Contents

1 Volatility Processes .................................................. 1
  1.1 Brownian Motion .................................................. 1
  1.2 Geometric Brownian Motion ................................... 6
  1.3 Long-Time Behavior of Marginal Distributions ............ 8
  1.4 Ornstein–Uhlenbeck Processes .................................. 10
  1.5 Ornstein–Uhlenbeck Processes and Time-Changed Brownian Motions .................................................. 12
  1.6 Absolute Value of an Ornstein–Uhlenbeck Process ........ 13
  1.7 Squared Bessel Processes and CIR Processes ............... 14
  1.8 Squared Bessel Processes and Sums of the Squares of Independent Brownian Motions .................................................. 15
  1.9 Chi-Square Distributions ......................................... 17
  1.10 Noncentral Chi-Square Distributions ......................... 18
  1.11 Marginal Distributions of Squared Bessel Processes. Formulations .................................................. 22
  1.12 Laplace Transforms of Marginal Distributions ............ 23
  1.13 Marginal Distributions of Squared Bessel Processes. Proofs .................................................. 27
  1.14 Time-Changed Squared Bessel Processes and CIR Processes .................................................. 29
  1.15 Marginal Distributions of CIR Processes ................... 32
  1.16 Ornstein–Uhlenbeck Processes and CIR Processes ........ 34
  1.17 Notes and References ........................................... 35

2 Stock Price Models with Stochastic Volatility .................. 37
  2.1 Stochastic Volatility ............................................. 37
  2.2 Correlated Stochastic Volatility Models ..................... 38
  2.3 Hull–White, Stein–Stein, and Heston Models ............... 42
  2.4 Relations Between Stock Price Densities in Stein–Stein and Heston Models .................................................. 44
  2.5 Girsanov’s Theorem ............................................... 46
  2.6 Risk-Neutral Measures ............................................ 48
  2.7 Risk-Neutral Measures for Uncorrelated Hull–White Models .................................................. 52
