Contents

Foreword .................................................................................................................. vi
Acknowledgments ................................................................................................. vii
Acronyms and Abbreviations ................................................................................. viii
Assessment of Leading Initiatives ........................................................................ 1
Overview ................................................................................................................. 1
Conclusions from Research .................................................................................... 2
Assessment of Gaps—What Can Be Achieved in the Short-Term? ...................... 9

1. Introduction ........................................................................................................... 11
   Background ........................................................................................................... 11
   Impediments to Accelerating Green Investments ............................................. 13
   Objectives and Scope of the Report ................................................................. 15
   Methodology ....................................................................................................... 16

2. Global and Regional Initiatives .......................................................................... 17
   UN Framework Convention on Climate Change (UNFCCC) ......................... 17
   Other Global Initiatives ...................................................................................... 20
   Regional and Country Initiatives ..................................................................... 24

3. Established and Proposed International Funding Programs ............................ 28
   Funding Needs and Funding Sources ............................................................... 28
   Kyoto Protocol’s CDM/JI .................................................................................... 31
   Climate Investment Funds (CIF) ........................................................................ 33
