Chapter 1: Improving Targeting in Ghana: A Brief Overview ....................................................... 1
PART I: SYNTHESIS OF THE STUDY ................................................................................................... 7
Chapter 2: How Well Targeted Are Ghana’s Social Programs? ................................................... 9
   Introduction ........................................................................................................................................ 9
   Objective, Limits, and Structure of the Study ..................................................................................... 12
   Programs and Subsidies Well (or Potentially Well) Targeted to the Poor ..................................... 13
   Programs and Subsidies Relatively Evenly Distributed in the Population as a Whole .................. 16
   Programs and Subsidies Benefiting the Poor but Only to a Limited Extent .................................. 18
   Programs and Subsidies Benefiting Mostly the Nonpoor ................................................................. 20
   Choosing Indicators for Geographic Targeting .............................................................................. 21
   Comparing Geographic Targeting in Levels and in Changes Due to Shocks .............................. 25
   Comparing Geographic, Proxy Means-Testing, and Community-Based Targeting .................... 25
   Using Targeting Mechanisms for Non-State Providers of Services and Programs .................... 27
   Policy Recommendations ................................................................................................................. 28
PART II: ANALYSIS BY SOCIAL PROGRAM ...................................................................................... 31
Chapter 3: Principles of Targeting—A Brief Review .................................................................... 33
   Benefits of Targeting .......................................................................................................................... 33
   Costs of Targeting ............................................................................................................................. 34
   Measuring Targeting Performance .................................................................................................. 37
   Classifying Targeting Methods ....................................................................................................... 39
Chapter 4: A New Poverty Map for Ghana ...................................................................................... 42
   Objective of the Poverty Map ............................................................................................................. 42
   Methodology for the Construction of the Poverty Map ................................................................. 44
   Reliability of the Poverty Map Estimates .......................................................................................... 45
   Conclusion .......................................................................................................................................... 48
Chapter 5: A Food Insecurity Map for Ghana .................................................................................. 50
   Estimation of a Food Insecurity Map Based on Caloric Intake ...................................................... 50
   Reliability of the Food Insecurity Map Estimates ........................................................................... 52
   Alternative Measures of Food Security .............................................................................................. 55
   Conclusion .......................................................................................................................................... 58
Chapter 6: The Geographic Impact of Higher Food Prices in Ghana

Impact of Higher Food Prices on Poverty
Geographic Impact of the Increase in Food Prices
Conclusion

Chapter 7: Targeting Free School Uniforms in Ghana

Private Education Costs and School Uniforms
Targeting Performance Simulations for School Uniforms
Conclusion

Chapter 8: Simulating Conditional Cash Transfers for Education in Ghana

Conditional Cash Transfers: Mexico’s Experience
Simulating Conditional Cash Transfers for Ghana
Comparing Geographic Targeting and Proxy Means-Testing at the Regional Level
Conclusion

Chapter 9: Tax Cuts for Rice and Fertilizer Subsidies in Ghana

Who Benefits from Tax Cuts on Rice and Other Imported Foods?
Who Benefits from Subsidies for Fertilizers?
Comparing Rice Tax Cuts and Fertilizer Subsidies Using CD Curves
Medium Term Effects: Comparing Rice Tax Cuts with Agricultural Productivity Gains
Conclusion

Chapter 10: Electricity Subsidies in Ghana

Issues with Maintaining Electricity Residential Consumption Subsidies
Do the Poor Benefit from Inverted Block Tariff Structures?
Connection Subsidies as an Alternative to Consumption Subsidies
Conclusion

Chapter 11: Benefit Incidence of Public Education Spending in Ghana

Principles of Benefit Incidence Analysis
Data on Public Spending for Education and Estimation of Unit Costs of Schooling
Results from the Benefit Incidence Analysis
Conclusion

Chapter 12: Targeting Performance of School Lunches in Ghana

School Lunches: Outlays in Ghana and Lessons from International Experience
District-Level Targeting Performance
Conclusion

Chapter 13: National Health Insurance Scheme in Ghana

Description of the National Health Insurance Scheme
Benefit Incidence of NHIS Subsidies in 2005–06
Benefit Incidence of NHIS in 2007 and 2008 ................................................................. 119
Assessment of the Indigent Provision in the NHIS .................................................... 120
Conclusion .................................................................................................................. 121

Chapter 14: Ghana’s Livelihood Empowerment Against Poverty ............................ 122
Design and Targeting Mechanism of LEAP .............................................................. 122
Targeting Performance of LEAP ................................................................................. 124
Scope for an Expansion of LEAP ............................................................................... 128
Cost Effectiveness of LEAP ....................................................................................... 130
Using a Common Targeting Mechanism for Multiple Programs: Chile’s Experience .. 131
Conclusion .................................................................................................................. 133

Chapter 15: Ghana’s National Youth Employment Program ..................................... 134
Youth Unemployment and Underemployment .......................................................... 134
Brief Description of NYEP ......................................................................................... 136
Assessment of the Likely Targeting Performance of NYEP .................................... 139
Assessment of the Likely Poverty Impact of NYEP .................................................. 145
Conclusion .................................................................................................................. 146

Chapter 16: Simulating Labor Intensive Public Works in Ghana ............................... 147
Labor Intensive Public Works: A Brief Review ......................................................... 147
Assessment of the Likely Targeting Performance and Poverty Impact of Public Works .................................................................................................................. 150
Comparison with Other Countries .............................................................................. 156
Conclusion .................................................................................................................. 157
