Matching Supply with Demand

An Introduction to Operations Management

Third Edition

Gérard Cachon
The Wharton School,
University of Pennsylvania

Christian Terwiesch
The Wharton School,
University of Pennsylvania

McGraw-Hill
# Table of Contents

## Chapter 1
### Introduction 1
1.1 Learning Objectives and Framework 3
1.2 Road Map of the Book 6

## Chapter 2
### The Process View of the Organization 10
2.1 Presbyterian Hospital in Philadelphia 10
2.2 Three Measures of Process Performance 15
2.3 Little’s Law 16
2.4 Inventory Turns and Inventory Costs 19
2.5 Five Reasons to Hold Inventory 23
   - Pipeline Inventory 23
   - Seasonal Inventory 24
   - Cycle Inventory 25
   - Decoupling Inventory/Buffers 26
   - Safety Inventory 26
2.6 The Product–Process Matrix 27
2.7 Summary 29
2.8 Further Reading 29
2.9 Practice Problems 29

## Chapter 3
### Understanding the Supply Process: Evaluating Process Capacity 32
3.1 How to Draw a Process Flow Diagram 33
3.2 Bottleneck, Process Capacity, and Flow Rate (Throughput) 38
3.3 How Long Does It Take to Produce a Certain Amount of Supply? 40
3.4 Process Utilization and Capacity Utilization 41
3.5 Workload and Implied Utilization 43
3.6 Multiple Types of Flow Units 44
3.7 Summary 48
3.8 Practice Problems 50

## Chapter 4
### Estimating and Reducing Labor Costs 56
4.1 Analyzing an Assembly Operation 56
4.2 Time to Process a Quantity X Starting with an Empty Process 58
4.3 Labor Content and Idle Time 60
4.4 Increasing Capacity by Line Balancing 63
4.5 Scale Up to Higher Volume
   - Increasing Capacity by Replicating the Line 66
   - Increasing Capacity by Selectively Adding Workers 67
   - Increasing Capacity by Further Specializing Tasks 69
4.6 Summary 72
4.7 Further Reading 74
4.8 Practice Problems 74

## Chapter 5
### Project Management 80
5.1 Motivating Example 80
5.2 Critical Path Method 82
5.3 Computing Project Completion Time 83
5.4 Finding the Critical Path and Creating a Gantt Chart 84
5.5 Computing Slack Time 85
5.6 Dealing with Uncertainty
   - Random Activity Times 88
   - Potential Iteration/Rework Loops 91
   - Decision Tree/Milestones/Exit Option 91
   - Unknown Unknowns 92
5.7 How to Accelerate Projects 92
5.8 Literature/Further Reading 94
5.9 Practice Problems 94

## Chapter 6
### The Link between Operations and Finance 96
6.1 Paul Downs Cabinetmakers 97
6.2 Building an ROIC Tree 98
6.3 Valuing Operational Improvements 103
6.4 Analyzing Operations Based on Financial Data 106
6.5 Summary 111
6.6 Further Reading 112
6.7 Practice Problems 112

## Chapter 7
### Batching and Other Flow Interruptions: Setup Times and the Economic Order Quantity Model 114
7.1 The Impact of Setups on Capacity 115
| 7.2 | Interaction between Batching and Inventory 118 |
| 7.3 | Choosing a Batch Size in the Presence of Setup Times 121 |
| 7.4 | Setup Times and Product Variety 124 |
| 7.5 | Setup Time Reduction 125 |
| 7.6 | Balancing Setup Costs with Inventory Costs: The EOQ Model 126 |
| 7.7 | Observations Related to the Economic Order Quantity 130 |
| 7.8 | Other Flow Interruptions: Buffer or Suffer 134 |
| 7.9 | Summary 136 |
| 7.10 | Further Reading 137 |
| 7.11 | Practice Problems 137 |

**Chapter 8**

**Variability and Its Impact on Process Performance: Waiting Time Problems 144**

8.1 Motivating Example: A Somewhat Unrealistic Call Center 145
8.2 Variability: Where It Comes From and How It Can Be Measured 147
8.3 Analyzing an Arrival Process 149
   *Stationary Arrivals* 151
   *Exponential Interarrival Times* 153
   *Nonexponential Interarrival Times* 154
   *Summary: Analyzing an Arrival Process* 155
8.4 Processing Time Variability 155
8.5 Predicting the Average Waiting Time for the Case of One Resource 157
8.6 Predicting the Average Waiting Time for the Case of Multiple Resources 161
8.7 Service Levels in Waiting Time Problems 164
8.8 Economic Implications: Generating a Staffing Plan 165
8.9 Impact of Pooling: Economies of Scale 168
8.10 Priority Rules in Waiting Lines 172
   *Processing-Time-Dependent Priority Rules* 172
   *Processing-Time-Independent Priority Rules* 172
8.11 Reducing Variability 173
   *Ways to Reduce Arrival Variability* 173
   *Ways to Reduce Processing Time Variability* 174
8.12 Summary 176
8.13 Further Reading 177
8.14 Practice Problems 177

**Chapter 9**

**The Impact of Variability on Process Performance: Throughput Losses 183**

9.1 Motivating Examples: Why Averages Do Not Work 183
9.2 Ambulance Diversion 184
9.3 Throughput Loss for a Simple Process 185
9.4 Customer Impatience and Throughput Loss 189
9.5 Several Resources with Variability in Sequence 191
   *The Role of Buffers* 192
9.6 Summary 194
9.7 Further Reading 195
9.8 Practice Problems 195

**Chapter 10**

**Quality Management, Statistical Process Control, and Six-Sigma Capability 198**

10.1 Controlling Variation: Practical Motivation 199
10.2 The Two Types of Variation 200
10.3 Constructing Control Charts 202
10.4 Control Chart Example from a Service Setting 205
10.5 Design Specifications and Process Capability 208
10.6 Attribute Control Charts 210
10.7 Robust Process Design 211
10.8 Impact of Yields and Defects on Process Flow 214
   *Rework* 215
   *Eliminating Flow Units from the Process* 216
   *Cost Economics and Location of Test Points* 217
   *Defects and Variability* 218
10.9 A Process for Improvement 218
10.10 Further Reading 220
10.11 Practice Problems 220

**Chapter 11**

**Lean Operations and the Toyota Production System 222**

11.1 The History of Toyota 222
11.2 TPS Framework 224
11.3 The Seven Sources of Waste 225
11.4 JIT: Matching Supply with Demand 228
   *Achieve One-Unit-at-a-Time Flow* 228
   *Produce at the Rate of Customer Demand* 229
   *Implement Pull Systems* 229
11.5 Quality Management 231
11.6 Exposing Problems through Inventory Reduction 233
11.7 Flexibility 234
11.8 Standardization of Work and Reduction of Variability 236
11.9 Human Resource Practices 236
11.10 Lean Transformation 237
11.11 Further Reading 239
11.12 Practice Problems 239

Chapter 12
Betting on Uncertain Demand: The Newsvendor Model 240
12.1 O'Neill Inc. 241
12.2 An Introduction to the Newsvendor Model 243
12.3 Constructing a Demand Forecast 243
12.4 The Expected Profit-Maximizing Order Quantity 250
12.5 Performance Measures 254
   Expected Lost Sales 255
   Expected Sales 256
   Expected Leftover Inventory 257
   Expected Profit 257
   In-Stock Probability and Stockout Probability 258
12.6 Choosing an Order Quantity to Meet a Service Objective 259
12.7 Managerial Lessons 259
12.8 Summary 262
12.9 Further Reading 263
12.10 Practice Problems 263

Chapter 13
Assemble-to-Order, Make-to-Order, and Quick Response with Reactive Capacity 270
13.1 Evaluating and Minimizing the Newsvendor’s Demand–Supply Mismatch Cost 271
13.2 When Is the Mismatch Cost High? 273
13.3 Reducing Mismatch Costs with Make-to-Order 276
13.4 Quick Response with Reactive Capacity 277
13.5 Summary 281
13.6 Further Reading 282
13.7 Practice Problems 282

Chapter 14
Service Levels and Lead Times in Supply Chains: The Order-up-to Inventory Model 287
14.1 Medtronic’s Supply Chain 288
14.2 The Order-up-to Model Design and Implementation 291
14.3 The End-of-Period Inventory Level 294
14.4 Choosing Demand Distributions 295
14.5 Performance Measures 299
   In-Stock and Stockout Probability 299
   Expected Back Order 301
   Expected On-Hand Inventory 302
   Pipeline Inventory/Expected On-Order Inventory 303
14.6 Choosing an Order-up-to Level to Meet a Service Target 304
14.7 Choosing an Appropriate Service Level 304
14.8 Controlling Ordering Costs 308
14.9 Managerial Insights 311
14.10 Summary 313
14.11 Further Reading 314
14.12 Practice Problems 314

Chapter 15
Risk-Pooling Strategies to Reduce and Hedge Uncertainty 319
15.1 Location Pooling 319
   Pooling Medtronic’s Field Inventory 320
   Medtronic’s Distribution Center(s) 324
   Electronic Commerce 325
15.2 Product Pooling 326
15.3 Lead Time Pooling: Consolidated Distribution and Delayed Differentiation 333
   Consolidated Distribution 333
   Delayed Differentiation 338
15.4 Capacity Pooling with Flexible Manufacturing 341
15.5 Summary 347
15.6 Further Reading 348
15.7 Practice Problems 348

Chapter 16
Revenue Management with Capacity Controls 353
16.1 Revenue Management and Margin Arithmetic 353
16.2 Protection Levels and Booking Limits 355
<table>
<thead>
<tr>
<th>Table of Contents</th>
</tr>
</thead>
</table>

16.3 Overbooking 361
16.4 Implementation of Revenue Management 363
  Demand Forecasting 363
  Dynamic Decisions 364
  Variability in Available Capacity 364
  Reservations Coming in Groups 364
  Effective Segmenting of Customers 364
  Multiple Fare Classes 364
  Software Implementation 365
  Variation in Capacity Purchase: Not All Customers Purchase One Unit of Capacity 365
16.5 Summary 367
16.6 Further Reading 368
16.7 Practice Problems 368

Chapter 17

Supply Chain Coordination 373

17.1 The Bullwhip Effect: Causes and Consequences 373
  Order Synchronization 376
  Order Batching 377
  Trade Promotions and Forward Buying 378
  Reactive and Overreactive Ordering 382
  Shortage Gaming 383
17.2 Bullwhip Effect: Mitigating Strategies 384
  Sharing Information 384
  Smoothing the Flow of Product 385
  Eliminating Pathological Incentives 385
  Using Vendor-Managed Inventory 386
  The Countereffect to the Bullwhip Effect: Production Smoothing 388
17.3 Incentive Conflicts in a Sunglasses Supply Chain 389
17.4 Buy-Back Contracts 392
17.5 More Supply Chain Contracts 395
  Quantity Discounts 395
  Options Contracts 395
  Revenue Sharing 396
  Quantity Flexibility Contracts 396
  Price Protection 397
17.6 Summary 397
17.7 Further Reading 398
17.8 Practice Problems 398

Chapter 18

Sustainable Operations 401

18.1 Sustainability: Background 401
  Energy 401
  Water 404
  Agriculture, Fishing, and Forestry 404
  People 405
18.2 Sustainability: The Business Case 405
18.3 Sustainability and Operations Management 406
18.4 Summary 409
18.5 Further Reading 409
18.6 Practice Problems 409

Chapter 19

Business Model Innovation 410

19.1 Zipcar and Netflix 410
19.2 Innovation and Value Creation 412
19.3 The Customer Value Curve: The Demand Side of Business Model Innovation 414
19.4 Solutions: The Supply Side of Business Model Innovation 417
  Process Timing 418
  Process Location 419
  Process Standardization 421
19.5 Unsuccessful Business Model Innovation 422
19.6 Summary 423
19.7 Further Reading 423

Appendix A Statistics Tutorial 424
Appendix B Tables 433
Appendix C Evaluation of the Loss Function 445
Appendix D Equations and Approximations 448
Appendix E Solutions to Selected Practice Problems 456
Glossary 482
References 492
Index of Key "How to" Exhibits 495
Summary of Key Notation and Equations 496
Index 500
