MACROECONOMIC COOPERATION
FOR UNCERTAIN TIMES

THE REDIMA EXPERIENCE

Rodrigo Cárcamo-Díaz

B 382832
C. Policy relevance of the traditional policy coordination approach for Latin America
1. The size of macroeconomic policy transmission channels
2. Implementation issues

Chapter III
Macroeconomic policy cooperation as social learning in networks
A. A different approach to policy cooperation
B. Uncertainty and policymaking
C. Addressing uncertainty
D. International cooperation in networks
E. A model of learning from others: Bala and Goyal (1998)
F. Discussion of the model
   1. Optimistic beliefs, speed of learning and its form
   2. "Peer review" and the model
   3. Limitations of the model
G. Fostering learning and cooperation: the role of international organizations
   2. Signal provision
   3. Creating and supporting networks: addressing market failure

Chapter IV
A case study of "cooperation for learning": the Macroeconomic Dialogue Network (REDIMA) project
A. The dynamics of the "state of the world"
   1. The first period: Boom in commodity prices
   2. The second period: Supply-side inflation and real exchange rate appreciation
B. Applying theory: A real-world "cooperation for learning" experience
C. The emergence of sub-regional links for macroeconomic cooperation in South America and REDIMA I
D. Focus on regional "cooperation for learning": REDIMA II
E. The tools used by REDIMA
   1. Link subsidies
   2. Coordination services
   3. Direct information and analysis provision
   4. Identification of third-party inputs
F. Implementation challenges and responses
   1. Imperfect internal communication within policymaking institutions
   2. The social nature of the networks and node heterogeneity
G. Results........................................................................................................... 119
   1. Network creation and strengthening ................................................. 120
   2. Concrete policy results of learning .................................................. 124
H. Other macroeconomic learning networks ........................................ 128
   1. The Economic Development and Review Committee
      of the OECD .................................................................................. 129
   2. The Economic Review and Policy Dialogue of the
      ASEAN + 3 Group ........................................................................ 131
I. Long-term sustainability of "cooperation for learning"
   networks .............................................................................................. 133

Appendices
Appendix A: The Gosh and Masson (1994) model ................................. 137
Appendix B: Additive and multiplicative uncertainty in the Ghosh
   and Masson (1994) model ................................................................ 143
Appendix C: The essentials of the Bala and Goyal (1998) model ............... 145

Bibliography................................................................................................. 149

Tables and figures

Tables

II.1 Total exports and imports............................................................. 42
II.2 Primary exports and imports....................................................... 44
II.3 Non-primary exports and imports................................................ 45

Figures

I.1 A two-period learning process......................................................... 21
II.1 Non-financial public sector debt in Latin America, 2003-2009 ...... 56
IV.1 Terms of trade in Latin America, 1999-2009............................. 89
IV.2 Selected commodity prices, 2005-2009 ..................................... 89
IV.3 Hydrocarbon revenues of the consolidated public sector of the
    Plurinational State of Bolivia, 2003-2009 ........................................ 90
IV.4 Fiscal policy in MERCOSUR: Simple average of
    country results, 2003-2008 .............................................................. 91
IV.5 Fiscal policy in the Andean Community: Simple average of
    country results, 2003-2008 .............................................................. 91
IV.6 Fiscal policy in Central America, Panama and the Dominican
    Republic: Simple average of country results, 2003-2008 .......... 92
IV.7 West Texas intermediate petroleum spot prices: Data and
    projections, 2007-2009 ................................................................. 93
IV.8 Refined copper cash prices at The London Metal Exchange:
    Data and projections, 2007-2009 .................................................. 93
