<b>Introduction and Overview</b> <i>Joël Hellier</i>	1
<b>Part I Where Do We Stand? Why Is It So?</b>	11
<b>1 Growing Income Inequalities in Advanced Countries</b> <i>Nathalie Chusseau and Michel Dumont</i>	13
1.1 Introduction	13
1.2 Stylized facts	14
1.2.1 Growing wage inequality	15
1.2.2 Growing income inequality	16
1.2.3 Globalization and North–South trade	18
1.2.4 A major technological change	20
1.2.5 Changes in labour market institutions: more flexibility	20
1.2.6 Changes in the labour supply: a general skill upgrading	20
1.3 The demand–supply–institution framework	22
1.4 The three explanations and their empirical relevance	24
1.4.1 North–South trade and globalization	25
1.4.2 Exogenous skill-biased technological change	32
1.4.3 Changes in (labour market) institutions	34
1.4.4 Taxes	36
1.5 Combined explanations	36
1.5.1 Trade-induced technological change	37
1.5.2 Skill supply-induced technological change	37
1.5.3 Institution-induced technological change	38
1.5.4 Technology-induced offshoring	38
1.5.5 Labour market polarization and trade-in-tasks models	39
1.6 Concluding remarks	40

<b>2</b>	<b>Inequality in Emerging Countries</b>	<b>48</b>
	<i>Nathalie Chusseau and Joël Hellier</i>	
2.1	Introduction	48
2.2	Inequality in emerging countries: what the data say	50
2.2.1	Asian countries	50
2.2.2	Latin America	52
2.2.3	Other emerging countries	53
2.2.4	An inconclusive diagnosis	54
2.3	Traditional explanations: Kuznets versus Heckscher–Ohlin	55
2.3.1	Kuznets' prediction: the inverted-U inequality curve	55
2.3.2	The HOS prediction: decreasing inequality	56
2.3.3	The combination of both explanations	57
2.4	New explanations	58
2.4.1	The cornering of new skill-intensive goods	58
2.4.2	Technological transfers	59
2.4.3	Changes in the sectoral structure with non-tradable goods	60
2.4.4	FDI and capital imports from the North	61
2.4.5	Intermediate emerging countries	62
2.4.6	Growing South and technological catching up	62
2.4.7	Assessment	63
2.5	Empirical evidence	64
2.5.1	Methods	64
2.5.2	Assessing the Kuznets hypothesis	66
2.5.3	Overall estimations	66
2.5.4	Asian countries	68
2.5.5	Latin America	70
2.5.6	Other countries	70
2.6	Conclusion	71
<b>3</b>	<b>The Working Poor</b>	<b>76</b>
	<i>Ekaterina Kalugina</i>	
3.1	Introduction	76
3.2	The working poor: definitions	78
3.2.1	Poverty and activity	78
3.2.2	The two-level definition of in-work poverty	80
3.2.3	American versus European definition	80

3.3	Empirical analyses: data and methods	82
3.3.1	Data	83
3.3.2	Methods	84
3.3.3	Magnitude of in-work poverty	86
3.4	The main characteristics of the working poor	86
3.4.1	Professional characteristics	87
3.4.2	Personal characteristics	89
3.4.3	Family characteristics	91
3.4.4	Institutional and country characteristics	92
3.4.5	A synthesis	94
3.5	Conclusions and policy implications	94
<b>Part II Globalization, Technical Change and Inequality</b>		<b>105</b>
4	<b>The North-South HOS Model, Inequality and Globalization</b>	<b>107</b>
	<i>Joël Hellier</i>	
4.1	Introduction	107
4.2	Globalization and inequality: stylized facts	109
4.3	The traditional NS-HOS model and its shortfalls	110
4.3.1	The NS-HOS model	110
4.3.2	Stylized facts against the NS-HOS model	112
4.4	The NS-HOS model outside the diversification cone	114
4.4.1	The diversification cone	114
4.4.2	Globalization	115
4.4.3	The three stages of globalization, specialization and inequality	117
4.5	Wage rigidity	121
4.5.1	Minimum wage in the HOS model: the Davis approach and extensions	121
4.5.2	Efficiency wages in the HOS approach	123
4.6	Technological differences and technical change	124
4.6.1	A productivity gap identical in both sectors	125
4.6.2	Productivity catching-up	126
4.6.3	Technological transfer	127
4.6.4	Technological bias	128
4.7	International outsourcing	129
4.7.1	Segmentation and international outsourcing: definitions	129
4.7.2	Segmentation in the NS-HOS model	130
4.7.3	Factor intensities	132

4.8	Further extensions	133
4.8.1	Factor dynamics in the HOS model	134
4.8.2	The impact of skill upgrading	136
4.8.3	Capital-skill complementarity	136
4.8.4	The NS-HOS model with a continuum of goods	137
4.9	General assessment and conclusion	139
<b>5</b>	<b>Is there a Trade-off between Wage Inequality and Unemployment?</b>	<b>147</b>
	<i>Michel Dumont</i>	
5.1	Introduction	147
5.2	Inequality and unemployment: some of the facts	148
5.3	Theoretical arguments	153
5.3.1	The basic theoretical framework	153
5.3.2	Firing costs and minimum wage	154
5.3.3	Matching and frictional unemployment	157
5.3.4	Efficiency wages	160
5.3.5	Cross-country differences	160
5.4	Empirical evidence	162
5.4.1	The unemployment-inequality relationship	162
5.4.2	Effects of institutions on inequality and unemployment taken separately	165
5.4.3	Combined impact of institutions on inequality and unemployment	166
5.5	Conclusion	168
	<b>Part III Inequality, Institutions and the Labour Markets</b>	<b>173</b>
<b>6</b>	<b>Growing Inequalities, Globalization and Trade Unions</b>	<b>175</b>
	<i>Glenn Rayp</i>	
6.1	Introduction	175
6.2	The impact of globalization upon labour bargaining	178
6.2.1	Aims and scopes of labour market bargaining: a short review	179
6.2.2	Globalization and bargaining when labour demand elasticity increases	182
6.2.3	Globalization and bargaining when labour demand elasticity decreases	185
6.3	Globalization and bargaining: empirical evidence	191
6.3.1	The impact of globalization on the size of rents	193

6.3.2	The impact of globalization on the union's bargaining power	195
6.4	Conclusions	197
<b>7</b>	<b>Efficiency Wages and Inequality</b>	<b>201</b>
	<i>Wim Meeusen and Vesna Stavrevska</i>	
7.1	Introduction	201
7.2	Sources of efficiency wages	202
7.2.1	The health model	202
7.2.2	The shirking model	202
7.2.3	The labour turnover model	202
7.2.4	The adverse selection model	202
7.2.5	The fair wage model	203
7.3	Formal analysis of the efficiency wage model	203
7.3.1	The Solow Condition	204
7.3.2	The specific form of the effort function	205
7.3.3	The choice of the reference wage	206
7.4	Within-country inequality	209
7.4.1	Inequality within the working population	209
7.4.2	Efficiency wages and inequality at the national level	215
7.5	Inequality between nations	215
7.6	Conclusion	220
<b>Part IV</b>	<b>Inequality, Education and Growth</b>	<b>225</b>
<b>8</b>	<b>Education, Intergenerational Mobility and Inequality</b>	<b>227</b>
	<i>Nathalie Chusseau and Joël Hellier in collaboration with:</i>	
	<i>B. Ben-Halima</i>	
8.1	Introduction	227
8.2	Stylized facts	228
8.2.1	General skill upgrading	229
8.2.2	Increasing inequality between skilled and unskilled workers	229
8.2.3	Intergenerational mobility	230
8.3	Intergenerational mobility analyses	231
8.3.1	Education functions	231
8.3.2	The education decision	235
8.3.3	Long-term human capital profiles	236
8.4	Long-term skill convergence	238
8.4.1	The basic convergence models	238
8.4.2	Credit constraint and low mobility	240

8.5	Under-education traps	242
8.5.1	Fixed cost of education	243
8.5.2	Credit market imperfection combined with another constraint	244
8.5.3	S-shaped education functions	245
8.5.4	Local externalities	246
8.5.5	Education systems	248
8.5.6	History matters	250
8.6	Empirical evidence	250
8.6.1	Methods	251
8.6.2	Income intergenerational mobility	255
8.6.3	Human capital intergenerational mobility	258
8.7	Conclusion	264
<b>9</b>	<b>Inequality, Growth and Welfare: The Main Links</b>	<b>274</b>
	<i>Joël Hellier and Stéphane Lambrecht</i>	
9.1	Introduction	274
9.2	The impact of development on inequality: Kuznets revisited	276
9.2.1	Kuznets inverted-U curve: bases, interpretations and extensions	276
9.2.2	Empirical evidence	281
9.2.3	From an inverted-U to a tilde-shaped curve?	288
9.3	The impact of inequality on growth	288
9.3.1	Physical capital: inequality is good for growth	288
9.3.2	Human and social capital: inequality can be harmful to growth	290
9.3.3	Empirical evidence	292
9.4	Redistribution, educational policy and growth	294
9.4.1	The negative impact of redistribution	294
9.4.2	The political economy of redistribution	295
9.4.3	Redistribution, education and human-capital accumulation	297
9.5	Welfare, growth and inequality	300
9.5.1	Efficient markets	301
9.5.2	Market inefficiencies	303
9.6	Conclusion	305
