Preface xi

1. Introduction to Securities Trading and Markets

1.1 Trades, Traders, Securities, and Markets 1
   Trading Illustration 2
   Securities and Instruments 2

1.2 Securities Trading 4
   Algorithmic Trading: A Brief Introduction 5

1.3 Bargaining 6

1.4 Auctions 7
   Auction Outcomes 9
   Common Value Auctions 10
   Google's Dutch Auction Format 11

1.5 Introduction to Market Microstructure 11
   Market Execution Structures 12

1.6 Orders, Liquidity, and Depth 13

1.7 Day Trading 15
   Online Brokers and Direct Access Trading 16
   Trading Platforms 17
   Quotations and Price Data 18
   Trading Arcades 20

Additional Reading 21
References 21
1.8 Exercises 22

2. Financial Markets, Trading Processes, and Instruments

2.1 Exchanges and Floor Markets 25
   NYSE Euronext 25

2.2 The Way It Was 27
   National and Regional Exchanges 27
   Early Ancestors to Modern Exchanges 27
   Traditional New York Stock Exchange Structure 29
   Transforming the NYSE 30

2.3 Over-the-Counter Markets and Alternative Trading Systems 35
   Over-the-Counter Markets 36
   Alternative Trading Systems 37

2.4 The Decline of Brick and Mortar 40
   Electronic versus Open Outcry 42

2.5 Crossing Networks and Upstairs Markets 43
   Internalization 45

2.6 Quotation, Intermarket, and Clearing Systems 45
   Clearing and Settlement 46

2.7 Brokerage Operations 48

2.8 Fixed-Income Securities and Money Markets 49
   U.S. Treasury Securities and Markets 50
   Agency Issues 50
   Municipal Securities and Markets 52
   Financial Institution Instruments 52

2.9 Markets Around the World 57

2.10 Currency Exchange and Markets 58
   Exchange Rates 59
   Forward Exchange Rates and Contracts 60
   Futures Markets 62
   Currency Trading 62
   Interdealer Brokers and Electronic Broking 63
   Futures and Other FX Markets 63
   Orders, Quotes, and Spreads 64

Additional Reading 65
3. Institutional Trading

3.1 Institutions and Market Impact 67
3.2 Registered Investment Companies 68
   Managed Investment Company Types 68
   Managed Investment Company Fees and Structures 69
   ETFs 70
3.3 Unregistered Investment Companies 71
   Pension Funds 72
   Bank Trusts and Private Banking 72
   Private Equity 73
   Hedge Funds 73
   Rule 144A Markets 73
3.4 Best Execution, Execution Costs, and Price Improvement 74
   Illustration: Slippage and the Perfect Foresight Half Spread 76
3.5 Algorithmic Trading 77
   Algo Strategies 79
   Illustration: Slicing the Large Transaction 80
3.6 Dark Pools 81
3.7 Stealth And Sunshine Trading 82
3.8 High-Frequency Trading 84
   Latency Arbitrage 85
   HFT Strategies 86
3.9 Flash Trading And Sponsored Access 87
   Illustration: A Flash Trade 88
   Sponsored Access 88
Additional Reading 89
References 89
3.10 Exercises 90

4. Regulation of Trading and Securities Markets

4.1 Background and Early Regulation 93
   Regulatory Approaches 94
   Pre-1930s Securities Regulation: The Background 94
4.2 U.S. Securities Market Legislation: The Foundation 96
Additional Major Depression-Era Legislation 97

   Deregulation 101
   Sarbanes-Oxley 102
   Post-SOX 103
   The 2008 Financial Crisis 104
4.5 Dodd-Frank 104
   The Securities and Exchange Commission 106
   The Commodity Futures Trading Commission 107
4.7 Impact of Regulatory Activity 108
4.8 Regulation: The International Arena 110
   Selected Country Regulatory Authorities 111
4.9 Privatization of Regulation and Exchange Rules 111
   NYSE Rules 112
   NYSE Circuit Breakers 113
Additional Reading 113
References 114
4.10 Exercises 115

5. Adverse Selection, Trading, and Spreads

5.1 Information and Trading 117
   Adverse Selection 117
5.2 Noise Traders 118
5.3 Adverse Selection in Dealer Markets 119
   Kyle: Informed Traders, Market Makers, and Noise Traders 119
5.4 Adverse Selection and the Spread 127
   The Demsetz Immediacy Argument 127
CONTENTS

Glosten and Milgrom Information
   Asymmetry Model 128
The Stoll Inventory Model 128
The Copeland and Galai Options
   Model 130
Additional Reading 131
References 131
5.5 Exercises 132

6. Random Walks, Risk, and Arbitrage

6.1 Market Efficiency and Random Walks 135
   Random Walks and Submartingales 135
   Brownian Motion Processes 137
   Weiner Processes 138
6.2 Risk 138
   Historical Volatility Indicators 139
   Extreme Value Estimators 141
   Implied Volatilities 142
6.3 Arbitrage 144
   Pairs Trading and Stat-Arb 145
6.4 Limits to Arbitrage 146
Additional Reading 149
References 149
6.5 Exercises 150
6.A.1. Return and Risk Spreadsheet
   Applications 154
6.A.2. A Primer on Black-Scholes Option
   Pricing 156
   Calls and Puts 156
   The Black-Scholes Model 158
   Appendix Exercises 159
   Appendix Exercise Solutions 160
   Variances 160
   Simple Closed-Form Procedures 163
   Aggregating Procedures 164

7. Arbitrage and Hedging with Fixed
   Income Instruments and Currencies

7.1 Arbitrage with Riskless Bonds 165
7.2 Fixed Income Hedging 167
   Bond Yields and Sources of Risk 167
   Fixed Income Portfolio Dedication 169
7.3 Fixed Income Portfolio Immunization 170
   Bond Duration 171
   Portfolio Immunization 173
   Convexity 175
7.4 Term Structure, Interest Rate Contracts, and
   Hedging 177
   The Term Structure of Interest Rates 178
   Term Structure Estimation with Coupon
   Bonds 179
   Bootstrapping the Yield Curve 179
   Simultaneous Estimation of Discount
   Functions 182
7.5 Arbitrage with Currencies 184
   Triangular Arbitrage 184
   Purchase Power Parity, Arbitrage, and
   Hedging in FX Markets 185
7.6 Arbitrage and Hedging with Currency
   Forward Contracts 186
   Parity and Arbitrage in FX Markets 186
7.7 Hedging Exchange Exposure 190
Additional Reading 192
References 193
7.8 Exercises 193

8. Arbitrage and Hedging with Options

8.1 Derivative Securities Markets and
   Hedging 197
8.2 Put—Call Parity 199
   Illustration: Hedging with a Call, a Put, and
   a Collar 199
8.3 Options and Hedging in a Binomial
   Environment 200
   Extending the Binomial Model to Two
   Periods 203
   Extending the Binomial Model to n Time
   Periods 205
   Obtaining Multiplicative Upward and
   Downward Movement Values 206
   Binomial Model: An Illustration 207
8.4 The Greeks and Hedging in a Black-Scholes
   Environment 210
   Black-Scholes Model Sensitivities 211
   Illustration: Greeks Calculations for
   Calls 213
   Illustration: Hedging with Delta and
   Gamma Neutral Portfolios 214
   Put Sensitivities 215
8.5 Exchange Options 216
   Illustration: FX Option Valuation 217
8.6 Hedging Exchange Exposure with Currency Options 219
Additional Reading 220
References 220
8.7 Exercises 221
8.A.1. The Binomial Model: Additional Considerations 224
A Computationally More Efficient Version of the Binomial Model 224
Obtaining Multiplicative Upward and Downward Movement Values 225
8.A.2. Deriving the Black-Scholes Model 227

9.1 Evaluating Investment Portfolio Performance 231
Computing Net Asset Value and Returns 232
Net Asset Value and Returns Illustration 233
Portfolio Benchmarking 234
Portfolio Performance Benchmarking Illustration 236
9.2 Market Timing Versus Selection 237
The Quadratic Variable Approach 237
The Dummy Variable Approach 239
9.3 Trade Evaluation and Volume-Weighted Average Price 240
VWAP 241
VWAP: A Simple Illustration 242
9.4 Implementation Shortfall 243
Illustration: Implementation Shortfall 243
9.5 Value at Risk 244
Equity Portfolio VaR: Illustration 246
Additional Reading 246
References 247
9.6 Exercises 247

10. The Mind of the Investor 251
10.1 Rational Investor Paradigms 251
The St. Petersburg Paradox and the Expected Utility Paradigm 252
Von Neumann and Morgenstern: Axioms of Choice 253
10.2 Prospect Theory 255
Losses and Inconsistency 255
10.3 Behavioral Finance 258
The Monty Hall Judgment Error 258
Dumb, Dumber, and Dead 260
Myopia and Overreaction 261
Overconfidence, Gender, Entertainment, and Testosterone 268
Investor Moods, the Weather, and Investment Returns 270
Simplifying the Decision Process 271
Rational Investors and Diversification 271
10.4 Neurofinance: Getting Into The Investor’s Head 272
10.5 The Consensus Opinion: Stupid Investors, Smart Markets? 273
The Football Pool 274
Analyst Estimates 275
Rational Investors and Price Setting 275
Herds and Swarms 276
Additional Reading 277
References 277
10.6 Exercises 280

11. Market Efficiency 285
11.1 Introduction to Market Efficiency 285
11.2 Weak Form Efficiency 286
Price Sequences, Momentum and Mean Reversion 286
Relative Strength 288
Filter Rules and Market Overreaction 288
Moving Averages 289
The January Effect 290
The Small Firm and Price/Earnings Effects 292
The Initial Public Offering Anomaly 292
Sports Betting Markets 293
Summary 293
11.3 Testing Momentum and Mean Reversion Strategies 294
11.4 Semistrong Form Efficiency 296
Early Tests 297
Stock Splits 298
Corporate Merger Announcements, Annual Reports, and Other Financial Statements 299
