### Part I  
The trading world: patterns and policy

**Chapter 1**  The structure of international trade and factor flows  
1.1  A preview of trade theory 2  
1.2  Patterns of international trade 5  
1.3  International factor flows 29  
1.4  Concluding remarks 35  
Appendix: Aggregate indices of trade overlap 37

**Chapter 2**  Trade policy instruments and environment  
2.1  Instruments of trade policy 43  
2.2  Administered protection and the WTO 56  
2.3  Concluding remarks 66

### Part II  
Competitive markets: trade and trade policy

**Chapter 3**  The Ricardian framework  
3.1  The principle of comparative cost advantage 73  
3.2  The Ricardian model 74  
3.3  Economies of scale 81  
3.4  A continuum of goods 85  
3.5  Technological heterogeneity 89  
3.6  Tests of the Ricardian trade theory 92  
3.7  Concluding remarks 96

**Chapter 4**  The factor abundance model  
4.1  Production equilibrium 102  
4.2  Specification of demand 116  
4.3  Autarky and international equilibria 118  
4.4  The factor abundance theorems 122  
4.5  Concluding remarks 129  
Appendix: The transformation curve 130
Chapter 5  Trade policy
5.1  Tariffs
5.2  Quantitative restrictions
5.3  Estimating welfare effects
5.4  Concluding remarks
Appendix: Measures of welfare change

Chapter 6  Factor mobility and trade
6.1  The gravity equation
6.2  Goods and factors: substitutes or complements?
6.3  International labor migration
6.4  The specific factors model
6.5  Concluding remarks

Chapter 7  The factor abundance theory in higher dimensions
7.1  Autarky equilibrium with J goods and H factors
7.2  Generalized law of comparative advantage
7.3  Factor abundance and trade
7.4  Testing the factor abundance model
7.5  The Stolper-Samuelson and Rybczynski theorems
7.6  Factor price equalization
7.7  Concluding remarks

Part III  Imperfectly competitive markets: trade and trade policy

Chapter 8  Imperfect competition
8.1  Market power and the gains from trade
8.2  Product differentiation and intra-industry trade
8.3  Factor endowments and monopolistic competition
8.4  Concluding remarks
Appendix: Monopolistic competition with Dixit-Stiglitz preferences

Chapter 9  Heterogeneous firms
9.1  The Melitz (2003) model and extensions
9.2  Endogenous mark-ups
9.3  Endogenous comparative advantage
9.4  The diversity of export destinations
9.5  Measuring the impact of trade costs
9.6  Concluding remarks

Chapter 10  Trade policy in imperfectly competitive markets
10.1  Rivalry in a single market
10.2  Extensions
10.3  Rivalry across markets
10.4  Quantitative restrictions
10.5  Contingent protection
10.6  Concluding remarks
Chapter 11  Multinational production  
11.1  Measuring multinational activity  
11.2  Why multinational? The OLI framework  
11.3  Oligopolistic interaction  
11.4  Endowments and the fragmentation of production  
11.5  The knowledge-capital model  
11.6  Heterogeneous firms: exporting versus FDI  
11.7  A multi-country setting  
11.8  Endowments and intra-firm trade  
11.9  Intra-firm trade and outsourcing: the evidence  
11.10  Concluding remarks  
438  
Part IV  Special topics  
Chapter 12  Economic integration  
12.1  Basic concepts  
12.2  Rationale for trade agreements  
12.3  Regionalism versus multilateralism  
12.4  Factor markets  
12.5  Empirics of integration  
12.6  Concluding remarks  
446  
Chapter 13  Exchange rates and international trade  
13.1  Trade and exchange rate volatility  
13.2  The choice of the invoice currency  
13.3  Prices and exchange rates  
13.4  Hysteresis  
13.5  Concluding remarks  
453  
Chapter 14  Growth and international trade  
14.1  Preliminaries  
14.2  The Harrod-Domar model  
14.3  The neoclassical model  
14.4  Two-sector models  
14.5  Endogenous growth  
14.6  Growth empirics  
14.7  Concluding remarks  
483  
Appendix  Data methods and sources  
A.1  Trade flow data  
A.2  Industry characteristics  
A.3  Country characteristics  
A.4  Other international data and sources
