About the Author .................................................. xxvii

### SECTION I  Best Practices Used in Strategic Planning

**Prologue:** The Management Team Is Summoned .................. 5
  The CEO Speaks .................................................. 5
  Running a Business versus Running a Business Well .......... 8
  Using Best Practices to Align Strategy and Resources ...... 9
  Overview of the Best Practices of Industry Leaders ....... 10
  Using Best Practices to Innovate and Compete ............. 11

**Chapter 1** How to Compete: Competitive Strategy .............. 13
  Competitive Strategy: The Classic Approach ................ 14
  Five Forces Model of Industry Competition ............... 16
    New Entrants ............................................... 17
    Intensity of Rivalry ....................................... 18
    Pressure from Substitute Products ...................... 19
    Bargaining Power of Buyers (Customers) ................ 19
    Bargaining Power of Suppliers ........................... 19
  Determining a Defensible Position ........................... 20
  Competitor Analysis .......................................... 22
  Building on Porter’s Best Practices .......................... 23

**Chapter 2** How to Focus Operations: The Discipline of Market Leaders ............................................. 27
  New Rules of Competition ..................................... 28
  Operating Models ............................................. 30
    Operational Excellence Operating Model .................. 31
Product Leadership Operating Model ........................................... 32
Customer Intimacy Operating Model ........................................... 32
Defining Value .............................................................................. 33
Building on Treacy and Wiersema’s Best Practices ............ 34

Chapter 3 How to Manage Performance: The Balanced Scorecard ........................................... 37
Performance Measures from a Financial Perspective .... 40
Performance Measures from a Customer Perspective .... 42
Performance Measures from an Internal Business Process Perspective ........................................... 44
Performance Measures from a Learning and Growth Perspective ........................................... 46
Strategy Maps .............................................................................. 49
Summarizing Kaplan and Norton’s Best Practices ........ 54
Building on Kaplan and Norton’s Best Practices ........ 55

Chapter 4 How to Adapt: Adaptive Enterprise ........................................... 59
Sense-and-Respond Organization ........................................... 60
Adaptive Loop .............................................................................. 61
Modular Organization ................................................................. 63
Commitment Management Protocol ........................................... 64
Building on Haeckel’s Best Practices ........................................... 66

Section I Conclusion: Strategic Planning—A Process, Not An Event ........................................... 67

SECTION II Execution—Best Practice Use of Strategic Resources

Chapter 5 How to Structure Organizational Behavior for Strategic Execution ........................................... 73
Empower and Motivate ................................................................. 73
Workforce Collaboration ................................................................. 75
Collaborative Objectives ................................................................. 76
Managing Responsibility and Accountability ......................... 79
Chapter 6  How to Structure Business Processes for Strategic Execution ............................................... 81

Defining Processes ......................................................... 82
Operating, Support, and Management Processes ........ 82
Operating Processes ........................................... 82
Support Processes ................................................ 83
Management Processes ........................................ 83
Control Processes and Competitive Advantage ........ 86
Business Rules and Process Controls ......................... 88
Core and Noncore Processes ..................................... 90
Preparing to Organize Processes as Assets ................. 91
Managing Processes as a Portfolio of Assets ................ 92
Business Process Portfolio Management .................... 93
Business Process Portfolio ........................................ 94
Business Process Inventory ....................................... 94
Introducing Business Process Reference Models .......... 95
Evaluation Dimensions ............................................. 97
Next Steps ............................................................... 102
Analyzing Inventoried Processes .............................. 103
Managing Process Execution .................................... 107
Performance Measurement ...................................... 108
Selecting Key Performance Indicators ......................... 110
General Rules about Selecting and Crafting KPIs ........ 111
Measuring Variance .................................................. 114
Using Trend Analysis ............................................... 116
Using Benchmarking ............................................... 118
Performance Control via Event Management .............. 120
Exception Management and Resolution ...................... 121
Enabling Event Management ..................................... 123
Improving Execution through Process Modeling, Analysis, and Simulation .................................... 127
Selecting Processes for Improvement ......................... 132
Symptomatic versus Strategic Process Improvement .... 133
Symptomatic Processes ........................................... 133
Strategic Processes ................................................. 135
Continuous Process Improvement Program ................ 136
Dealing with Complexity ........................................... 137
Simple versus Complex Processes ........................................ 137
Assessing Process Complexity ........................................... 140

Chapter 7 How to Structure Technology for Strategic Execution ............................................. 141
Preparing for Process Improvement ........................................ 143
  IT Trends That Influence IT Strategy ..................................... 144
    Applications and APIs .................................................. 144
    Workflow and EDI ..................................................... 144
    ERP ................................................................. 145
    ETL ................................................................. 145
    EAI ................................................................. 146
  Business Process Modeling and Analysis ................................. 146
  Business Rules Management ............................................. 146
  Internet .............................................................. 147
  Open Source .......................................................... 147
  SOA ................................................................. 147
  SaaS and Cloud ...................................................... 148
  BPMS ............................................................... 149
  BAM and BI .......................................................... 149
Assessing IT Readiness ..................................................... 150
  IT Capabilities Enabling Process Change .............................. 150
  Overall IT Readiness .................................................. 152
Crafting a Process-Centric IT Strategy ..................................... 153
  Petitioning for Process-Centric IT Strategy ............................ 160
Investing in Process-Centric IT Architecture .............................. 161
  IT Portfolio Management ................................................ 161
  Objective Evaluation and Financial Analysis ........................... 165
    Objective Evaluation ................................................ 165
    Financial Analysis .................................................. 166
Competing for IT Budget ................................................... 167
  IT Portfolio Budget Structure .......................................... 168
    Funding Availability ................................................ 169
    Funding Sources and Accounting Methods ........................... 169
IT Budget Management: Resource Perspective ........................... 170
IT Budget Management: Domain Perspective ............................... 171
IT Budget Management: Purpose Perspective ............................... 172
IT Budget Management: Asset Class Perspective ........................ 173

IT Investment Practices of Industry Leaders......................174
Making an IT Investment Request...........................................175

Section II Conclusion: Resources Structured for Execution.................................................................176

SECTION III    How to Align Strategy and Resources to Improve Execution, Adaptability, and Consistency

Chapter 8    Derivative Analysis Technique for Business Strategy and Resource Alignment .................................181

Derivative Analysis Defined ..................................................182
Using Derivative Analysis to Align Strategy and Resources: A Self-Assessment...........................................185

A Generic Derivative Analysis ...............................................187
Section I: Best Practices Used in Strategic Planning.....187
Progress Report—Section I: Best Practices Used in Strategic Planning..........................................................193
Section II: Execution—Best Practice Use of Strategic Resources ........................................................................193
Progress Report: Execution—Best Practice Use of Strategic Resources ..........................................................201
Final Report: Derivative Analysis ...........................................201

Section III Conclusion: Strategy and Resources Aligned.................................................................203

Epilogue: The Management Team Reconvenes.................................205
The Chairman Speaks................................................................205

Some Practical Success Factors for Improving Execution, Adaptability, and Consistency .........................208
Start Where Common Sense Tells You.................................208
Avoid Complexity at First....................................................209
Assign Ownership .............................................................209
Address Misconceptions ......................................................210
Communicate .................................................................212
Contents

Check Reversion ............................................................. 212
Proceed Diligently .......................................................... 213

SECTION IV Summary Conclusion

Summary of Key Guidance .................................................. 217
   Prologue: Management Team Is Summoned ......................... 217
   Section I: Best Practices Used in Strategic Planning .............. 218
   Section II: Execution—Best Practice Use of Strategic Resources .......................................................... 220
   Section III: How to Align Strategy and Resources to Improve Execution, Adaptability, and Consistency .............. 221
   Epilogue: Management Team Reconvenes ......................... 222
