4. **Interchangeability and Service Parts** 73
   Interchangeability Defined 73
   Compatible 75
   Interchangeable Always Applicable? 75
   Service Parts and Assemblies 76
   Interchangeable in All Applications 78
   Interchangeability Examples 78
   Interchangeability Test 82
   Part Number Change Logic 82
   Form and Function 85
   Field Units 86
   PCB Interchangeability/"Bug Fixes" 87
   Interchangeability in Doubt 90

5. **Bill of Material** 93
   BOM Data Responsibility 94
   Data Dictionary 95
   Item Master File 96
   Design Engineering Data 96
   Parent-Component Relationship 98
6. Teams and Other Foundation Blocks

Cross-Functional Teams
Team Make Up
Team Responsibility
Team Meetings
Team Action List
Team Success
Team Measurement
Design Responsibility
Cognizant Engineer List
Other Function Engineers
7. Document Release and Product Lifecycle

Lifecycle Release Phases
Documents Tied to the Release Phase
The Revision Block
Lifecycle Phase Issues
Baseline–Lifecycle Phase Relationships
CM and the Release Process
Product Definition Phase
Product Development Phase
Product Pilot Phase
Product Production Phase
Product Phase Out
Management of the Release Process
Release Status Codes
Release Form and Signatures
Release Checklist
Closing the Gap in Pilot
Catch-22
Lifecycle Release Process
11. Fast Change

Why is Process Speed Important?
Bone Pile Reduction and Other Benefits
Measure the Change Process Time
Publish Change Time Measurement
Change Process Points to Measure 270
Change Process Phases 272
Revision of Master Documents 272
Set Change Throughput Goals 274
Measure Volume and Reduce Backlog 275
Managing for Fast Change 277
Significance of Change Speed 279

  Trolls 282
  Establish Key Process Metrics and Publish Them 286
  Design Change Process Improvements 286
  Missionary Team Leader 287
  Steps to Reinvent a Process 287
  Continuous Improvement or Reinvent 289
  Fast Change Work Flow 290
  Change Work Flow Diagram 292
  Engineering Work Flow 292
  Point of No Return – Technical Release 294
  Change Checklist 295
  CM Change Work Flow 296
  Manufacturing (Implementation) Work Flow 298
  Quality Factor 300
  A Case Study 301
  Continuous Improvement 304
  CM Implementation Critical Success Factors 305
  System Redesign is Not Easy 306

13. Process Standards and Audits 307
  CM Policy 309
  Writing and Formatting Standards 310
  Best Practice for a Standard 313
  Subjects to Standardize 314
  Procedures 315
  Procedure in a Flow Diagram 318
  Standards Manual 318
  Training 319
  Auditing the CM Processes 319
  Audit Plan 320
  Audit Frequency 321
## Contents

**14. EDC and the Supply Chain**  
Supply Chain is Broken 326  
Purchase Order – CM Boilerplate 329  
ECO Sent to Supplier 330  
Supply Chain Analysis 330  
Supplier’s Relationship with the Customer 331  
Supplier BOM 331  
Purchased Proprietary Assembly Changes 332  
Customer Review and Approval of Changes 332  
Change Approval Default Clause 333

**15. Benchmarking**  
Benchmarking Pitfall 336  
How to Benchmark 336  
Benchmarking Survey 337  
Automotive Suppliers – Summary of Results 337  
Survey – 58 University Seminar Attendees 343  
Benchmark Report 345  
Interpretation of Surveys 346

**16. Product Manufacturing Software**  
Current Software 347  
Develop Your Own Software? 349  
Software Purchased and Tailored 349  
Purchasing Software 350  
CM’s Role in Software Choices 351  
Software Trend 351  
Validation 352  
Software Question for This Century 352  
Manufacturing Company Software (MCS) 353  
CM Strategy Summarized 355  
Education and Training 356

Reference and Reading List 359  
Index 361
