3 The spatial distribution of activities
   3.1 Introduction to industrial dispersal
   3.2 Firm dispersion: price discrimination, market areas, and distance costs
      3.2.1 Spatial pricing and price discrimination
      3.2.2 Reilly's law of market areas
      3.2.3 Linkage analysis and value-weight ratios
   3.3 Urban hierarchies and classical central place theory
      3.3.1 The Christaller approach to central places
      3.3.2 The Lösch approach to central places
   3.4 New economic geography (NEG)
   3.5 Empirical regularities of the urban system: the rank-size rule
   3.6 The structure and interpretation of regional data
   3.7 Conclusions
      Appendix 3.1 Spatial monopoly and price discrimination
      Appendix 3.2 The derivation of Reilly's law
      Appendix 3.3 The NEG model of the urban-regional economy
      Appendix 3.4 The Löschian demand function

4 The spatial structure of the urban economy
   4.1 Introduction
   4.2 The von Thunen model
      4.2.1 Land competition in the von Thunen model
   4.3 The bid-rent model for a firm
      4.3.1 Land competition in the industry bid-rent model
   4.4 The bid-rent model for a residential household
      4.4.1 Land competition in the household bid-rent model
      4.4.2 The treatment of environment in the household bid-rent model
   4.5 Alternative models of distance-land price convexity
   4.6 Critiques of urban economic models
      4.6.1 Monocentricity
      4.6.2 Land supply and land ownership
      4.6.3 The optimal size of a city
   4.7 Conclusions
      Appendix 4.1 The slope of the rent gradient in the von Thunen model
         Appendix 4.1.1 Distance to the edge of the von Thunen area of cultivation
         Appendix 4.1.2 Distance to a change of land use in the von Thunen model
      Appendix 4.2 The slope of the bid-rent curve
         Appendix 4.2.1 The relative income elasticities of the demand for land and accessibility in the bid-rent model
         Appendix 4.2.2 Environmental changes and bid-rent analysis
5 Regional specialization, trade, and multiplier analysis

5.1 Introduction

5.2 The economic base model

5.3 Identifying the basic and non-basic sectors
  5.3.1 The assumptions method
  5.3.2 Location quotients
  5.3.3 Choosing between the alternative economic base approaches

5.4 Keynesian regional multiplier

5.5 Comparing the economic base and Keynesian regional multipliers

5.6 Impact analysis

5.7 Regional input–output analysis
  5.7.1 Additional comments on regional input–output analysis

5.8 Conclusions

6 Regional and interregional labour market analysis

6.1 Introduction

6.2 Wages and labour markets
  6.2.1 A neoclassical approach
  6.2.2 A Keynesian approach

6.3 Regional labour markets, wage flexibility, and capital utilization

6.4 Regional labour market adjustment
  6.4.1 Regional capital adjustment

6.5 Wages and interregional labour migration
  6.5.1 The disequilibrium model of interregional labour migration
  6.5.2 The equilibrium model of interregional labour migration
  6.5.3 The endogenous human-capital model of migration
  6.5.4 Additional comments on wages and migration

6.6 Non-wage-related models of interregional migration
  6.6.1 The gravity model of migration
6.6.2 The life-cycle model of migration 223
6.7 Conclusions 223
Appendix 6.1 The Roback (1982)–Tiebout (1954) model of consumption 225
Appendix 6.2 The model of human capital 227
Appendix 6.3 The Roy (1951) model of migration 229

7 Regional growth, factor allocation, and balance of payments 234
7.1 Introduction 234
7.2 Neoclassical regional growth 235
  7.2.1 The one-sector model of regional factor allocation and migration 235
  7.2.2 The two-sector model of regional factor allocation and migration 240
  7.2.3 The relationship between the one-sector and the two-sector regional models 243
7.3 Regional growth accounting and production function analysis 247
7.4 Keynesian perspectives on regional growth and balance of payments 254
  7.4.1 The balance of payments approach to regional growth 255
  7.4.2 The Verdoorn law and cumulative causation 262
7.5 Convergent growth or divergent growth? 265
  7.5.1 Innovation and technological change 266
  7.5.2 Alternative notions of capital 268
  7.5.3 Institutions and social capital 269
7.6 Conclusions 271
Appendix 7.1 The Cobb–Douglas production function and growth accounting 272
Appendix 7.2 Proof of the relationship between wage growth and labour productivity growth in the Cobb–Douglas framework 274

Part II Globalization: Cities, Regions, and Economic Policy

8 Economic geography and economic history 279
8.1 Introduction to urbanization, industrialization, and globalization 279
8.2 Globalization, urbanization, industrialization: the sixteenth to the nineteenth century 282
8.3 Globalization, urbanization, and industrialization in the twentieth century 290
8.4 Recent features of urbanization and globalization 295
8.5 Modern globalization: global firms, global regions, and global cities 298
8.6 Conclusions 301

9 Cities and regions in the modern global economy 303
9.1 Introduction 303
9.2 Different types of spatial transactions costs 304
  9.2.1 Falling spatial transactions costs 305
  9.2.2 Rising spatial transactions costs 306
## Contents

- 9.3 Economic geography is spiky and uneven  
  - 9.3.1 Spatial equilibrium and geographical variations in productivity  
- 9.4 The economic performance of today's cities and regions  
  - 9.4.1 Scale and productivity in capital and dominant cities  
  - 9.4.2 Connectivity in capital and dominant cities  
- 9.5 Non-core regions, intermediate regions, and peripheral regions  
- 9.6 Conclusions  

**Appendix 9.1** Interpreting convergence–divergence considering the spatial units  
**Appendix 9.2** Interpreting cumulative regional growth patterns  

### 10 Modern urban and regional economic policy analysis

- 10.1 Introduction to the modern urban and regional policy context  
- 10.2 Urban economic policy  
  - 10.2.1 Urban zoning policies  
  - 10.2.2 Urban regeneration policies  
  - 10.2.3 Greenbelts  
- 10.3 Regional economic policy  
  - 10.3.1 Traditional regional policies  
  - 10.3.2 The project-based welfare effects of regional policy  
  - 10.3.3 The macroeconomic effects of regional policy  
- 10.4 New debates in regional policy  
  - 10.4.1 The space-blind approach  
  - 10.4.2 The place-based approach  
- 10.5 The differences between space-blind and place-based approaches  
  - 10.5.1 The interactions between geography and institutions  
  - 10.5.2 The nature of long-term development processes  
  - 10.5.3 The nature of national-regional decision-making processes  
  - 10.5.4 The intentions versus the outcomes of policies  
  - 10.5.5 Insights into the nature of regional and national development challenges  
    - 10.5.5.1 Different views regarding institutions and geography  
    - 10.5.5.2 Different views regarding historical urbanization–development processes  
    - 10.5.5.3 Different views regarding welfare provision and labour mobility  
- 10.6 Conclusions  

**Appendix 10.1** The value and (mis)pricing of places  
**Appendix 10.2** Space-blind approaches and the provision of welfare payments
