Characterizing the U.S. Industrial Base for Coal-Powered Electricity

Constantine Samaras, Jeffrey A. Drezner, Henry H. Willis, Evan Bloom

Sponsored by the National Energy Technology Laboratory
Characterizing the U.S. Industrial Base for Coal-Powered Electricity

Coal Boilers ................................................................. 28
Pollution-Control Systems ........................................... 31
Smokestacks ............................................................... 32
Implications of Variations in Coal Characteristics ............. 32

CHAPTER FOUR
Market Structure ......................................................... 35
The New-Construction Sector for Coal-Fired Electricity-Generating
Units ........................................................................... 36
Demand for New Coal Electricity-Generating Units .......... 37
New-Unit Specification, Design, and Project Development ... 39
Construction of Coal Electricity-Generating Units .......... 48
Operation and Maintenance Sector .................................. 50
Pollution-Control Sector ................................................. 53
Summary of Findings on Market Structure ....................... 59

CHAPTER FIVE
Workforce ..................................................................... 63
The New-Construction Workforce for Coal Electricity-Generating
Units ........................................................................... 67
Equipment-Manufacturing Workforce ......................... 70
Operation and Maintenance Workforce ....................... 72
Pollution-Control Retrofit Workforce ............................. 72
Workforce Demographics ............................................. 73
Hiring and Training ....................................................... 75
Current Experience from Recent Projects ..................... 76
Summary of Findings on Workforce ................................. 77

CHAPTER SIX
Observations and Remaining Questions ......................... 79
Implications for the U.S. Coal-Based Electricity-Generation Industrial
Base ............................................................................ 81
Remaining Questions ...................................................... 85
APPENDIXES
A. Key Companies in the Coal-Based Electricity-Generation Industry ......................................................... 89
B. Supplemental Tables on the Coal Industrial Base Workforce ...... 95

References ............................................................................................................................................. 115
