   To what are prices attached? 43
   General theory 43
   Costs 45
      Retail accounts 45
   Revenue 49
   Constraints on pricing 49
   Conditions of less constraint 50
      What do customers want? 51
      Elasticity of demand 53
   What actually happens 54
CONTENTS

At the top level 54
At the buyer’s level 56

5. Assortment
General remarks 58
Merchandise planning 59
Range of customers 59
Range of shops 61
Range of departments 62
Customer’s viewpoint 64
The buyer’s range 65
Types of full assortment 66
Merchandising rhythms 67
Inclusion and exclusion of items 68
Managing the stock 68
Relations with suppliers 68
Inventory management 70

6. Transport and Storage
What transport and storage try to do 74
Loading and unloading 76
Number and location of warehouses 78
Primitive arrangements 78
The three-stage pattern 79
Models for locating warehouses 80
Cash-and-carry warehouses 81
Methods of integration 81
Miscellaneous wholesalers 84

7. Location of Shops
How problems arise 86
Movement to and from shops 89
Attractiveness of shops 91
Suggestions for measurement 91
Policy parameters 92
Shared facilities 93
Organic developments 95
Honeycomb patterns and hierarchies 95
Central shopping areas 96
Planned developments 98
First model 100
Second model 100
Second stage of models 101

8. Economic Use of a Site
Temporal use of a site 103
CONTENTS

Adjusting to peaks and troughs 104
Spatial use of a site 106
The site as a whole 106
The building 107
Display windows 108
Non-selling areas 109
Selling areas 109
Spatial use of the department 111
Storage and inspection of merchandise 111
Modern fixtures versus counters 112

9. Services
Terminology 114
Disconnected services 114
Attention-services 115
Display 116
Advertising 116
Advertisers and the public 117
The right quantity of advertising 119
Promotion 120
Negotiation-services 121
Transaction-services 121

10. Use of People
Statistical position 124
Demand 125
Peculiarities of the work 125
Functions and ranks 126
Shift working, queue formation 128
Mechanization 129
Supply 130
The self-employed 130
Professionals and casuals 131
Adjustment of supply and demand 132
Pay and fringe benefits 132
Moral factors 134

11. Finance
Approach to the subject 136
Financial events 137
Revenue budgeting 137
Cash flow 138
Capital budgeting 139
Financial states 141
Assets 141
CONTENTS

Liabilities 142
Yields 143
The four issues 143
Owning or renting 143
Customers' debts 144
Prompt payment 144
Loan and preference capital 145
Strategic model 145
The ultimate criterion 147

12. Summary in Economists' Categories
Commodities 150
Competition 151
Average revenue and cost curves 151
Marginal revenue and cost 152
The firm or establishment 153

First Statistical Exhibit (Census of Distribution, 1966) 155
Second Statistical Exhibit (Wholesale Trade Inquiry, 1965) 156

Index, with bibliographical details and notes on firms, etc. referred to in the text 159
