Content

Cattle and climate together .......................................................... 14
ANDRE LEU
Animal Husbandry and Climate Change in Organic Production Systems .................................................. 15

KLAUS STRÜBER
Using Workhorses in agriculture: Farming of yesterday or of tomorrow? .............................................. 19

DAGMAR SCHaub, HANS MÄRTEN PAULSEN, CLAUS RÖSEMANN, BRITTA BLANK, GEROLD RAHMANN
Emissions of greenhouse gases from dairy farms – a case study using the German agricultural emission model GAS-EM .......................................................... 22

CHARLES BENBROOK, BRIAN BAKER
Shades of green – Global implications of choices for dairy systems in the United States ....... 26

MAXIMILIAN SCHÜLER, HANS MARTEN PAULSEN
An LCA based comparison of two different dairy breeds in an organic farm ............................................. 30

ALLEN G. MATTHEWS, JUAN ALVEZ
Sustainability Indicators for Low Carbon Farming ................................................................................... 34

ANITA IDEL
Cows are not climate killers! The undervalued potentials of grass and grazers for nutrition ............. 38

Future markets for organic livestock products ......................................................... 42

SÖMER HASIMOĞLU
Food (meat) consumption and socio-economic context of EU on PC versus alternative approach – PAHU .................................................................................... 43

SOLEDAD ALVAREZ, CARLOS PALACIOS
Spanish organic livestock: Evolution from 2001 to 2010 ........................................................................ 47

FISSEHA KASSAHÜN KEBEDE, JÜRGEN GREILING, MEKONNEN HALEMARIAM, ABEBE TESSEMA, HIWOT DESTA
Dairy value chain analysis in Arsi zone, Ethiopia ...................................................................................... 51

MAHESH CHANDER, RAMSWARUP SINGH RATHORE, REENA MUKHERJEE, SHYAMAL KUMAR MONDAL AND SANJAY KUMAR
Road map for organic animal husbandry development in India .......................................................... 59

FABIÁN CRUZ URIBE, CAROLINA PRIETO
Evaluation of livestock production in Colombia and experiences within an organic farm when using an associative model .............................................................................. 63

SUBRAHMANYESWARIL B AND MAHESH CHANDER
Experienced benefits and risks perceived by organic farmers in conversion to livestock production .......... 67

RODRIGO OLIVARES PINEDA, MANUEL ÁNGEL GÓMEZ CRUZ AND RITA SCHWENTESIUS RINDERMANN
Conversion potential of conventional cattle farms to organic production systems in the State of Tabasco, Mexico ...................................................................................... 70

JASPER LIDWINA HEERKENS, FRANK A TUYTTENS
Consumer perception and communication on welfare in organic laying hen farming .......................... 75

ELBA RIVERA URBINA, VICTORIA LÓPEZ URBINA
Animal, husbandry, women, husbands, family ......................................................................................... 79
Organic grazing systems in wet areas ................................................................. 82
OLANITE JIMOH ALAO, DELE PETER ANIWE AND ARIGBEDE OLUWASANMI MOSES
Effects of animal manure and harvest interval on the growth, dry matter yield and nutritive quality of three grasses at Abeokuta, Southwest Nigeria ........................................ 83
URBANO G. P. DE ABREU, THIAGO B. DE CARVALHO, GABRIELA G. RIBEIRO,
SERGIO DE ZEN, ANDRE S. MORAES, IVENS DOMINGOS
Production cost of organic beef cattle production system in Pantanal - Brazil .......... 88
EVA SALOMON, KARL-IVAR KUMM, LENA LIDFORS, KRISTINA LINDGREN,
GUNNAR TORSTENSSON
A rotational winter grazing system for beef cattle – production costs in relation to animal welfare, working environment and environmental impact .................. 93
OLUSEGUN OLADIPO SANSI, JOLADE SANSI
A comparative analysis of the conventional beef export outputs from Subsaharan African countries and beef outputs from organic beef exporting developing countries ........................................... 97
ERIC ANDREW MEILI
Performance and efficiency of organic low input pasture beef production ............... 100

Organic grazing systems in dry areas ................................................................. 102
ILSE KÖHLER-ROLLEFSON, RAZIQ KAKAR, KAMAL KISHORE, HANWANT SINGH RATHORE,
JACOB WANYAMA
The Ark of Livestock Biodiversity ....................................................................... 103
VISHNU SHARMA & SANJITA SHARMA
Linking nomadic and marginal livestock keepers in organized organic system: cost effective production module ................................................................. 107
