Irwin

CONTENTS

▣ PART I SOME PRELIMINARIES 1

CHAPTER 1 Managers, Profits, and Markets 2

- 1.1 The Economic Way of Thinking About Business Practices and Strategy 3
 - Economic Theory Simplifies Complexity 3
 - The Roles of Microeconomics and Industrial Organization 5
- 1.2 Measuring and Maximizing Economic Profit 8
 - Economic Cost of Using Resources 8
 - Economic Profit versus Accounting Profit 12
 - Maximizing the Value of the Firm 15
 - The Equivalence of Value Maximization and Profit Maximization 16
 - Some Common Mistakes Managers Make 17
- 1.3 Separation of Ownership and Control 20
 - The Principal-Agent Problem 21
 - Corporate Control Mechanisms 24
- 1.4 Market Structure and Managerial Decision Making 25
 - What Is a Market? 26
 - Different Market Structures 26
 - Globalization of Markets 28
- 1.5 Summary 30
 - Key Terms 31
 - Technical Problems 31
 - Applied Problems 32
 - Mathematical Appendix: Review of Present Value Calculations 34
 - Mathematical Exercises 36

CHAPTER 2 Demand, Supply, and Market Equilibrium 37

- 2.1 Demand 38
 - The General Demand Function:
 $Q_d = f(P, M, P_R, T, P_e, N)$ 39
 - Direct Demand Functions: $Q_d = f(P)$ 43
 - Inverse Demand Functions: $P = f(Q_d)$ 45
 - Movements along Demand 46
 - Shifts in Demand 47

- 2.2 Supply 50
 - The General Supply Function:
 $Q_s = f(P, P_f, P_r, T, P_e, F)$ 51
 - Direct Supply Functions: $Q_s = f(P)$ 54
 - Inverse Supply Functions: $P = f(Q_s)$ 55
 - Shifts in Supply 57
- 2.3 Market Equilibrium 58
- 2.4 Measuring the Value of Market Exchange 61
 - Consumer Surplus 62
 - Producer Surplus 64
 - Social Surplus 64
- 2.5 Changes in Market Equilibrium 66
 - Changes in Demand (Supply Constant) 66
 - Changes in Supply (Demand Constant) 67
 - Simultaneous Shifts in Both Demand and Supply 68
 - Predicting the Direction of Change in Airfares: A Qualitative Analysis 72
 - Advertising and the Price of Milk: A Quantitative Analysis 73
- 2.6 Ceiling and Floor Prices 74
- 2.7 Summary 76
 - Key Terms 77
 - Technical Problems 77
 - Applied Problems 83

CHAPTER 3 Marginal Analysis for Optimal Decisions 86

- 3.1 Concepts and Terminology 88
- 3.2 Unconstrained Maximization 89
 - The Optimal Level of Activity (A^*) 89
 - Marginal Benefit and Marginal Cost 93
 - Finding Optimal Activity Levels with Marginal Analysis 95
 - Maximization with Discrete Choice Variables 97
 - Sunk Costs, Fixed Costs, and Average Costs Are Irrelevant 99
- 3.3 Constrained Optimization 101
 - Marginal Benefit per Dollar Spent on an Activity 101
 - Constrained Maximization 102
 - Optimal Advertising Expenditures: An Example of Constrained Maximization 104
 - Constrained Minimization 105

- 3.4 Summary 108
 - Key Terms 108
 - Technical Problems 108
 - Applied Problems 113
 - Mathematical Appendix: A Brief Presentation of Optimization Theory 116
 - Mathematical Exercises 118

CHAPTER 4 Basic Estimation Techniques 120

- 4.1 The Simple Linear Regression Model 121
 - A Hypothetical Regression Model 122
 - The Random Error Term 122
- 4.2 Fitting a Regression Line 124
- 4.3 Testing for Statistical Significance 128
 - The Relative Frequency Distribution for \hat{b} 129
 - The Concept of a t -Ratio 130
 - Performing a t -Test for Statistical Significance 131
 - Using p -Values to Determine Statistical Significance 133
- 4.4 Evaluation of the Regression Equation 134
 - The Coefficient of Determination (R^2) 135
 - The F -Statistic 136
 - Controlling Product Quality at SLM: A Regression Example 137
- 4.5 Multiple Regression 140
 - The Multiple Regression Model 140
- 4.6 Nonlinear Regression Analysis 140
 - Quadratic Regression Models 141
 - Log-Linear Regression Models 145
- 4.7 Summary 148
 - Key Terms 149
 - Technical Problems 149
 - Applied Problems 153
 - Statistical Appendix: Problems Encountered in Regression Analysis 156

PART II DEMAND ANALYSIS 159

CHAPTER 5 Theory of Consumer Behavior 160

- 5.1 Basic Assumptions of Consumer Theory 161
 - The Consumer's Optimization Problem 161
 - Properties of Consumer Preferences 161
 - The Utility Function 163
- 5.2 Indifference Curves 164
 - Marginal Rate of Substitution 165
 - Indifference Maps 167
 - A Marginal Utility Interpretation of MRS 167

- 5.3 The Consumer's Budget Constraint 170
 - Budget Lines 170
 - Shifting the Budget Line 173
- 5.4 Utility Maximization 174
 - Maximizing Utility Subject to a Limited Income 174
 - Marginal Utility Interpretation of Consumer Optimization 177
 - Finding the Optimal Bundle of Hot Dogs and Cokes 180
- 5.5 Individual Demand and Market Demand Curves 181
 - An Individual Consumer's Demand Curve 181
 - Market Demand and Marginal Benefit 182
- 5.6 Corner Solutions 185
- 5.7 Summary 186
 - Key Terms 187
 - Technical Problems 187
 - Applied Problems 194
 - Mathematical Appendix: A Brief Presentation of Consumer Theory 195
 - Mathematical Exercises 197

Online Appendix 1: Substitution and Income Effects of a Price Change

CHAPTER 6 Elasticity and Demand 198

- 6.1 The Price Elasticity of Demand 200
 - Predicting the Percentage Change in Quantity Demanded 201
 - Predicting the Percentage Change in Price 201
- 6.2 Price Elasticity and Total Revenue 202
 - Price Elasticity and Changes in Total Revenue 202
 - Changing Price at Borderline Music Emporium: A Numerical Example 204
- 6.3 Factors Affecting Price Elasticity of Demand 205
 - Availability of Substitutes 205
 - Percentage of Consumer's Budget 206
 - Time Period of Adjustment 206
- 6.4 Calculating Price Elasticity of Demand 207
 - Computation of Elasticity over an Interval 208
 - Computation of Elasticity at a Point 208
 - Elasticity (Generally) Varies along a Demand Curve 212
- 6.5 Marginal Revenue, Demand, and Price Elasticity 214
 - Marginal Revenue and Demand 214
 - Marginal Revenue and Price Elasticity 218
- 6.6 Other Demand Elasticities 219
 - Income Elasticity (E_M) 220
 - Cross-Price Elasticity (E_{XR}) 221
- 6.7 Summary 224
 - Key Terms 226

Technical Problems	226
Applied Problems	232
Mathematical Appendix: Demand Elasticity	233
Mathematical Exercises	235

CHAPTER 7 Demand Estimation and Forecasting 236

7.1 Direct Methods of Demand Estimation	238
Consumer Interviews	238
Market Studies and Experiments	241
7.2 Specification of the Empirical Demand Function	242
A General Empirical Demand Specification	242
A Linear Empirical Demand Specification	243
A Nonlinear Empirical Demand Specification	244
Choosing a Demand Specification	244
7.3 Estimating Demand for a Price-Setting Firm	246
Estimating the Demand for a Pizza Firm: An Example	247
7.4 Time-Series Forecasts of Sales and Price	251
Linear Trend Forecasting	252
A Sales Forecast for Terminator Pest Control	253
A Price Forecast for Georgia Lumber Products	254
7.5 Seasonal (or Cyclical) Variation	255
Correcting for Seasonal Variation by Using Dummy Variables	256
The Dummy-Variable Technique: An Example	258
7.6 Some Final Warnings	262
7.7 Summary	267
Key Terms	268
Technical Problems	268
Applied Problems	271
Mathematical Appendix: Empirical Elasticities	273
Data Appendix: Data for Checkers Pizza	274

Online Appendix 2: Estimating and Forecasting Demand for Price-Taking Firms

■ PART III PRODUCTION AND COST ANALYSIS 275

CHAPTER 8 Production and Cost in the Short Run 276

8.1 Some General Concepts in Production and Cost	277
Production Functions	278
Technical and Economic Efficiency	279
Inputs in Production	280
Short-Run and Long-Run Production Periods	281
Sunk Costs versus Avoidable Costs	282
8.2 Production in the Short Run	284
Total Product	284

Average and Marginal Products	286
Law of Diminishing Marginal Product	288
Changes in Fixed Inputs	289
8.3 Short-Run Costs of Production	292
Short-Run Total Costs	293
Average and Marginal Costs	296
General Short-Run Average and Marginal Cost Curves	297
8.4 Relations Between Short-Run Costs and Production	299
Total Costs and the Short-Run Production Function	299
Average Variable Cost and Average Product	300
Marginal Cost and Marginal Product	301
The Graphical Relation between <i>AVC</i> , <i>SMC</i> , <i>AP</i> , and <i>MP</i>	302
8.5 Summary	304
Key Terms	305
Technical Problems	305
Applied Problems	309
Mathematical Appendix: Short-Run Production and Cost Relations	311
Mathematical Exercises	312

CHAPTER 9 Production and Cost in the Long Run 313

9.1 Production Isoquants	315
Characteristics of Isoquants	315
Marginal Rate of Technical Substitution	316
Relation of <i>MRTS</i> to Marginal Products	317
9.2 Isocost Curves	318
Characteristics of Isocost Curves	318
Shifts in Isocost Curves	319
9.3 Finding the Optimal Combination of Inputs	320
Production of a Given Output at Minimum Cost	321
The Marginal Product Approach to Cost Minimization	323
Production of Maximum Output with a Given Level of Cost	324
9.4 Optimization and Cost	326
An Expansion Path	327
The Expansion Path and the Structure of Cost	328
9.5 Long-Run Costs	329
Derivation of Cost Schedules from a Production Function	329
9.6 Forces Affecting Long-Run Costs	334
Economies and Diseconomies of Scale	334
Reasons for Scale Economies and Diseconomies	335
Constant Costs: Absence of Economies and Diseconomies of Scale	337
Minimum Efficient Scale (<i>MES</i>)	338
Economies of Scope in Multiproduct Firms	340

Multiproduct Cost Functions and Scope Economies	340
Reasons for Economies of Scope	343
Purchasing Economies of Scale	346
Learning or Experience Economies	347
9.7 Relations Between Short-Run and Long-Run Costs	349
Long-Run Average Cost as the Planning Horizon	349
Restructuring Short-Run Costs	351
9.8 Summary	353
Key Terms	354
Technical Problems	354
Applied Problems	359
Mathematical Appendix: Production and Cost Relations with Two Variable Inputs	361
Mathematical Exercises	363

CHAPTER 10 Production and Cost Estimation 365

10.1 Specification of the Short-Run Production Function	366
10.2 Estimation of a Short-Run Production Function	368
10.3 Short-Run Cost Estimation: Some Problems with Measuring Cost	372
Correcting Data for the Effects of Inflation	372
Problems Measuring Economic Cost	373
10.4 Estimation of a Short-Run Cost Function	374
Estimation of Typical Short-Run Costs	375
Estimation of Short-Run Costs at Rockford Enterprises: An Example	377
10.5 Summary	380
Key Terms	381
Technical Problems	381
Applied Problems	382
Mathematical Appendix: Empirical Production and Cost Relations	384
Mathematical Exercises	390

Online Appendix 3: Linear Programming

■ PART IV PROFIT MAXIMIZATION IN VARIOUS MARKET STRUCTURES 391

CHAPTER 11 Managerial Decisions in Competitive Markets 392

11.1 Characteristics of Perfect Competition	394 ¹
11.2 Demand Facing a Price-Taking Firm	395
11.3 Profit Maximization in the Short Run	397
The Output Decision: Earning Positive Economic Profit	398
The Output Decision: Operating at a Loss or Shutting Down	403
The Irrelevance of Sunk Costs, Fixed Costs, and Average Costs	407

Short-Run Supply for the Firm and Industry	409
Producer Surplus and Profit in Short-Run Competitive Equilibrium	410
11.4 Profit Maximization in the Long Run	412
Profit-Maximizing Equilibrium for the Firm in the Long Run	412
Long-Run Competitive Equilibrium for the Industry	413
Long-Run Supply for a Perfectly Competitive Industry	415
Economic Rent and Producer Surplus in Long-Run Equilibrium	420
11.5 Profit-Maximizing Input Usage	423
Marginal Revenue Product and the Hiring Decision	423
Average Revenue Product and the Shutdown Decision	426
11.6 Implementing the Profit-Maximizing Output Decision	427
General Rules for Implementation	427
Profit Maximization at Beau Apparel: An Illustration	429
11.7 Summary	435
Key Terms	436
Technical Problems	436
Applied Problems	441
Mathematical Appendix: Profit Maximization for Price-Taking Firms	445

CHAPTER 12 Managerial Decisions for Firms with Market Power 448

12.1 Measurement of Market Power	450
Market Definition	451
Elasticity of Demand	452
The Lerner Index	452
Cross-Price Elasticity of Demand	453
12.2 Barriers to Entry	453
Economies of Scale	457
Barriers Created by Government	457
Essential Input Barriers	458
Brand Loyalties	458
Consumer Lock-In	459
Network Externalities (or Network Effects)	459
Sunk Costs as a General Barrier to Entry	461
12.3 Profit Maximization Under Monopoly: Output and Pricing Decisions	462
Demand and Marginal Revenue for a Monopolist	463
Maximizing Profit at Southwest Leather Designs: An Example	464
Short-Run Equilibrium: Profit Maximization or Loss Minimization	466
Long-Run Equilibrium	471

- 12.4 Profit-Maximizing Input Usage 473
- 12.5 Monopolistic Competition 476
 - Short-Run Equilibrium 477
 - Long-Run Equilibrium 477
- 12.6 Implementing the Profit-Maximizing Output and Pricing Decision 480
 - General Rules for Implementation 482
 - Maximizing Profit at Aztec Electronics: An Example 484
- 12.7 Multiplant Firms 488
 - Multiplant Production at Mercantile Enterprises 489
- 12.8 Summary 493
 - Key Terms 494
 - Technical Problems 494
 - Applied Problems 501
 - Mathematical Appendix: Profit Maximization for a Monopoly 505

CHAPTER 13 Strategic Decision Making in Oligopoly Markets 508

- 13.1 Decision Making When Rivals Make Simultaneous Decisions 510
 - The Prisoners' Dilemma 513
 - Decisions with One Dominant Strategy 516
 - Successive Elimination of Dominated Strategies 517
 - Nash Equilibrium: Making Mutually Best Decisions 519
 - Super Bowl Advertising: An Example of Nash Equilibrium 522
 - Best-Response Curves and Continuous Decision Choices 524
- 13.2 Strategy When Rivals Make Sequential Decisions 530
 - Making Sequential Decisions 531
 - First-Mover and Second-Mover Advantages 533
 - Strategic Moves: Commitments, Threats, and Promises 536
- 13.3 Cooperation in Repeated Strategic Decisions 538
 - One-Time Prisoners' Dilemma Decisions 539
 - Punishment for Cheating in Repeated Decisions 541
 - Deciding to Cooperate 542
 - Trigger Strategies for Punishing Cheating 543
 - Pricing Practices That Facilitate Cooperation 544
 - Explicit Price-Fixing Agreements and Cartels 547
 - Tacit Collusion 552
- 13.4 Strategic Entry Deterrence 553
 - Limit Pricing 553
 - Capacity Expansion as a Barrier to Entry 557
- 13.5 Summary 559
 - Key Terms 560
 - Technical Problems 561

- Applied Problems 565
- Mathematical Appendix: Derivation of Best-Response Curves for Continuous Simultaneous Decisions 569
- Mathematical Exercises 572

PART V ADVANCED TOPICS IN MANAGERIAL ECONOMICS 575

CHAPTER 14 Advanced Pricing Techniques 576

- 14.1 Price Discrimination: Capturing Consumer Surplus 577
 - The Trouble with Uniform Pricing 577
 - Types of Price Discrimination 579
 - Conditions for Profitable Price Discrimination 580
- 14.2 First-Degree (or Perfect) Price Discrimination 581
- 14.3 Second-Degree Price Discrimination Methods 584
 - Two-Part Pricing 585
 - Declining Block Pricing 593
- 14.4 Third-Degree Price Discrimination 595
 - Allocation of Sales in Two Markets to Maximize Revenue 595
 - Profit Maximization with Third-Degree Price Discrimination 598
- 14.5 Pricing Practices for Multiproduct Firms 603
 - Pricing Multiple Products Related in Consumption 604
 - Bundling Multiple Products 607
- 14.6 Cost-Plus Pricing 610
 - Practical and Conceptual Shortcomings 611
- 14.7 Summary 615
 - Key Terms 616
 - Technical Problems 616
 - Applied Problems 619
 - Mathematical Appendix: Two-Part Pricing with Two Identical Groups of Buyers 623

Online Appendix 4: Pricing Multiple Products Related in Production

CHAPTER 15 Decisions Under Risk and Uncertainty 625

- 15.1 Distinctions Between Risk and Uncertainty 626
- 15.2 Measuring Risk with Probability Distributions 627
 - Probability Distributions 627
 - Expected Value of a Probability Distribution 629
 - Dispersion of a Probability Distribution 629
- 15.3 Decisions Under Risk 632
 - Maximization of Expected Value 632

	Mean–Variance Analysis	634
	Coefficient of Variation Analysis	635
	Which Rule Is Best?	635
15.4	Expected Utility: A Theory of Decision Making Under Risk	637
	A Manager’s Utility Function for Profit	638
	Deriving a Utility Function for Profit	639
	Maximization of Expected Utility	642
15.5	Decisions Under Uncertainty	645
	The Maximax Criterion	645
	The Maximin Criterion	647
	The Minimax Regret Criterion	648
	The Equal Probability Criterion	648
15.6	Summary	649
	Key Terms	650
	Technical Problems	651
	Applied Problems	653
	Mathematical Appendix: Decisions Under Risk	655

CHAPTER 16 Government Regulation of Business 656

16.1	Market Competition and Social Economic Efficiency	658
	Efficiency Conditions for Society	658
	Social Economic Efficiency Under Perfect Competition	659
16.2	Market Failure and the Case for Government Intervention	662
16.3	Market Power and Public Policy	664
	Market Power and Allocative Inefficiency	664
	Market Power and Deadweight Loss	665
	Promoting Competition through Antitrust Policy	667

	Natural Monopoly and Market Failure	668
	Regulating Price Under Natural Monopoly	670
16.4	The Problem of Negative Externality	673
	Pollution: Market Failure and Regulation	676
16.5	Nonexcludability	684
	Common Property Resources	684
	Public Goods	686
16.6	Information and Market Failure	688
	Imperfect Information about Prices	688
	Imperfect Information about Product Quality	689
	Information as a Public Good	690
16.7	Summary	692
	Key Terms	693
	Technical Problems	694
	Applied Problems	700

Web Chapter 1: The Investment Decision
