Acknowledgments	ix
Abbreviations	xi
1 INTRODUCTION	1
Conceptual Issues	2
What Makes a Good Good?	5
Beyond Goods	7
Notes	10
PART I WHAT MAKES A GOOD GOOD?	11
2 CURSED GOODS: NATURAL RESOURCES	13
Stylized Facts and the Mechanisms of the Curse	13
The Elusive Resource Curse	19
Notes	22
3 RICH COUNTRY "HIGH PRODUCTIVITY" GOODS	25
What Are High PRODY Goods?	26
Of Monkeys and Trees	30
Notes	33
4 SMART GOODS	35
Wage Premiums and Educational Endowments in Latin America	38
Wage Premiums across Industries	40
Country and Industry Effects on Skill Premiums	46
Exports and Industry Skill Premiums	48
Notes	53

PART II BEYOND GOODS	55
5 EXPORT HETEROGENEITY ALONG THE QUALITY DIMENSION	57
Export Heterogeneity along the Quality Dimension	58
How Do Latin America and the Caribbean Compare in Export Unit Values?	59
Unit Value Dynamics	66
What Affects the Growth of Unit Values? Countries versus Industries	68
Entry and Exit Patterns	73
Conclusion	75
Notes	76
6 HETEROGENEITY IN THE PRODUCTION OF GOODS	77
How Things Are Produced Matters	77
Smart Goods or Smart Production Processes?	78
The How	82
Goods or Tasks?	84
Notes	89
7 TRADE QUALITY AS PORTFOLIO DIVERSIFICATION	91
Development as Diversification	92
Market Failures in Product Innovation and Diversification	92
Scarce Evidence of Market Failures	93
Natural Resources, Export Concentration, and Volatility	94
Volatility as a Determinant of Export Structure and Financial Development	99
The Distribution of Manufactured Exports	102
Notes	104
8 CONCLUSION AND POLICY REFLECTIONS	105
BIBLIOGRAPHY	109
INDEX	121
BOXES	
4.1 Estimating Skill Wage Premiums	37
5.1 Caribbean Super Stars?	62
6.1 Who Makes the iPod?	85

FIGURES

2.1	Net Exporters of Natural Resources during 1980–2005 and Real GDP per Capita in 2005	15
2.2	Net Importers of Natural Resources during 1980–2005 and Real GDP per Capita in 2005	16
3.1	The Distribution of Exporters' Incomes: PRODY and 1 Standard Deviation	27
3.2	Regional and Country EXPYs	28
4.1	Skill Premiums and Skill Endowments in Latin America	42
5.1a	Relative Quality by Region, 1990–2001	60
5.1b	Region and Country Relative Quality	61
5.1c	Relative Quality Ladders for Top Latin American Exports and Representative Products	63
5.2a	Quality Growth by Region, 1990–2001	67
5.2b	Region and Country Quality Growth	68
5.3	Quality Growth by Region, 1990–2001, Product Fixed Effects Included	69
5.4	Growth and Standard Deviation of Quality Growth, 1990–2001	71
5.5	Unit Value Ratio of New to Incumbent Goods (25, 50, 75th percentiles)	74
6.1	Brazil and Mexico: Has Their Export Prowess Resulted in Revealed Comparative Advantage (RCA) in Patents for Aircraft, Office Computing, and Accounting Equipment?	79
6.2a–c	Revealed Comparative Advantage (RCA) in Exports versus RCA in Innovation (1980–2005)	80
6.3	PRODY versus Value Added in China	87
7.1	Export-Revenue Concentration and Terms-of-Trade Volatility	97

TABLES

3.1	Influence of EXPY on Growth: Revisiting the Evidence from Hausmann, Hwang, and Rodrik	29
4.1	Education and Skill Endowments in Latin America and the Caribbean	39
4.2	Returns to Schooling and Skill Premiums in Latin America and the Caribbean	41
4.3	Sectors Ranked by Skill Premium in Latin America	43
4.4	Explanatory Power of Industry and Country Effects on Latin American and Caribbean Returns to Schooling and Skill Premiums	47

4.5	Exports, Countries, and Industries as Determinants of Industry-Skill Wage Premiums	49
4.6	Export-Product Differentiation and Industry-Skill Wage Premiums	51
6.1	Participants in the Knowledge and Skill Cluster in the Paper and Pulp Industry (1990)	83
6.2	China: 10 Exports with the Lowest Domestic Value Added (% of exports)	88
7.1	Natural Resources, Macroeconomic Volatility, and Trade Concentration, 1980–2005	96
7.2	Determinants of Export Concentration and GDP Growth Volatility, 1980–2005 (3SLS estimates)	99
