4.1.1 Problem Solving versus Kaizen (Improvement) ........................................ 60
4.2 Structured Problem Solving................................................................. 61
4.3 Toyota's Eight-Step Problem-Solving Methodology ........................................ 62
4.4 Human Problem-Solving Background ................................................ 65
4.5 Literature Review of Problem-Solving Methodologies ...................................... 67
4.6 Limitations with Problem-Solving Methodology Research ..................................... 74
4.7 Problem-Solving Theory and Core Thinking Skills ........................................... 75
4.8 Criteria for Evaluating Effective Cognitive Processes ........................................ 76
4.9 Applying Human Problem-Solving Theory to Toyota's Eight-Step Process ..................... 80
  4.9.1 Goal Clarity in A3 Thinking ..................................................................... 81
  4.9.2 Productive Thinking in A3 Thinking ...................................................... 82
4.10 Putting It All Together ............................................................................ 86
4.11 Summary ............................................................................................... 88
References ....................................................................................................... 88

Chapter 5 The System Property of Regulation in TPS ........................................ 91
  5.1 System Property: Regulation ...................................................................... 91
  5.2 The System Property of Regulation and the Toyota Production System ...................... 95
  5.3 Literature Review of Jishukens ................................................................... 97
  5.4 Literature Review of Quality Circles ........................................................ 97
  5.5 Using Quality Circles and Jishukens to Create a Shared Vision ......................... 99
  5.6 The Weakening and Strengthening of TPS using Shared Visions ......................... 102
  5.7 The Regulation Cycle of TPS .................................................................... 105
  5.8 Jishuken and Quality Circle Implementation Concepts .................................... 106
    5.8.1 Asking for Help and Promoting Waste Elimination ................................ 107
5.8.2 Starting Point for Workplace Improvement ................................................. 110
5.8.3 The Team Structure of Jishukens and Quality Circles .................................. 110
5.8.4 Significance of Roles in Management-Directed Activities ................................. 112
5.8.5 Support Functions in QCs and Jishukens ..................................................... 113
  5.8.5.1 Coach and Facilitate Problem Solving ...................................................... 113
  5.8.5.2 Jishukens and QCs Must Advance Stability through Standardization ............ 114
  5.8.5.3 Model the Company’s Approach to Work ................................................. 115
5.9 Summary ........................................................................................................... 116
References ............................................................................................................... 117

Chapter 6 The System Property of Differentiation in TPS .............................. 121
6.1 System Property: Differentiation ................................................................. 121
6.2 Toyota Production System and System Differentiation ............................... 123
6.3 Literature Review of Leadership ................................................................. 124
  6.3.1 The Distinction between Management and Leadership ............................. 125
6.4 Literature Review of Leadership Theory ....................................................... 127
6.5 Leadership Theory for TPS ............................................................................ 128
6.6 The What Function of TPS Leadership .......................................................... 129
6.7 The Why Function of TPS Leadership .......................................................... 134
6.8 The How Function of TPS Leadership ............................................................ 136
  6.8.1 What If Leadership Is Not on Board with Defining, Coaching, or Implementing Lean? .............................................................. 139
6.9 The Where Function of TPS Leadership ....................................................... 140
6.10 The When Function of TPS Leadership ....................................................... 141
6.11 Summary ....................................................................................................... 146
References ............................................................................................................ 147
8.10 Conversion Process: Matter–Energy Storage ........................................ 210
8.11 Summary .......................................................................................... 210
References .............................................................................................. 211

Chapter 9 The System Property of Entropy in TPS ............................... 215

9.1 System Property: Entropy ................................................................. 215
9.2 Entropy in Organizations ................................................................. 217
9.3 Entropy in the Toyota Production System ....................................... 219
9.4 Literature Review: The Human Resource Function ......................... 221
  9.4.1 Japanese Management Techniques in Human Resources .......... 222
  9.4.2 Japanese Management Practices and Toyota ............................ 225
9.5 Minimizing Entropy Using the Human Resource Function in TPS .... 225
9.6 Hygiene Theory and TPS: The Essential Needs of the Individual ........ 227
  9.6.1 Stable Employee Relations .......................................................... 228
  9.6.2 Fair Appraisal and Treatment ..................................................... 229
  9.6.3 Improve the Terms and Conditions of Employment .................. 232
  9.6.4 Workplace Communication ....................................................... 233
9.7 Motivation Theory and TPS: The Intrinsic Needs of the Individual ...... 235
  9.7.1 Decision Making ........................................................................ 238
  9.7.2 Teamwork ................................................................................. 239
  9.7.3 Workplace Competence .............................................................. 241
9.8 Summary ......................................................................................... 243
References ......................................................................................... 244

Chapter 10 The System Property of Reversibility in TPS ...................... 247

10.1 System Property: Reversibility ....................................................... 247
10.2 Minimizing Entropy in the Management and Labor Relationship (Reversibility) ................................................................. 249
10.3 Literature Review: The Birth of the Toyota Production System as a Union ................................................................. 251
## Chapter 10: The Influence of Labor on Lean Production

10.3.1 The Role of Trade Unions and the Human Resource Function in the United States

10.3.2 The Use of Lean in Human Resource Development

10.3.3 A Difficult Implementation of Lean in Union Environments in the United States

10.3.4 Union Problems and Lean Production in the Automotive Industry

10.3.5 A Successful Case of Lean Production in the Automotive Sector in a Union Environment

10.3.6 The Influence of Labor Unions in Japan on Lean Production

10.4 Internal Reversibility in TPS: A Union Perspective

10.4.1 Larger Employment Issues

10.5 External Reversibility in TPS: A Union Perspective

10.6 Summary

10.7 References

## Chapter 11: The System Property of Negative Entropy in TPS

11.1 System Property: Negative Entropy

11.2 Negative Entropy and the Toyota Production System

11.2.1 Exceptional Creativity, Mundane Creativity, and Lifelong Learning

11.3 Organizational Learning and Communication: Some Basic Similarities with TPS

11.4 Literature Review of Organizational Learning and Communication

11.5 Organizational Learning Theory

11.6 Connecting the Kaizen Mind

11.7 The Preferred Learning and Communication Style for the Kaizen Mind
