ECOLOGICAL LIMITS creating space
AND ECONOMIC DEVELOPMENT

RAMPRASAD SENGUPTA

OXFORD UNIVERSITY PRESS
Contents

List of Tables and Figures xv
Preface xxiii

1. Introduction 1
Life Process, Ecology, and Economics/1
Global Development and Limitations of the Spaceship Earth/4
Entropy Law and Economic Processes/5
Ecological Concern in the History of Economic Thought/9
  The Classical and the Neoclassical Theory/9
  Biophysical Approach of Ecological Economics/13

2. Economic Theory and Ecological Limits 17
Concept of Welfare and Scale in Economics/17
Pre-analytic Vision of Microeconomic Theory and Scale/18
Pre-analytic Vision of Macroeconomics and Scale/19
Limitations of Conventional Economics: Any Need for Paradigm Change?/19
Environmental Economics: Any Limit to Scale of Macroeconomy?/22
Ecological Economics: Perspectives of Macroeconomic Growth/23
Substitutability versus Complementarity/24
Ecological Limits and Equity in Development/25
  Poverty, Income Distribution, and the Environment/25
  Intergenerational Equity in Development and the Environment/26
  Ecological Economic Perspective of Macroeconomic Development:
    Shift from Scale to Quality—An Approach to Sustainable Development/27
Integration of Ecological Factors in Economic Model/29
Relevance of Economic Science in Addressing Ecological Issues/32
3. Concept of Sustainable Development: Macroeconomic Resource and Income Accounting

Resource Limitation and Role of Knowledge Creation/35
A Capital Theoretic Model of Sustainable Development/36
   Intertemporal Welfare Function/37
   Production Function/38
   Accumulation of Manmade Capital/38
   Technological Changes/39
   Growth of Natural Resources/39
   Resource Discoveries/39
   Growth of Stock of Pollution/40
   Initial Condition/40
Resource and Environmental Accounting/42
An Environmental Input–Output Framework of Analysis/44
Environmental Adjustment of National Income for Sustainability/48
Restructuring of the Standard National Accounts (SNA) for the Integration of Environmental and Economic Accounting/50
Asset Accounts/52
Degradation of Assets in Accounting/56
Environmental Adjustments to Flow Accounts/57
Implementation of the NRA and SEEA in India/60

4. Biosphere and Ecosystems

Earth, Life, and Biosphere/67
Ecosystems/70
Components of Ecosystem: Biotic Environment/72
Abiotic Environment/73
   Inorganic Substances/73
   Organic Substances/75
Climate Conditions and Limiting Factors/75
Energy Flow and Economic Process/77
   Solar Energy Flow/78
   Energy Flow along Food Chain/81
Bio-Geo-Chemical Cycles/83
   Hydrological, Carbon, and Nitrogen Cycles/84
Energetics of Ecosystem and the Human Economy/88
5. Ecological Footprint
The Concept of Ecological Footprint/92
Methodology of Calculation of Ecological Footprint/93
Measurement of Ecological Footprint/94
Trade and Estimation of Ecological Footprint/97
Land Use Types and Ecological Footprint Accounts/98
Ecological Deficit, Global Distribution of Footprint, and Sustainable Development/100

Population Size and the Environmental Pressure/105
Population and Economic Development/107
The Classicals: Influence of Malthus/107
The Neoclassical Influence of Solow’s Growth Model and the Neglect of Population and the Natural Environment in Development Economics/109
Impact of Fertility Behaviour on Economic Growth/111
Impact through Age Distribution and Dependency/111
Role of Technical Change/112
Problem of Irreversibility and Vanishing Resource Base/112
Economic Development and Population Growth: Global History, Experience, and Future Projection/113
Demographic Transition and Fertility Behaviour/116
Neoclassical Model for Choice of Family Size/119
Gender Power Relations and Fertility Behaviour/121
Structure of Property Rights, Family Institution, Cultural Norms, and Reproductive Behaviour/123
Population and the Natural Environment/125
Reproductive Externalities and Population Growth: Tragedy of Commons/127
The Vicious Circle of High Fertility, Poverty, Low Female Empowerment, and Degradation of Common Resources/128
Urbanization, Income Distribution, and Environmental Pressure/130

7. India’s Human Settlement and Micro Living Environment
Population Dynamics and Future Prospect of India’s Population Growth/133
Regional Pattern of Demographic Transition and Dynamics of Population Preference in India/135
Poverty and Fertility Behaviour in India/139
Ground Water Revolution /195
Conflicts over Water Use/197
Water Rights, Water Allocation, and Water Institutions/198
Water Pollution/200
Water Quality and Control of Water Pollution/202
Government Action for Water Pollution Control in India/205
Valuation of Economic Impact of Water Pollution /207

10. Forests
Forest as a Resource/210
Extent of Deforestation and Forest Degradation/216
Sources of Degradation of Forest/220
  Fuel Wood Use of Forests/220
  Industrial Use of Forests/221
  Grazing of Cattle/221
  Industrial Pollution/222
Impact of Degradation of Forests/222
Forest Management: A Historical Review/223
Evolution of Joint Forest Management in India/227
National Forest Policy/228

11. Biodiversity
Concept, Measurement, and Utility of Biodiversity/232
Economics of Choice of Biodiversity/234
Economic Valuation of Biodiversity/236
Extent of Biodiversity: Global Scenario/239
Indian Scenario of Biodiversity/241
Biodiversity Loss: Causal Factors, Extent, and Impact/244
Biodiversity Conservation Policy/248
India’s Heritage of Biodiversity Conservation and Traditional Knowledge System/249
Anthropogenic Stress on Ecosystem, Units of the Earth, and Living Planet Index/251

12. Energy
Development and Energy Security: Energy Demand/255
Energy Resources and Supply/257
  Fossil Fuels/259
Impact of Melting of Glacier and Ice Cap/314
Impact on Agriculture/314
Health Impact/315
Distribution of Impact/315
Growth with Climate Stabilization /317
Feasibility of Low Carbon Growth/317
Policy Approach for Low Carbon Growth/318
Adaptation to Climate Change/319
International Cooperation: Collective Action/320
CO₂ Emission Mitigation in India and India’s Policy Approach of Equity in Sharing the Responsibility of GHG Mitigation/323

15. Overcoming Ecological Limits: Roles of Knowledge, Human Capital, Human Values, and Institutions

Holistic Approach for Sustainable Development: Is Indefinite Sustainable Development Possible?/330
Policy Approach of Sustainable Development: Role of Technology and Human Values/333
Organic View of Technology and Resource Development/335
Delinking of Economic Growth and the Environment/335
Role of Human Values/337
Management of Sustainable Development and Institutions /338
