<i>Foreword by Bernard Jullien</i>	xix
<i>Notes on the Contributors</i>	xxi
Introduction	1
Part I Innovative Design for Alternative Vehicles	
1 Innovative Design and Sustainable Development in the Automotive Industry <i>Giuseppe Calabrese</i>	13
2 Manufacturing Capability and the Architecture of Future Vehicles <i>Takahiro Fujimoto</i>	32
3 Industrial Designers and the Challenges of Sustainable Development <i>Monique Vervaeke</i>	49
4 Towards New R&D Processes for Sustainable Development in the Automotive Industry: Experiencing Innovative Design <i>Maria Elmquist and Blanche Segrestin</i>	69
Part II Technological Trajectories in Alternative Vehicles	
5 Balancing a Strong Strategic Intent and an Experimental Approach to Electric Vehicles <i>Florence Charue-Duboc and Christophe Midler</i>	89
6 'Sailing Ship Effects' in the Global Automotive Industry? Competition between 'New' and 'Old' Technologies in the Race for Sustainable Solutions <i>Dedy Sushandoyo, Thomas Magnusson and Christian Berggren</i>	103
7 Firm Perspectives on Hydrogen <i>Marc Dijk and Carlos Montalvo</i>	124
8 CNG Cars: Sustainable Mobility Is within Reach <i>Andrea Stocchetti and Giuseppe Volpato</i>	140

9	Institutional, Technological and Commercial Innovations in the Brazilian Ethanol and Automotive Industries <i>Marcos Amatucci and Eduardo Eugênio Spers</i>	164
10	New Forms of Vehicle Maker–Supplier Interdependence? The Case of Electric Motor Development for Heavy Hybrid Vehicles <i>Dedy Sushandoyo, Thomas Magnusson and Christian Berggren</i>	185
Part III Surrounding Conditions for the Development of Alternative Vehicles		
11	Electric Vehicles and Power Grids: Challenges and Opportunities <i>Ettore Bompard, Elena Ragazzi and Alberto Tenconi</i>	207
12	Agreements and Joint Ventures in the Electric Vehicle Industry <i>Giampaolo Vitali</i>	225
13	Business Model Innovation and the Development of the Electric Vehicle Industry in China <i>Hua Wang and Chris Kimble</i>	240
14	Urban Mobility as a Product of Systemic Change and the Greening of the Automotive Industry <i>Francesco Garibaldo</i>	254
15	A Forecasting Framework for Evaluating Alternative Vehicle Fuels, Using the Analytic Hierarchy Process Model and Scenarios <i>Tugrul Unsal Daim and Jubin Dilip Upadhyay</i>	263
16	Consumer Attitudes Towards Alternative Vehicles <i>Marc Dijk, Jorrit Nijhuis and Reinhard Madlener</i>	286
17	The Second Automotive Revolution Is Under Way: Scenarios in Confrontation <i>Michel Freyssenet</i>	304
	<i>Appendix: The GERPISA International Network</i>	323
	<i>Index</i>	327
