Meta-Regression Analysis in Economics and Business

T.D. Stanley and Hristos Doucouliagos
# Contents

List of figures vii  
List of tables viii  
Acknowledgments ix

1 Introduction 1  
1.1 The Tower of Research 1  
1.2 A historical sketch of meta-regression analysis 5  
1.3 Practical examples 9  
1.4 Plan of the book 10

2 Identifying and coding meta-analysis data 12  
2.1 Identifying studies 13  
2.2 What data to collect 20  
2.3 Effect sizes in economics and their standard errors 22  
2.4 Coding issues 29  
2.5 The quality conundrum: should estimates be combined? 33  
2.6 Summary 37

3 Summarizing meta-analysis data 38  
3.1 Illustrating data 38  
3.2 Summary measures 43  
3.3 Statistical significance versus economic significance 48  
3.4 Testing for heterogeneity 48  
3.5 Recap: summarizing research 49

4 Publication bias and its discontents 51  
4.1 Publication selection 51  
4.2 Funneling research to identify and correct publication selection bias 53
