Optimizing, Innovating, and Capitalizing on Information Systems for Operations

John Wang
Montclair State University, USA
Table of Contents

Preface..........................................................................................................................xix

Section 1
Optimization Methodologies

Chapter 1
Local Perturbation Analysis of Linear Programming with Functional Relation Among Parameters .... 1
   Payam Hanafizadeh, Allameh Tabataba'i University, Iran
   Abolfazl Ghaemi, Amirkabir University of Technology, Iran
   Madjid Tavana, La Salle University, USA

Chapter 2
Taylor Kriging Metamodeling for Stochastic Simulation Interpolation .....................................25
   Heping Liu, North Dakota State University, USA
   Yanli Chen, Auburn University, USA

Chapter 3
Bounded Primal Simplex Algorithm for Bounded Linear Programming with Fuzzy Cost
Coefficients ....................................................................................................................40
   Ali Ebrahimnejad, Islamic Azad University, Qaemshahr Branch, Iran
   Seyed Hadi Nasseri, Mazandaran University, Iran
   Sayyed Mehdi Mansourzadeh, Islamic Azad University, Jouybar Branch, Iran

Chapter 4
Sensitivity Analysis on Linear Programming Problems with Trapezoidal Fuzzy Variables ............64
   Seyed Hadi Nasseri, University of Mazandaran, Iran
   Ali Ebrahimnejad, Islamic Azad University, Qaemshahr Branch, Iran

Chapter 5
Optimizing Series Repairable Systems with Imperfect Repair .............................................83
   Mohammed Hajeeh, Kuwait Institute for Scientific Research, Kuwait
Chapter 6
Data Envelopment Analysis with Fuzzy Parameters: An Interactive Approach
Adel Hatami-Marbini, Université Catholique de Louvain, Belgium
Saber Saati, Islamic Azad University, Iran
Madjid Tavana, La Salle University, USA

Section 2
Business Analytics

Chapter 7
Information in Fleeting Opportunities
Ibrahim Almojel, Stanford University, USA
Jim Matheson, SmartOrg, USA
Pelin Canbolat, Stanford University, USA

Chapter 8
Sequential Test for Arbitrary Ratio of Mean Times between Failures
Yefim H. Michlin, Technion- Israel Institute of Technology, Israel
Dov Ingman, Technion-Israel Institute of Technology, Israel
Yoram Dayan, ELTA Systems Ltd., Israel

Chapter 9
Portfolio Selection Models and Their Discrimination
Satadal Ghosh, Indian Institute of Science, India
Sujit Kumar Majumdar, Indian Statistical Institute, India

Chapter 10
Predicting Donations from a Cohort Group of Donors to Charities: A Direct Marketing Case Study
Gary H. Chao, Kutztown University, USA
Maxwell K. Hsu, University of Wisconsin-Whitewater, USA
Carol Scovotti, University of Wisconsin-Whitewater, USA

Chapter 11
Measuring the Effect of the Rules and Regulations on Global Malmquist Index
Mohammadreza Alirezaee, Iran University of Science and Technology, Iran
Mohsen Afsharian, Iran University of Science and Technology, Iran

Chapter 12
Equal Pricing Strategies in a Dual Channel Supply Chain
Ue-Pyng Wen, National Tsing Hua University, Taiwan
Yun-Chu Chen, National Tsing Hua University, Taiwan
Kam-Hong Cheung, MGM Macau, China
Section 3
Logistics Optimization

Chapter 13
Multi Depot Probabilistic Vehicle Routing Problems with a Time Window: Theory, Solution and Application .......................................................... 251
Sutapa Samanta, Maryland State Highway Administration, USA
Manoj K. Jha, Morgan State University, USA

Chapter 14
A Heuristic Algorithm for the Inner-City Multi-Drop Container Loading Problem .................. 274
Li Pan, The University of Hong Kong, China
Sydney C. K. Chu, The University of Hong Kong, China
Guangyue Han, The University of Hong Kong, China
Joshua Zhexue Huang, Shenzhen Institutes of Advanced Technology, China

Chapter 15
A Stochastic Truck Routing Model for Agricultural Freight ........................................ 294
Subhro Mitra, University of North Texas at Dallas, USA
Joseph Szmeredovsky, North Dakota State University, USA
Nikita Barabanov, North Dakota State University, USA

Chapter 16
Avijit Maji, Maryland State Highway Administration, USA
Manoj K. Jha, Morgan State University, USA

Chapter 17
Methods for Solving Fully Fuzzy Transportation Problems Based on Classical Transportation Methods .......................................................... 328
Amit Kumar, Thapar University, India
Amarpreet Kaur, Thapar University, India

Section 4
Inventory Control

Chapter 18
Comments on Two Models for Operating Two-Warehouse Inventory Systems with Deteriorating Items and Inflationary Effects ............................................. 349
Huachun Xiong, Tsinghua University, China
Jinxing Xie, Tsinghua University, China
Bo Niu, China Railway Express Co., China
Chapter 19
An Integrated Vendor-Buyer Model with Uncertain Lead Time, Life Time under Inflation and Variable Holding Cost ........................................................................................................371
S. R. Singh, D. N. College, India
Diksha Bhatia, D. N. College, India

Chapter 20
EOQ Model with Time Dependent Demand Rate and Time Dependent Holding Cost Function ....381
R. P. Tripathi, Uttarkhand Technical University (DIT), India

Compilation of References ................................................................................................393

About the Contributors ....................................................................................................419

Index .................................................................................................................................428
