Simulation in Computational Finance and Economics:
Tools and Emerging Applications

Biliana Alexandrova-Kabadjova
Banco de Mexico, Mexico

Serafin Martinez-Jaramillo
Banco de Mexico, Mexico

Alma Liliana Garcia-Almanza
Banco de Mexico, Mexico

Edward Tsang
University of Essex, UK
Detailed Table of Contents

Foreword by Manfred Gilli................................................................. xiv
Foreword by Thomas Lux....................................................................... xv
Preface....................................................................................................... xvi

Section 1
Payment Systems and Methods

Chapter 1
The Adoption Process of Payment Cards: An Agent-Based Approach........................................ 1
   Biliana Alexandrova-Kabadjova, Banco de Mexico, Mexico
   Sara G. Castellanos-Pascacio, BBVA Research, Mexico
   Alma L. Garcia-Almanza, Banco de Mexico, Mexico

Chapter 2
The Use of Simulations as an Analytical Tool for Payment Systems ........................................... 29
   Martin Diehl, Deutsche Bundesbank, Germany

Chapter 3
Preparing Simulations in Large Value Payment Systems using Historical Data.......................... 46
   Ronald Heijmans, De Nederlandsche Bank, The Netherlands
   Richard Heuver, De Nederlandsche Bank, The Netherlands

Chapter 4
Simulation Approaches to Risk, Efficiency, and Liquidity Usage in Payment Systems ................. 69
   Tatu Laine, Bank of Finland, Finland
   Kasperi Korpinen, Bank of Finland, Finland
   Matti Hellqvist, Bank of Finland, Finland

Chapter 5
Liquidity Management in the Large Value Payment Systems: Need for an Agent-Based Model’s
   Complex Approach............................................................................. 84
   Luca Arciero, Bank of Italy, Italy
   Cristina Picillo, Bank of Italy, Italy
Chapter 6
Liquidity Saving Mechanisms and Bank Behavior in Payment Systems ........................................ 103
Marco Galbiati, Bank of England, UK & European Central Bank, Germany
Kimmo Soramäki, Aalto University, Finland

Chapter 7
Liquidity Saving in CHAPS: A Simulation Study ................................................................. 120
Joanna McLafferty, Bank of England, UK
Edward Denbee, Bank of England, UK

Chapter 8
Managing Intraday Liquidity: The Mexican Experience ......................................................... 143
Biliana Alexandrova-Kabadjova, Banco de Mexico, Mexico
Francisco Solis-Robleda, Banco de Mexico, Mexico

Section 2
Risk Management

Chapter 9
Measuring and Charging for Banks’ Systemic Interconnectedness ........................................ 162
Marco A. Espinosa-Vega, International Monetary Fund, USA
Juan Solé, International Monetary Fund, USA & Financial Stability Board, Switzerland

Chapter 10
Systemic Risk, Stress Testing, and Financial Contagion: Their Interaction and Measurement ...... 181
Calixto Lopez-Castañon, Banco de Mexico, Mexico
Serafin Martinez-Jaramillo, Banco de Mexico, Mexico
Fabrizio Lopez-Gallo, Banco de Mexico, Mexico

Chapter 11
What Matters in Determining Capital Surcharge for Systemically Important Financial Institutions? ................................................................. 211
Céline Gauthier, Bank of Canada, Canada
Toni Gravelle, Bank of Canada, Canada
Xuezhi Liu, Bank of Canada, Canada
Moez Souissi, Bank of Canada, Canada

Chapter 12
Sheri M. Markose, University of Essex, UK
Bewaji Oluwasegun, University of Essex, UK
Simone Giansante, University of Essex, UK
Chapter 13
Improving Long-Term Financial Risk Forecasts using High-Frequency Data and Scaling Laws 255
Wing Lon Ng, University of Essex, UK

Section 3
Agent-Based and-Other Simulation Approaches

Chapter 14
Optimal Patent Design: An Agent-Based Modeling Approach 280
Anthony Brabazon, University College Dublin, Ireland

Chapter 15
Modeling the FX Market Traders' Behavior: An Agent-Based Approach 303
Monira Aloud, University of Essex, UK
Edward Tsang, University of Essex, UK
Richard Olsen, University of Essex, UK

Chapter 16
Predicting Volatile Consumer Markets using Multi-Agent Methods: Theory and Validation 339
Abhijit Sengupta, Unilever Research and Development, UK
Stephen E. Glavin, Unilever Research and Development, UK

Chapter 17
Agent-Based Modeling of the El Farol Bar Problem 359
Shu-Heng Chen, National Chengchi University, Taiwan
Umberto Gostoli, National Chengchi University, Taiwan

Chapter 18
Simulation Analysis as a Way to Assess the Performance of Important Unit Root and Change in Persistence Tests 378
Raúl O. Fernández, Banco de Mexico, Mexico
J. Eduardo Vera-Valdés, Banco de Mexico, Mexico

Compilation of References 397
