China’s Pension System

A Vision

Mark C. Dorfman, Robert Holzmann, Philip O’Keefe, Dewen Wang, Yvonne Sin, and Richard Hinz
Contents

Preface and Acknowledgments xi
About the Authors xiii
Abbreviations xvii

Overview 1
Introduction 1
Motivations for Pension Reform 2
Pension System Design Proposal and Options 4
Design Considerations 9
Implementation Issues and Options 10
Conclusion 13
Notes 14

China: A Vision for Pension Policy Reform 15
Introduction 15
Current and Future Trends Motivating Reform 17
Proposed Design 23
Financing Options 59
A Reform Process: Cross-Cutting Analysis and Institutional Reform Issues 65
Appendix D  Aging, Retirement, and Labor Markets  197
Aging, Migration, and Labor Markets  197
Effects of an Increase in the Retirement Age on the Labor Market  203
Effects of an Increase in the Retirement Age on the Urban Elderly  209
Public Policy Implications of Increasing the Retirement Age  210
Conclusions  213
Notes  214
References  214

Appendix E  Voluntary Savings Arrangements  217
The Objectives and Role of Voluntary Savings Arrangements in the Chinese Pension System  217
Conditions Necessary to Fulfill These Objectives  220
A Design Framework for Supplementary Pension Schemes  222
The Path to Implementation  231
References  235

Glossary  237

Boxes
1  The Effect of the Minimum Retirement Age on Employment and Labor Markets  19
2  Benefit Calculation and Illustrative Examples for the Proposed MORIS  40
