounts 222
Freehold valuation and sales 222
Licensed property 223
Pubs 224
Valuation: public houses and bars 226
Comparables and market information 229
Valuation: late bars/clubs 230
Restaurants 231
Hotels 233
Other types of property 234
Cinemas and theatres 235
Care homes 235
Petrol filling stations 235
Golf courses 236
Racecourses, racetracks and stadia 236
Tenant’s improvements under the profits method 236
Summary 238

12. Investment Analysis 241

Introduction and re-cap 241
Expected returns – the cash flow 243
The discount rate 244
Some simple analytical measures 246
Initial yield 247
Yield on reversion 248
Equivalent yield 248
Reversionary potential 249
Income return 249
Capital return 249
Total return 249
Required return 249
IRR or expected return 250
Dealing with risk 250
The Risk-Adjusted Discount Rate (RADR) 251
The sub-sector and property risk premium 252
The sector premium 252
The town premium 252
The property premium 253
Risk-adjusted cash flows: using sensitivity and simulation 254
