

# WBGU

German Advisory Council on Global Change

## World in Transition

## A Social Contract for Sustainability

With 62 Figures

# Contents

<b>Council Staff and Acknowledgments</b> .....	<b>V</b>
<b>Boxes</b> .....	<b>XIII</b>
<b>Tables</b> .....	<b>XV</b>
<b>Figures</b> .....	<b>XVI</b>
<b>Acronyms and Abbreviations</b> .....	<b>XVIII</b>
<b>Summary for Policy-Makers</b> .....	<b>1</b>
<b>Preamble</b> .....	<b>27</b>
<b>1 World in Transition</b> .....	<b>31</b>
<b>1.1 Earth System Megatrends</b> .....	<b>33</b>
1.1.1 Climate Change, Climate Impact .....	33
1.1.2 Loss of Ecosystem Services and Biodiversity .....	37
1.1.3 Land Degradation and Desertification .....	40
1.1.4 Water Shortage and Water Pollution .....	41
1.1.5 Raw Materials, Nutrients, Pollutants .....	42
1.1.5.1 Increasing Scarcity of Strategic Mineral Resources: Examples .....	42
1.1.5.2 Nutrient Cycles .....	44
1.1.5.3 Depletion of the Stratospheric Ozone Layer .....	44
1.1.5.4 Pollutants: Examples .....	45
1.1.6 Interaction of Global Environmental Changes .....	45
<b>1.2 Global Economic and Social Megatrends</b> .....	<b>46</b>
1.2.1 Development .....	48
1.2.2 Democratisation .....	50
1.2.3 Global Energy Trends: Demand and Production .....	52
1.2.4 Urbanisation .....	55
1.2.5 Increasing Land-Use Competition: Food Production, Bioenergy, Forests .....	58
<b>1.3 Conclusions: The Transformation Towards Sustainability</b> .....	<b>62</b>
<b>2 Changing Values: The Global Transformation of Values has already begun</b> .....	<b>67</b>
<b>2.1 Values and Value Change</b> .....	<b>67</b>
<b>2.2 Changing Values and Environmental Consciousness</b> .....	<b>68</b>
2.2.1 The Theory of Value Change: An Explanation of the Increasing Prevalence of Postmaterialist Values since the Second World War .....	68
2.2.2 Attitudes to Environment and Sustainability in various Countries and World Religions .....	69

2.2.3	Openness for Innovations and Attitudes towards New Technologies, Science and Renewable Energies.....	73
<b>2.3</b>	<b>The GDP Debate as an Expression of Changing Values .....</b>	<b>74</b>
<b>2.4</b>	<b>The Gap between Attitudes and Behaviour .....</b>	<b>75</b>
2.4.1	Lack of Long-Term Orientation and Loss Aversion .....	78
2.4.2	Path Dependencies.....	78
<b>2.5</b>	<b>On the Way to a Shared Global Transformation Vision? .....</b>	<b>79</b>
<b>3</b>	<b>The Great Transformation: A Heuristic Concept.....</b>	<b>81</b>
<b>3.1</b>	<b>Key Characteristics of the Great Transformation .....</b>	<b>83</b>
<b>3.2</b>	<b>The ‘Global Metamorphoses in the 19th and 21st Century’: Four Central Arenas for the Transformation .....</b>	<b>84</b>
<b>3.3</b>	<b>Stages of the Great Transformation – Where are We? .....</b>	<b>92</b>
<b>3.4</b>	<b>The Great Transformation’s Action Levels – Why this Epochal Change can be Shaped....</b>	<b>93</b>
<b>3.5</b>	<b>Lessons from Contemporary History: Medium-Range Transformations.....</b>	<b>94</b>
3.5.1	Abolitionism (18th/19th century): Type ‘Vision’ .....	95
3.5.2	Green Revolution (1960s): Type ‘Crisis’ .....	97
3.5.3	Structural Adjustment Policies (1980s): Type ‘Crisis’ .....	99
3.5.4	Protection of the Ozone Layer (from 1985): Type ‘Knowledge’ .....	101
3.5.5	IT Revolution and World Wide Web (1990s): Type ‘Technology’ .....	103
3.5.6	European Integration (since the 1950s): Type ‘Vision’ .....	104
<b>3.6</b>	<b>Conclusions from the Analysis of Historical Transformations .....</b>	<b>106</b>
<b>4</b>	<b>Technical and Economic Feasibility .....</b>	<b>109</b>
<b>4.1</b>	<b>Resources, Energy Potentials and Emissions .....</b>	<b>109</b>
4.1.1	Energy Carriers .....	110
4.1.2	Fossil Energy Carriers.....	110
4.1.2.1	Emissions and Properties.....	110
4.1.2.2	Potentials .....	112
4.1.2.3	Risks and Framework Conditions for Use .....	113
4.1.3	Carbon Dioxide Capture and Storage.....	113
4.1.3.1	Geological Storage Capacity.....	115
4.1.3.2	Risks and Framework Conditions.....	115
4.1.4	Nuclear Energy.....	116
4.1.4.1	Emissions and Properties.....	116
4.1.4.2	Potentials .....	116
4.1.4.3	Risks and Framework Conditions for Use .....	116
4.1.5	Renewable Energies .....	117
4.1.5.1	Emissions and Properties.....	117
4.1.5.2	Potentials .....	118
4.1.5.3	Risks and Framework Conditions for Use .....	119
4.1.6	A Vision as a Thought Experiment: Meeting Global Energy Demand Fully with Renewable Energies.....	119
4.1.7	Emissions from Land Use.....	120
4.1.7.1	Forests and Climate Change Mitigation.....	121
4.1.7.2	Agriculture and Climate Change Mitigation.....	122
<b>4.2</b>	<b>Insights from Energy Models and Climate Change Mitigation Scenarios .....</b>	<b>123</b>
4.2.1	Dynamics of the Primary Driving Forces .....	123

4.2.2	Climate Change Mitigation in Models .....	126
4.2.3	Scenarios.....	127
4.2.4	Scenario Comparison .....	128
4.2.5	Discussion.....	133
<b>4.3</b>	<b>Implications for Areas of Need .....</b>	<b>134</b>
4.3.1	Sustainable Production and Sustainable Consumption: Emissions Reduction and Circular Economy.....	135
4.3.1.1	Reducing Direct and Indirect Emissions.....	135
4.3.1.2	Transition into a Circular Economy .....	136
4.3.2	Buildings, Living and Land-Use Planning.....	138
4.3.3	Mobility and Communication.....	140
4.3.4	Food .....	143
4.3.4.1	Climate-Compatible Agricultural Management .....	144
4.3.4.2	Dietary Habits and Greenhouse Gas Emissions.....	144
<b>4.4</b>	<b>WBGU Exemplary Transformative Path for the EU-27 .....</b>	<b>145</b>
4.4.1	A Renewable Energy Supply in Europe.....	146
4.4.2	The Linking of Energy Systems as the Transformation's Core Element.....	149
<b>4.5</b>	<b>Financing the Transformation towards a Low-Carbon Society .....</b>	<b>152</b>
4.5.1	Investment Requirement for the Transformation of Global Energy Systems .....	152
4.5.1.1	Comparison of Investment Requirement Estimates .....	153
4.5.1.2	Energy Systems Transformation Cost.....	158
4.5.1.3	Investments so far, Investment Gaps, and Investment Barriers.....	159
4.5.2	Financing the Transformation .....	161
4.5.2.1	New Financing Sources at State Level .....	161
4.5.2.2	Supporting and Mobilising Private Investments .....	165
4.5.2.3	New Business Models to Reduce Investment Barriers.....	170
4.5.3	Interim Conclusion .....	171
<b>4.6</b>	<b>Conclusions: Central Elements and Framework Conditions for the Transformation.....</b>	<b>171</b>
<b>5</b>	<b>Transformation Governance .....</b>	<b>175</b>
<b>5.1</b>	<b>Introduction: New Problems, New Statehood! .....</b>	<b>175</b>
<b>5.2</b>	<b>Political Instruments for Managing the Transformation .....</b>	<b>176</b>
5.2.1	Recommendations for Action from Selected Transformation Studies .....	176
5.2.2	Carbon Pricing as a Necessary Political Measure for the Transformation .....	177
5.2.3	Policy-mix for the Transformation.....	181
5.2.3.1	Promotion of Innovation .....	185
5.2.3.2	Investment, Production and Consumption Decisions.....	185
5.2.3.3	Supply of Public Goods .....	186
5.2.4	Conclusion .....	188
<b>5.3</b>	<b>Transformation Impediments and Barriers: It's Politics, Stupid! .....</b>	<b>188</b>
5.3.1	Political Barriers in a Multilevel System.....	189
5.3.1.1	Short-Term Orientation and Politics of Delay.....	189
5.3.1.2	Opposing Forces and Resistance: Lobby and Interest Groups .....	190
5.3.1.3	Institutional Fragmentation and Lack of Coherence and Coordination ....	191
5.3.1.4	Representation Deficit and Lack of Acceptance.....	192
5.3.2	Dare more Democracy! .....	192
5.3.3	The Transformation in Newly Industrialising Countries – Affluence and Political Trends in China, Brazil and India .....	195
5.3.3.1	China .....	195
5.3.3.2	Brazil.....	196

5.3.3.3	India .....	196
5.3.4	Supranational Expansion and Further Globalisation.....	197
5.3.5	Global Governance in a Multipolar World.....	198
5.3.5.1	Altered Framework Conditions Through Multipolarity.....	199
5.3.5.2	Structural Problems and Democracy Deficits of Global Governance and International Organisations .....	201
5.3.5.3	Interim Conclusion .....	202
<b>5.4</b>	<b>A New Statehood within the Multilevel System .....</b>	<b>203</b>
5.4.1	Proactive State with Extended Opportunities for Participation.....	203
5.4.1.1	The Vision of a Proactive State with Extended Participation .....	203
5.4.1.2	The Responsibilities of a Proactive and Enabling State .....	205
5.4.1.3	Legitimisation Through Participation.....	205
5.4.2	Proactive Options at National Level.....	209
5.4.2.1	Constitutional and Legal Climate Policy Self-Commitment on the Part of the State.....	209
5.4.2.2	Extend Opportunities for Information, Participation and Legal Protection .....	210
5.4.2.3	Climate Policy Mainstreaming in Government and Parliament .....	213
5.4.2.4	Improve Representation of Future Interests: Electoral Law Reform and House of Lots .....	215
5.4.3	Proactive Options at EU Level .....	218
5.4.3.1	Possible Courses for Action in the Member States .....	219
5.4.3.2	Possible Course of International EU Action .....	222
5.4.4	Global Governance through International Cooperation .....	223
5.4.4.1	Managing the International Power Vacuum .....	225
5.4.4.2	Transformative Prioritisation .....	225
5.4.4.3	Credible Pursuit of Fairness .....	225
5.4.4.4	Improving International Cooperation Institutional Framework Conditions.....	226
5.4.5	Transformative Governance in the Three Transformation Fields .....	229
5.4.5.1	Transformative Governance of the Energy System .....	229
5.4.5.2	Transformative Urbanisation Governance.....	231
5.4.5.3	Transformative Land-Use Governance .....	234
5.4.5.4	Global Governance for Infrastructure Development .....	237
<b>5.5</b>	<b>Conclusion .....</b>	<b>238</b>
<b>6</b>	<b>Agents of Transformation: How Innovations Can Spread (Faster).....</b>	<b>241</b>
<b>6.1</b>	<b>From Awareness to Action? – From Action to Awareness! .....</b>	<b>241</b>
<b>6.2</b>	<b>The Concept of Change Agents: Definition, Typology and Roles .....</b>	<b>242</b>
<b>6.3</b>	<b>Where and how Change Agents are already Shaping the Transformation Today .....</b>	<b>246</b>
6.3.1	Change Agents at Different Levels and in Various Fields.....	246
6.3.2	Sample Successful Local Climate and Sustainability Initiatives (Supply Side) .....	247
6.3.2.1	Energy Supply .....	247
6.3.2.2	Mobility.....	249
6.3.2.3	Urban Development: Change Agents for Sustainable Urbanisation .....	252
6.3.2.4	Land Use: Change Agents in the Areas of Food Production and Forest Protection .....	255
6.3.3	The Consumers' Role (Demand Side) .....	257
6.3.4	Non-Governmental Organisations as International Policy Pioneers.....	260

6.4	<b>Conclusion: Promote and Multiply Change Agents to Achieve a Rapid Transformation.</b>	<b>261</b>
<b>7</b>	<b>Recommendations for Action</b>	<b>265</b>
7.1	<b>Challenge Low-Carbon Transformation</b>	<b>265</b>
7.1.1	The WBGU's Transformation Strategy	266
7.1.1.1	Facilitating and Impeding Factors	267
7.1.1.2	Climate Protection in Three Key Transformation Fields	268
7.1.1.3	Strategic Perspectives	270
7.1.2	WBGU Guiding Principle for the Global Transformation into a Low-Carbon Society	271
7.1.3	Criteria for the Efficacy of Transformative Measures	272
7.1.4	Ten Measure Bundles with Major Strategic Leverage: Overview	273
7.2	<b>A New Global Social Contract</b>	<b>276</b>
7.3	<b>Ten Measure Bundles with Major Strategic Leverage</b>	<b>278</b>
7.3.1	Bundle 1: Improve the Proactive State with Extended Participation Opportunities	278
7.3.1.1	Increase the Climate Political Responsibility of the State	278
7.3.1.2	Extend Opportunities for Information, Participation and Legal Protection	279
7.3.1.3	Institutionalise Climate Policy Mainstreaming	280
7.3.1.4	Strengthen the Proactive State in a Multilevel System of Global Cooperation	281
7.3.2	Bundle 2: Advance Carbon Pricing Globally	282
7.3.2.1	Low Ambition Level: Develop the European Emissions Trading System further, and Reach a G20 Agreement on Carbon Pricing	283
7.3.2.2	Medium Ambition Level: Pursue Linking Emissions Trading Systems	283
7.3.2.3	High Ambition Level: Establish an Emissions Trading Scheme that is as global as possible, with joint Emissions Restrictions	284
7.3.3	Bundle 3: Promote a Common European Energy Policy	285
7.3.3.1	A Common Energy Policy as a Chance for Europe	285
7.3.3.2	Low Ambition Level: Strengthening of the Objective 'Climate Protection' and elaborating Existing Energy Policy Measures	285
7.3.3.3	Medium Ambition Level: Realisation of a Single European Energy Market	286
7.3.3.4	High Ambition Level: Europe-wide Energy Strategy on Union Basis	287
7.3.4	Bundle 4: Accelerate Expansion of Renewable Energies on a Global Level through Feed-In Tariffs	288
7.3.4.1	Feed-in Tariffs in Europe: Use Efficiency Gains through Step by Step Harmonisation	289
7.3.4.2	Global Diffusion of Feed-in Tariffs: Initiate Knowledge Exchange, Financial Transfers and Country Partnerships	290
7.3.5	Bundle 5: Promote Sustainable Energy Supply Services in Developing and Newly Industrialising Countries	291
7.3.5.1	Low Ambition Level: Adapt Concepts and Strategies	292
7.3.5.2	Medium Ambition Level: Extend the Use of Modern Energy in Rural Areas	292
7.3.5.3	High Ambition Level: Start and Accelerate Large-Scale Implementation Soon	293
7.3.6	Bundle 6: Steering the World's Rapid Urbanisation towards Sustainability	294
7.3.6.1	Low Ambition Level: Improve Global Communication and Information	294
7.3.6.2	Medium Ambition Level: Develop and Implement Technologies for Low-Carbon Cities	295

7.3.6.3	Medium Ambition Level: Direct Urban and Regional Planning Development Cooperation towards Climate-Protection .....	297
7.3.6.4	High Ambition Level: Large-Scale Launch of Beacon Projects .....	298
7.3.7	Bundle 7: Advance Climate-Friendly Land Use.....	299
7.3.7.1	Establish a Global Commission for Sustainable Land Use .....	299
7.3.7.2	Sustainable Forest Management and the Mitigation of Emissions from Deforestation and Forest Degradation .....	300
7.3.7.3	Promote Climate-Friendly Agriculture .....	302
7.3.7.4	Promote Climate-Friendly Eating Habits .....	303
7.3.8	Bundle 8: Encourage and Accelerate Investments into a Low-Carbon Future.....	304
7.3.8.1	Pillar 1: Provide Stable Framework Conditions for Climate-Friendly Investments .....	305
7.3.8.2	Pillar 2: Open Up New Financing Sources at State Level .....	305
7.3.8.3	Pillar 3: Strengthen Mechanisms to Encourage Private Investments .....	308
7.3.8.4	Pillar 4: Encourage New Business Models .....	309
7.3.9	Bundle 9: Reinforce International Climate and Energy Policy.....	310
7.3.9.1	International Climate Policy Post-Copenhagen and Post-Cancún .....	310
7.3.9.2	International Energy and Technology Policy .....	312
7.3.10	Bundle 10: Pursue a Revolution in International Cooperation .....	313
7.3.10.1	International Environmental and Developmental Policy in the Context of the Rio+20 Conference .....	313
7.3.10.2	Comprehensive Global Governance as the Transformation's Driving Force.....	316
<b>7.4</b>	<b>Synthesis: The Composition of Measure Bundles .....</b>	<b>318</b>
<b>8</b>	<b>The Knowledge Society's Role in the Transformation Process: Recommendations for Research and Education .....</b>	<b>321</b>
<b>8.1</b>	<b>Research for the Transformation .....</b>	<b>322</b>
8.1.1	Goals, Requirements and Starting Points .....	322
8.1.1.1	Goals .....	322
8.1.1.2	Structural Requirements .....	323
8.1.1.3	Requirements in Terms of Content .....	323
8.1.1.4	Overall Requirements in Terms of Research for the Transformation.....	324
8.1.2	Research for the Social Contract .....	325
8.1.2.1	Research Issues for the Social Contract .....	325
8.1.2.2	Sustainability Science and Global Change Research.....	329
8.1.2.3	A New Research Field: Transformation Research.....	330
8.1.3	Research Issues for the Transformation Fields .....	332
8.1.3.1	Transformation of the Energy System.....	333
8.1.3.2	Transformation in the Field of Urbanisation .....	335
8.1.3.3	Transformation of Land Use .....	336
8.1.4	Analysis of Selected Research Strategies and Programmes .....	338
8.1.4.1	European Research Policy .....	338
8.1.4.2	German Research Policy .....	341
8.1.4.3	Energy Research Funding.....	342
8.1.4.4	Urbanisation Research Funding .....	344
8.1.4.5	Land-Use Research Funding .....	345
8.1.4.6	Funding of Research in the Humanities and Social, Economic and Legal Sciences .....	347
8.1.4.7	Conclusions.....	348
8.1.4.8	Interdisciplinarity .....	350
8.1.4.9	The Four Transformative Pillars of the Knowledge Society .....	351

<b>8.2</b>	<b>Education for the Transformation</b> .....	<b>352</b>
8.2.1	Challenges of Knowledge Communication .....	353
8.2.2	Solutions .....	355
<b>8.3</b>	<b>Recommendations</b> .....	<b>357</b>
8.3.1	Research .....	358
8.3.2	Education .....	359
8.3.3	Interactive Field Education – Research .....	359
8.3.4	Concrete Research Priorities in the Three Transformation Fields .....	360
8.3.5	Conclusions .....	360
<b>9</b>	<b>References</b> .....	<b>361</b>
<b>10</b>	<b>Glossary</b> .....	<b>391</b>
