SECOND EDITION

Program Evaluation and Performance Measurement
An Introduction to Practice

JAMES C. McDAVID
University of Victoria, Canada
IRENE HUSE
LAURA R.L. HAWTHORN

SAGE
Los Angeles | London | New Delhi
Singapore | Washington DC
DETAILED CONTENTS

Preface xxi
Acknowledgments xxiii

1. Key Concepts and Issues in Program Evaluation and Performance Measurement 1
   Introduction 3
   Integrating Program Evaluation and Performance Measurement 4
   Connecting Evaluation and Performance Management 5
   The Performance Management Cycle 6
   What Are Programs and Policies?
      What Is a Policy? 9
      What Is a Program? 10
   The Practice of Program Evaluation: The Art and Craft of
      Fitting Round Pegs into Square Holes 10
   A Typical Program Evaluation: Assessing the
      Neighbourhood Integrated Service Team Program 13
      Implementation Concerns 13
      The Evaluation 14
      Connecting the NIST Evaluation to This Book 15
   Key Concepts in Program Evaluation 16
   Ten Key Evaluation Questions 18
      Formative and Summative Evaluations 23
   Ex Ante and Ex Post Evaluations 24
   Causality in Program Evaluations 25
   The Steps in Conducting a Program Evaluation 26
      General Steps in Conducting a Program Evaluation 27
      Steps in the Program Evaluation Process 27
      Assessing the Feasibility of the Evaluation 28
      Doing the Evaluation 35
      Making Changes Based on the Evaluation 38
   Summary 39
   Discussion Questions 40
   References 40

2. Understanding and Applying Program Logic Models 45
   Introduction 47
   A Basic Logic Modeling Approach 50
4. Measurement for Program Evaluation and Performance Monitoring

Introduction 147
Introducing Reliability and Validity of Measures 149
Understanding the Reliability of Measures 151
Understanding Measurement Validity 153
Types of Measurement Validity 154
Ways to Assess Measurement Validity 155
Validity Types That Relate a Single Measure to a Corresponding Construct 155
Validity Types That Relate Multiple Measures to One Construct: Internal Structure Validity 157
Validity Types That Relate Multiple Measures to Multiple Constructs 157
Units of Analysis and Levels of Measurement 159
Nominal Level of Measurement 160
Ordinal Level of Measurement 161
Interval and Ratio Levels of Measurement 161
Sources of Data in Program Evaluations and Performance Measurement Systems 163
Existing Sources of Data 163
Sources of Data Collected by the Program Evaluator 164
Surveys as a Data Source in Evaluations 166
Working With Likert Statements in Surveys 168
Designing and Conducting Surveys 171
Specific Survey Design Considerations 172
Using Surveys to Estimate the Incremental Effects of Programs 174
Retrospective Pretests: Where Measurement Intersects With Research Design 177
Survey Designs Are Not Research Designs 179
Validity of Measures and the Validity of Causes and Effects 180
Summary 181
Discussion Questions 182
References 183

5. Applying Qualitative Evaluation Methods

Michelle Brady, James C. McDavid, Irene Huse, & Laura R. L. Hawthorn

Introduction 189
Comparing and Contrasting Different Approaches to Qualitative Evaluation 189
Understanding Paradigms and Their Relevance to Evaluation 190
Pragmatism as a Response to the Philosophical Divisions Among Evaluators 195
Alternative Criteria for Assessing Qualitative Research and Evaluations 196
Qualitative Evaluation Designs: Some Basics 198
Appropriate Applications for Qualitative Evaluation Approaches 198
Comparing and Contrasting Qualitative and Quantitative Evaluation Approaches 200
Designing and Conducting Qualitative Program Evaluations 202
Clarifying the Evaluation Purpose and Questions 203
Identifying Research Designs and Appropriate Comparisons 204
Mixed-Methods Evaluation Designs 205
Identifying Appropriate Samples in Qualitative Evaluations 208
Collecting and Coding Qualitative Data 210
Structuring Data Collection Instruments 210
Conducting Qualitative Interviews 211
Analyzing Qualitative Data 212
Assessing the Credibility and Generalizability of Qualitative Findings 215
Connecting Qualitative Evaluation Methods to Performance Measurement 217
The Power of Case Studies 219
Summary 220
Discussion Questions 221
References 221

6. Needs Assessments for Program Development and Adjustment 225

Introduction 227
General Considerations Regarding Needs Assessments 227
What Are Needs and Why Do We Conduct Needs Assessments? 227
Group-Level Focus for Needs Assessments 228
How Needs Assessments Fit Into the Performance Management Cycle 229
Recent Trends and Developments in Needs Assessments 230
Perspectives on Needs 231
A Note on the Politics of Needs Assessment 233
Steps in Conducting Needs Assessments 234
Phase I: Preassessment 236
Focusing the Needs Assessment 237
Forming the NAC or Study Team 242
Learning as Much as We Can About Preliminary “What Should Be” and “What Is” Conditions From Available Sources 242
Moving to Phase II and/or III or Stopping 243
Phase II: The Needs Assessment 244
Conducting a Full Assessment About “What Should Be” and “What Is” 244
Prioritizing the Needs to Be Addressed 253
Preparing a Document That Integrates Evidence and Recommendations 254
Phase III: Postassessment: Communicating and Implementing a Needs Assessment Action 257
Making Postassessment Decisions and Developing Action Plans 257
Communicating the Final Results of the Needs Assessment 257
Implementing and Monitoring 258
Needs Assessment Example: The Ottawa Share Program 258
Preassessment 259
Assessment 260
Summary 262
Discussion Questions 263
Appendixes 264
Appendix A: Examples of Resources for Those Doing Needs Assessments 264
Appendix B: Case Study: Designing a Needs Assessment for a Small Nonprofit Organization 265
The Program 265
Your Role 266
Your Task 266
References 266

7. Concepts and Issues in Economic Evaluation 271
Lynda Gagné, Irene Huse, James C. McDavid, & Laura R. L. Hawthorn
Introduction 273
Why a Program Evaluator Needs to Know About Economic Evaluation 274
Connecting Economic Evaluation With Program Evaluation: Program Technologies and Outcome Attribution 275
High- and Low-Probability Program Technologies 275
The Attribution Issue 276
Three Types of Economic Evaluation 276
The Choice of Economic Evaluation Method 277
Economic Evaluation in the Performance Management Cycle 278
Historical Developments in Economic Evaluation 279
Distinguishing Budgetary Costs and Benefits From Social Costs and Benefits 280
Cost–Benefit Analysis 281
Standing 282
Valuing Nonmarket Impacts 284
Total Economic Value 285
Revealed and Stated Preferences Methods for Valuing Nonmarket Impacts 286
Steps for Economic Evaluations 287
Specify the Set of Alternatives 287
Decide Whose Benefits and Costs Count (Standing) 287
Categorize and Catalog the Costs and Benefits 288
Predict Costs and Benefits Quantitatively Over the Life of the Project 289
Monetize (Attach Dollar Values to) All Costs and Benefits 289
