Accounting for R&D Investments According to IAS 38

And the Conflicting Forces that Shape Financial Accounting: An Empirical Analysis
# Table of Contents

Vorwort..................................................................................................................... V
Geleitwort.................................................................................................................... VII
Table of Contents ....................................................................................................... IX
List of Figures ............................................................................................................. XIV
List of Tables ............................................................................................................... XV
List of Abbreviations ................................................................................................. XVII
List of Symbols .......................................................................................................... XIX

1 Introduction and Overview.................................................................................. 1
   1.1 Introduction and Overview on the Thesis....................................................... 1
   1.2 The Key Characteristics and Relevance of R&D Investment ....................... 9
       1.2.1 The Relevance of Intangibles in the Information Economy .................... 9
       1.2.2 The Economic Properties of Intangible Investment ......................... 13
   1.3 Accounting for R&D Investments in Selected Regulatory Backgrounds 16

2 Related Literature: Empirical Research on Accounting for R&D .................. 23
   2.1 Accounting for R&D and the Relevance of Financial Accounting
       Information ........................................................................................................... 23
       2.1.1 Accounting for R&D and its Relevance for Equity Investors .......... 24
       2.1.2 Accounting for R&D and its Relevance for Debt Investors .......... 29
   2.2 Accounting for R&D and the Reliability of Financial Accounting
       Information ........................................................................................................... 30
       2.2.1 Accounting for R&D and Earnings Management Incentives .......... 31
       2.2.2 Accounting for R&D and the Uncertainty of Future Benefits .......... 33
   2.3 Summary of Related Literature and Contribution of the Thesis ............. 34
3 Research Question and Methodology ......................................................... 38

3.1 Research Question ................................................................................. 38

3.1.1 The Financial Objectives and Risk Characteristics of Capital Providers .................................................................................. 39

3.1.2 Accounting for R&D and the Information Needs of Capital Providers ......................................................................................... 41

3.1.3 Accounting for R&D According to IAS 38 ........................................ 45

3.2 Methodology .......................................................................................... 47

3.2.1 Overview: Empirical Financial Accounting Research ....................... 48

3.2.2 Capital Market-oriented Accounting Research ................................ 51

3.2.3 The Assumption of Efficient Capital Markets .................................... 52

3.2.4 Research Design of the Thesis ............................................................ 56

3.2.4.1 Balance Sheet and Earnings Model ............................................... 57

3.2.4.2 Ohlson (1995) Model .................................................................. 62

3.2.4.3 The Research Design of Kothari et al. (2002) .............................. 78

3.2.5 A Note on the Setting and the Data Sample ....................................... 82
4 The Value Relevance of Capitalized Development Costs According to IAS 38 in Germany: Evidence on Investors' Skepticism in a Continental European Setting ................................................................. 86

4.1 Introduction and Overview ........................................................................ 86
4.2 Accounting for R&D: Regulatory Background .......................................... 88
4.3 Related Literature and Hypothesis Development .................................... 89
  4.3.1 Related Literature .............................................................................. 89
  4.3.2 Hypothesis Development .................................................................. 92
4.4 Research Design ....................................................................................... 93
4.5 Sample Selection and Descriptive Statistics ............................................ 96
4.6 Empirical Results and Sensitivity Analysis .............................................. 101
  4.6.1 Empirical Evidence on Hypotheses H1 and H2 ................................. 101
  4.6.2 Sensitivity Analysis: What Drives the Results? ............................... 104
    4.6.2.1 Incremental Association Study ................................................... 104
    4.6.2.2 Relative Association Study ......................................................... 118
  4.6.3 Additional Robustness Tests .............................................................. 119
4.7 Discussion of the Results ......................................................................... 121
4.8 Summary and Conclusion of the Value Relevance Study ....................... 123
5 The Uncertainty of Future Benefits From R&D Capital – The Case of Capitalized Development Costs According to IAS 38

5.1 Introduction and Overview

5.2 The Risk-return Characteristics of R&D Investment: Implications for Financial Accounting

5.2.1 The Economic Properties of R&D Investment

5.2.2 Implications of the Inherent Uncertainty of R&D Investments for Financial Accounting and its Addressees

5.3 Related Literature and Hypothesis Development

5.3.1 Related Literature

5.3.2 Hypothesis Development

5.4 Research Design

5.5 Descriptive Statistics

5.6 Empirical Results

5.6.1 How Uncertain is R&D Capital?

5.6.2 Robustness Tests

5.7 Discussion of the Results

5.8 Summary and Conclusion of the Uncertainty Study
6 Evaluation of the Findings.................................................................................................................. 168

6.1 A Synthesis of the Findings on the Trade-off Between Relevance and the Uncertainty of Future Benefits............................................................... 168

6.1.1 Summary of Findings .................................................................................................................. 169

6.1.2 Discussion of the Findings on the Trade-off Between Relevance and the Uncertainty of Future Benefits ............................................................. 170

6.2 Contribution of the Findings to the Political Debate on Accounting for R&D According to IAS 38.............................................................................. 173

6.2.1 Insights on Arguments Against a Capitalization of Development Costs.................................................. 173

6.2.2 Insights on Arguments Supporting a Capitalization of Development Costs.................................. 176

6.3 The Negligence of the Contracting Role of Financial Accounting: A Limitation of the Thesis and an Avenue for Future Research...................... 181

6.3.1 The Contracting Role of Financial Accounting Information..................................................... 182

6.3.2 Contracting and Accounting Conservatism ................................................................................. 185

6.3.3 The Relationship Between Conservatism and Accounting for R&D............................................... 189

7 Concluding Remarks......................................................................................................................... 192

References ............................................................................................................................................. 195
