Alfred Marshall and Modern Economics

Equilibrium Theory and Evolutionary Economics

Neil Hart
Senior Lecturer in Economics, University of Western Sydney, and Visiting Fellow, Industrial Relations Research Centre, University of New South Wales, Australia
## Contents

**Foreword**  ix

**Preface and Acknowledgements**  xi

1 **Introduction: Equilibrium and Evolution**  1
   1.1 Outline of the book  3
   1.2 Equilibrium analogies in economic theory  4
   1.3 Towards a 'more biological paradigm'  9

2 **Alfred Marshall's Economic Biology Mecca and Mechanical Analogies**  14
   2.1 Marshall's economic biology, increasing returns, and the representative firm theory  14
   2.2 Mechanical analogies and Marshall's 'reconciliation problem'  23
   2.3 Marshall and the Marshallians  30
   2.4 Marshall's 'loyal but faithless' followers  39

3 **Equilibrium Economics after Marshall**  42
   3.1 The imperfect competition 'revolution': exorcising the Marshallian incubus?  42
   3.2 General equilibrium, economies of scale, and imperfect competition  48
   3.3 Challenges to the ascendency of equilibrium analysis: infidels, palace revolts, and true believers  54
   3.4 Equilibrium Games  61
   Appendix: The capital theory debates and 'Marshall's theory'  67

4 **Keynes' Marshallian Heritage and the Walrasian Eclipse**  75
   4.1 Marshall and Keynes  75
   4.2 Keynes' *General Theory*  78
   4.3 Walrasian interpretations  83
   4.4 The neoclassical synthesis and beyond  85

5 **Equilibrium Growth and Cumulative Causation**  93
   5.1 Adam Smith on economic progress  94
   5.2 Equilibrium growth  96
5.3 'New Growth Theory': old wine for new bottles? 100
5.4 Keynesian endogenous growth theory 104
5.5 Allyn Young, the traverse and cumulative causation 106
5.6 Cumulative causation and economic evolution 111
6 The Revitalisation of Marshall's Industrial Economics 114
   6.1 Marshall's applied industrial economics 115
   6.2 Post-Marshallian visions of industrial economics 121
   6.3 The reawakening of interest in Marshall's industrial economics 128
7 Themes in Evolutionary Economics 135
   7.1 Veblen and Schumpeter: two pioneering figures in evolutionary economics 137
   7.2 Goodwin's dynamics 143
   7.3 Biological evolution and evolutionary economics 145
   7.4 Nelson and Winter and modern evolutionary economics 148
8 Marshall, Evolutionary Economics, and Post-Keynesian Theory 157
   8.1 Marshall's economic biology and contemporary evolutionary economics 158
   8.2 Marshall's 'reconciliation problem' and evolutionary economics 164
   8.3 Long-period analysis and evolutionary economics 168
   8.4 Evolutionary economics and Post-Keynesian economics 173
9 Conclusion 181
