1 Introduction

International inequality and national poverty 2
Parts I and II: the digital divide and digital preparedness 2
Part III: leapfrogging, appropriate technology and poverty 9
Conclusions 16

PART I

The digital divide 17

2 From origins to implications: key aspects in the debate over
the digital divide 19

The source of the digital divide 20
Adoption and diffusion of ITs in rich and poor countries 22
The impact of the digital divide 27
Bridging the digital divide 34
Conclusions 37

3 The digital divide across all citizens of the world: a new
concept 39

Reconceptualizing the digital divide 40
Change in Internet use and the size of the digital divide,
1998–2004 42
Weighting changes in the ‘shrinking’ digital divide 43
Examining the distribution of Internet use within countries 44
Conclusions 45
4 Sharing mobile phones in developing countries: implications for the digital divide 47

The digital divide 48
Concepts, explanations and measures of sharing 49
Empirical evidence 52
Conclusions 61

5 From the relative to the absolute digital divide in developing countries 63

The relative versus absolute divide 63
The need for a refocus towards the absolute digital divide 65
The behaviour of the absolute divide over time 65
Conclusions 72

6 Are changes in the digital divide consistent with global equality or inequality? 74

An analytical framework 74
Convergence versus divergence 76
Empirical evidence 77
Analysis 78
Conclusions 82

7 Re-estimating the difficulty of closing the digital divide 84

Evolution and measurement of the concept of digital preparedness 85
Scope of the analysis 86
Multiplicative versus additive production functions in IT 87
The role of complementarities 90
Applications of the multiplicative approach in composite indices 92
Conclusions and policy implications 97

8 Digital divide complacency: misconceptions and dangers 99

Digital divide complacency in the literature 99
Are poor countries really 'falling behind'? 101
Can one define away the digital divide? 105
Why worry about the digital divide? 106
Conclusions 108
PART II
Digital preparedness

9 The ICT Development Index and the digital divide: how are they related?

A brief history of the concept 111
An analytical framework 112
Conclusions 118

10 The neglect of productivity indicators in measuring digital preparedness

Digital preparedness indices 120
Conclusions 122

PART III
Leapfrogging, appropriate information technology and poverty

11 Evaluating latecomer growth in information technology: a historical perspective

The Internet 125
Mobile phones 129
Conclusions 131
Appendix: further calculations for Internet users 132

12 Leapfrogging in mobile telephony: a measure for comparing country performance

Alternative measures of leapfrogging 134
The data set and results 138
Analysis 138
The role of second-tier NICs 141
Conclusions 143

13 Information technology and the poor in developing countries

The poor as multiple selves 144
The framework 145
Mechanisms involving mobile phones 147
Mechanisms involving the Internet 154
Conclusions 159
14 New technology in developing countries: a critique of the one-laptop-per-child programme

History of the OLPC 160
Developed-country products (and standards) and resource imbalance in the Third World 161
OLPC and resource imbalance 164
Conclusions and policy implications 168

15 Low-cost computers for education in developing countries

Alternative to the XO laptop computer 171
The analytical framework 172
Application 177
The OLPC response 178
Conclusions 179

16 Mobile phones in Africa: how much do we really know?

A classification of the ways in which individuals relate to mobile phones 181
Implications 186
Conclusions 188

17 The digital bandwidth divide: implications for developing countries

High bandwidth as an inappropriate technology 191
The role of time 191
An alternative approach 196
Conclusions 197

18 The Internet and poverty in developing countries: welfare economics versus a functionings-based approach

The functionings-based approach versus traditional welfare economics 198
Application to the Internet and poverty in developing countries 203
‘Radio browsing’ at Kothmale Community Radio Station 207
Conclusions 211

19 Internet skills in developing countries: how much do we know?

What are Internet skills? 212
Skills as a constraint 213
Components of an improved measure 214
Does age matter empirically? 215
A new data set 216
How many age categories are needed to supply Internet users? 216
The digital skills divide 219
Conclusions 219

20 Technological blending in the age of the Internet: a developing-country perspective 220

The concept of technological blending as formulated in the 1980s 221
Blending the Internet with community radio 222
Telephony, blending and the Internet 224
Blending the telephone and the Internet for rural extension 225
The comparative neglect of combining voicemail with public payphones 226
Telephone browsing of the Internet 228
Conclusions 229
