Modelling, Pricing, and Hedging Counterparty Credit Exposure

A Technical Guide

Contents

Part I Methodology

1 Introduction ......................................................... 3
  1.1 Basic Concepts ............................................... 3
  1.2 Preliminary Examples .......................................... 4
    1.2.1 Vanilla Interest-Rate Swap ................................ 4
    1.2.2 Cancellable Swap .......................................... 5
    1.2.3 Managing Credit Risk—Collateral, Credit Default Swap .. 8
  1.3 Why Compute Counterparty Credit Exposure? ...................... 10
  1.4 Modelling Counterparty Credit Exposure ........................ 10
    1.4.1 Definition ................................................ 10
    1.4.2 Risk Measures ............................................. 12
    1.4.3 Netting and Aggregation ................................... 12
    1.4.4 Close-Out Risk ............................................ 13
    1.4.5 Right-Way/Wrong-Way Exposure ............................ 14
    1.4.6 Credit Valuation Adjustment: CVA ........................ 14
    1.4.7 A Simple Credit Quantification Example .................... 15
    1.4.8 Computing Credit Exposure by Simulation ................. 17
    1.4.9 Implementation Challenges ................................ 18
    1.4.10 An Alternative Approach: The AMC Algorithm ............ 19
  1.5 Which Architecture? ........................................... 20
  1.6 What Next? .................................................... 21

2 Modelling Framework .................................................. 23
  2.1 Counterparty Credit Exposure Definition ........................ 23
  2.2 Process Dynamics .............................................. 26
  2.3 Interest Rate: Single Currency ................................ 27
    2.3.1 Simple Specifications .................................... 29
    2.3.2 HJM Framework ........................................... 31
    2.3.3 Libor Market Models ..................................... 32
  2.4 Multiple Currencies and Foreign Exchange ........................ 33
  2.5 Inflation ...................................................... 37
## Part II Architecture and Implementation

### 5 Computational Framework
- **5.1 AMC Implementation and Trade Representation**
  - 5.1.1 Examples
  - 5.1.2 Expression Trees
- **5.2 A Portfolio Aggregation Language**
  - 5.2.1 PAL Examples
- **5.3 The Concept of Scenarios**
- **5.4 The Concept of Super-Product**
  - 5.4.1 An Example of Super-Products: The C-CDS

### 6 Implementation
- **6.1 Spot and Forward Statistics**
  - 6.1.1 Libor Rates and Bond Prices
  - 6.1.2 Annuity
  - 6.1.3 Swap Rate
- **6.2 Path Dependent Statistics**
  - 6.2.1 Extremum
  - 6.2.2 Average
  - 6.2.3 In Range Fraction
  - 6.2.4 Credit Loss
- **6.3 Monte Carlo Stepping**
- **6.4 Technical Notes**
  - 6.4.1 SDE Integration Schemes
  - 6.4.2 Milstein 2 Scheme
  - 6.4.3 Martingale Interpolation
  - 6.4.4 Distribution of Maxima and Minima
- **6.5 Error Analysis**
  - 6.5.1 Choice of Model: Scenario and Exposure Analysis
  - 6.5.2 AMC Error
  - 6.5.3 Numerical Errors
  - 6.5.4 Approximations: Arbitrage Conditions

### 7 Architecture
- **7.1 Requirements**
  - 7.1.1 Functional, Non-Functional Requirements, and Design Principles
- **7.2 Conceptual View: Methodology**
- **7.3 Logical View**
  - 7.3.1 Portfolio Manager Components
  - 7.3.2 State of the World Components
  - 7.3.3 Quantification Components
- **7.4 Physical View**
- **7.5 Alternative Approaches**
Part III Products

8 Interest-Rate Products

8.1 Interest-Rate Swaps

8.1.1 Swaps in Advance and in Arrears

8.1.2 Capped and Floored Swaps

8.1.3 Cancellable Swaps

8.1.4 Cross-Currency Swaps

8.2 Constant-Maturity Swaps and Steepeners

8.3 Range Accruals

8.4 Interest-Rate Options

9 Equity, Commodity, Inflation and FX Products

9.1 Forwards and Options

9.1.1 Forwards Contracts

9.1.2 Vanilla and Digital Options

9.1.3 Bermudan and American Options

9.1.4 Asian Options

9.1.5 Barrier Options

9.2 Asset Swaps

9.2.1 Absolute Return Swaps

9.2.2 Relative Return Swaps

9.2.3 Cliquets

9.2.4 Target Redemption Swaps

10 Credit Derivatives

10.1 Credit Default Swaps

10.2 Collateral Debt Obligations

11 Structures

11.1 Sinking Funds

11.2 Accelerated Share Re-Purchase

11.3 Callable Daily Accrual Notes

11.4 Call Spread Overlays

Part IV Hedging and Managing Counterparty Risk

12 Counterparty Risk Aggregation and Risk Mitigation

12.1 Risk Measures

12.2 Choice of Measure

12.3 Portfolio Risk Aggregation

12.3.1 Reference Currency

12.3.2 Netting and No-Netting Agreements

12.3.3 Break Clauses

12.4 Collateral Agreements

12.4.1 Counterparty Exposure of Collateralised Counterparties
