Dynamics of macroeconomic and financial variables in different time horizons

HYUNJOO KIM KARLSSON
Table of Contents

Part I Introduction to the thesis................................................................. 11
1 Introduction and Overview............................................................... 13
1.1. Motivation and Scope.................................................................... 13
1.2. Heterogeneity, market ecology and time-frequency analysis.... 16
1.3. Organization of the papers............................................................ 17
2. Exchange rate fluctuations and markup adjustments................. 19
    2.1. The law of one price (LOP)......................................................... 19
    2.2. Exchange rate pass-through (ERPT)............................................. 21
    2.3. Pricing-to-market (PTM)............................................................ 23
3. Theoretical frameworks for exchange rate determination .......... 25
    3.1. The flexible-price monetary model............................................ 25
    3.2. The Mundell-Flemming (M-F) model.......................................... 27
    3.3. The sticky-price monetary model.............................................. 28
    3.4. The portfolio balance model.................................................... 29
    3.5. The Redux model................................................................... 30
4. Asset pricing models, exchange rate exposure, and time
   varying parameters............................................................................ 33
5. Interdependence among national stock markets......................... 37
6. Outline of the papers and summary of main findings................. 39
   Paper 1: Exchange rate fluctuations and markup adjustments:
   Cases of manufacturing products exported from South Korea........ 39
   Paper 2: The relationship between exchange rates and interest rate
   differentials: A wavelet approach...................................................... 40
   Paper 3: Time-varying sensitivities of sectoral returns to market
   returns and exchange rate movements.............................................. 41
   Paper 4: Price linkages of the East Asian stock markets in different
   time horizons.................................................................................. 43
References......................................................................................... 46
Part II Collection of Papers ................................................................. 51

Paper 1 Exchange rate fluctuations and markup adjustments: Cases of manufacturing products exported from South Korea ........................................... 53

Paper 2 The Relationship between Exchange Rates and Interest Rate Differentials: a wavelet Approach ........................................................................ 85

Paper 3 Time-varying betas of sectoral returns to market returns and exchange rate movements ........................................................................ 117

Paper 4 Price linkages between the East Asia stock markets in different time horizons .................................................................................. 145

JIBS Dissertation Series .............................................................................. 179
