3.4 Properties 28
3.5 Class Variables and Class Methods 30
3.6 Creating and Using Objects in C# 33
3.7 Example: European Option Price and Sensitivities 33
  3.7.1 Supporting Mathematical Functions 34
  3.7.2 Black-Scholes Formula 35
  3.7.3 C# Implementation 36
  3.7.4 Examples and Applications 39
3.8 Enumeration Types 40
3.9 Extension Methods 42
3.10 An Introduction to Inheritance in C# 44
3.11 Example: Two-factor Payoff Hierarchies and Interfaces 46
3.12 Exception Handling 50
3.13 Summary and Conclusions 50
3.14 Exercises and Projects 51

4 Classes and C# Advanced Features 53
  4.1 Introduction and Objectives 53
  4.2 Interfaces 53
  4.3 Using Interfaces: Vasicek and Cox-Ingersoll-Ross (CIR) Bond and Option Pricing 54
    4.3.1 Defining Standard Interfaces 55
    4.3.2 Bond Models and Stochastic Differential Equations 55
    4.3.3 Option Pricing and the Visitor Pattern 58
  4.4 Interfaces in .NET and Some Advanced Features 61
    4.4.1 Copying Objects 62
    4.4.2 Interfaces and Properties 63
    4.4.3 Comparing Abstract Classes and Interfaces 64
    4.4.4 Explicit Interfaces 65
    4.4.5 Casting an Object to an Interface 65
  4.5 Combining Interfaces, Inheritance and Composition 67
    4.5.1 Design Philosophy: Modular Programming 67
    4.5.2 A Model Problem and Interfacing 68
    4.5.3 Implementing the Interfaces 69
    4.5.4 Examples and Testing 72
  4.6 Introduction to Delegates and Lambda Functions 72
    4.6.1 Comparing Delegates and Interfaces 74
  4.7 Lambda Functions and Anonymous Methods 76
  4.8 Other Features in C# 77
    4.8.1 Static Constructors 77
    4.8.2 Finalisers 78
    4.8.3 Casting 79
    4.8.4 The var Keyword 80
  4.9 Advanced .NET Delegates 80
    4.9.1 Provides and Requires Interfaces: Creating Plug-in Methods with Delegates 82
    4.9.2 Multicast Delegates 85
5 Data Structures and Collections

5.1 Introduction and Objectives
5.2 Arrays
  5.2.1 Rectangular and Jagged Arrays
  5.2.2 Bounds Checking
5.3 Dates, Times and Time Zones
  5.3.1 Creating and Modifying Dates
  5.3.2 Formatting and Parsing Dates
  5.3.3 Working with Dates
5.4 Enumeration and Iterators
5.5 Object-based Collections and Standard Collection Interfaces
5.6 The List<T> Class
5.7 The Hashtable<T> Class
5.8 The Dictionary<Key, Value> Class
5.9 The HashSet<T> Classes
5.10 BitArray: Dynamically Sized Boolean Lists
5.11 Other Data Structures
  5.11.1 Stack<T>
  5.11.2 Queue<T>
  5.11.3 Sorted Dictionaries
5.12 Strings and StringBuilder
  5.12.1 Methods in string
  5.12.2 Manipulating Strings
5.13 Some new Features in .NET 4.0
  5.13.1 Optional Parameters
  5.13.2 Named Parameters
  5.13.3 COM Interoperability in .NET 4.0
  5.13.4 Dynamic Binding
5.14 Summary and Conclusions
5.15 Exercises and Projects

A1 Object-oriented Fundamentals 735
A1.1 Introduction and Objectives 735
A1.2 Object-oriented Paradigm 735
A1.3 Generic Programming 737
A1.4 Procedural Programming 738
A1.5 Structural Relationships
   A1.5.1 Aggregation 739
   A1.5.2 Association 740
   A1.5.3 Generalisation/Specialisation (Gen/Spec Relationship) 742
A1.6 An Introduction to Concept Modelling 743
   A1.6.1 The Defining Attribute View 743
   A1.6.2 The Prototype View 744
   A1.6.3 The Exemplar-based View 744
   A1.6.4 The Explanation-based View 744
A1.7 Categorisation and Concept Levels 745
A1.8 Whole–Part Pattern
   A1.8.1 Data Decomposition 746
A1.9 Message-passing Concept versus Procedural Programming 748

A2 Nonlinear Least-squares Minimisation 751
A2.1 Introduction and Objectives 751
A2.2 Nonlinear Programming and Multi-variable Optimisation 751
A2.3 Nonlinear Least Squares
   A2.3.1 Nonlinear Regression 753
   A2.3.2 Simultaneous Nonlinear Equations 754
   A2.3.3 Derivatives of Sum-of-Squares Functions 754
A2.4 Some Specific Methods 755
A2.5 The ALGLIB Library 756
A2.6 An Application to Curve Building 758
A2.7 Rate Calibration Example 759
A2.8 Exercises and Projects 764

A3 The Mathematical Background to the Alternating Direction Explicit (ADE) Method 765
A3.1 Introduction and Objectives 765
A3.2 Background to ADE 765
A3.3 Scoping the Problem: One-factor Problems 766
A3.4 An Example: One-factor Black-Scholes PDE 768
