Praise for *From Business Strategy to Information Technology Roadmap* .... xv
About the Authors .............................................................. xix
Acknowledgments .................................................................... xxi
What Is This Book About? ...................................................... xxiii
Preface ..................................................................................... xxvii
Foreword by Mitchell Fox ......................................................... xxix
Foreword by Larry Rothstein .................................................. xxxi
Foreword by Michael Weiner ................................................... xxxiii
Foreword by Emily Simoness .................................................. xxxv
Foreword by Kiran Rijhsinghani ............................................. xxxvii

## SECTION I  A CONCISE INTRODUCTION TO BUSINESS STRATEGY: CONCEPTS AND FORMULATION

1  From Mission, Vision, and Values to Business Model .................. 3
   1.1 Chapter Objective .......................................................... 3
   1.2 Mission, Vision, and Values .......................................... 3
      1.2.1 Mission ............................................................... 3
      1.2.2 Vision ................................................................. 4
      1.2.3 Values ................................................................. 4
   1.3 Business Model ............................................................. 5
   1.4 Takeaways .................................................................. 5
   References .......................................................................... 6

2  Business Strategy and Its Formulation .................................... 7
   2.1 Chapter Objective .......................................................... 7
   2.2 What Is Business Strategy? ............................................ 7
      2.2.1 Key Criteria for a Good Business Strategy .................. 7
         2.2.1.1 Internal Consistency ......................................... 7
         2.2.1.2 External Consistency ....................................... 9
         2.2.1.3 Dynamic Consistency ...................................... 9
2.2.2 Some Other Important Considerations ................................................. 9
  2.2.2.1 Trade-Offs ................................................................................. 9
  2.2.2.2 Strategic Fit .............................................................................. 11

2.3 From Core Competency to Value Creation ............................................ 11
  2.3.1 Core Competency and Value Chain ............................................... 11
    2.3.1.1 Core Competency ................................................................. 12
    2.3.1.2 Value Chain ......................................................................... 13
  2.3.2 Relative Cost Analysis ...................................................................... 14
  2.3.3 Value Creation .................................................................................. 16
    2.3.3.1 Some Special Perspective for Commercial Companies .......... 16
    2.3.3.2 Some Special Perspective for Nonprofit Organizations .......... 17

2.4 Michael Porter’s Five Forces Framework .............................................. 17
  2.4.1 Michael Porter’s Five Forces ............................................................ 17
    2.4.1.1 Bargaining Power of Suppliers ............................................ 18
    2.4.1.2 Bargaining Power of Customers ........................................... 18
    2.4.1.3 Threat of New Entrants ......................................................... 19
    2.4.1.4 Threat of Substitutes ............................................................... 19
    2.4.1.5 Rivalry among Existing Competitors ................................... 19
    2.4.1.6 Walmart and Porter’s Five Forces ........................................ 20
    2.4.1.7 The MoMA and Porter’s Five Forces ..................................... 21
  2.4.2 Leading Uses of the Five Forces Framework .................................... 22
  2.4.3 A Sixth Force ................................................................................... 23

2.5 Product—Market Growth Directions Matrix ......................................... 23

2.6 The Strategy Blade ................................................................................. 25

2.7 From Business Strategy to Financial Goals .......................................... 26

2.8 Takeaways ............................................................................................... 27

References ..................................................................................................... 31

SECTION II AN INTRODUCTION TO LEAN, LEAN AND
AGILE ORGANIZATION, AND LEAN AND
AGILE IT

3 What Do We Mean by Lean, Lean and Agile Organization, and
Lean and Agile IT? ....................................................................................... 35
  3.1 Chapter Objective .................................................................................. 35
  3.2 What Is Lean? ....................................................................................... 35
  3.3 So What Do We Mean by a Lean and Agile Organization and
    a Lean and Agile IT and IT Roadmap? .............................................. 37
  3.4 Takeaways ............................................................................................. 38

References ..................................................................................................... 39
SECTION III  FROM BUSINESS STRATEGY TO IT ROADMAP: AN INTRODUCTION TO ENTERPRISE ARCHITECTURE (EA)

4 An Introduction to Business Strategy and IT Alignment..................43
  4.1 Chapter Objective .................................................................43
  4.2 Why Business and IT Misalignment Is Unacceptable.................43
  4.3 How Can We Identify if There Is Such Misalignment?...............44
  4.4 Why Has IT Never Been Clearly Aligned with the
        Organization’s Business Strategy? .........................................44
  4.5 How Can We More Clearly Align IT with an Organization’s
        Business Strategy? .................................................................45
  4.6 Introduction to Enterprise Architecture......................................46
  4.7 A Look at the Different Layers of an Enterprise Architecture ......46
  4.8 Takeaways .................................................................................47

5 More on Enterprise Architecture (EA) ..............................................49
  5.1 Chapter Objective ..........................................................................49
  5.2 EA Framework ..............................................................................49
      5.2.1 Enterprise Business Architecture........................................50
          5.2.1.1 Business Objectives, Goals, and Metrics....................50
          5.2.1.2 Business Processes.....................................................51
          5.2.1.3 Team Structure.............................................................58
      5.2.2 Enterprise IT Application Architecture.................................58
      5.2.3 Enterprise IT Data Architecture ..........................................61
      5.2.4 Enterprise IT Infrastructure Architecture..............................61
      5.2.5 Enterprise Security Architecture Layer ..................................64
  5.3 Takeaways .....................................................................................64
Reference ..........................................................................................66

SECTION IV  FROM BUSINESS STRATEGY TO AN AGILE AND LEAN IT ROADMAP: THE FORMULATION PROCESS

6 A High-Level Overview of the IT Roadmap Formulation Process......69
  6.1 Chapter Objective ..........................................................................69
  6.2 Step 1: Identify Current Business and IT Situation .......................69
  6.3 Step 2: Identify Future Business Strategy and IT Needs ...............70
  6.4 Step 3: Identify Business and IT Gaps ..........................................70
  6.5 Step 4: Identify the IT Roadmap ....................................................71
  6.6 Takeaways .....................................................................................71
7 More on the IT Roadmap Formulation Process

7.1 Chapter Objective

7.2 Step 1: Identify the Current Business and IT Situation

7.2.1 Current Enterprise Business Architecture

7.2.1.1 Business Goals and Metrics

7.2.1.2 Business Processes

7.2.1.3 Team Structure

7.2.2 Current Enterprise IT Application Architecture

7.2.3 Current Enterprise IT Data Architecture

7.2.3.1 Enterprise IT Transactional Data Architecture

7.2.3.2 Enterprise IT Business Intelligence Data Architecture

7.2.4 Current Enterprise IT Infrastructure Architecture

7.3 Step 2: Identify the Future Business Strategy and IT Situation

7.3.1 Future Business Strategy and Its New Enterprise Business Architecture

7.3.1.1 Future Goals and Direction

7.3.1.2 Enterprise Business Processes

7.3.1.3 Team Structure

7.3.2 Future Enterprise IT Application Architecture

7.3.3 Future Enterprise IT Data Architecture

7.3.4 Future Enterprise IT Infrastructure Architecture

7.4 Step 3: Identify Business and IT Gaps

7.4.1 Gaps in Enterprise Business Processes

7.4.2 Gaps in Enterprise IT Application Architecture

7.4.3 Gaps in Enterprise IT Data Architecture

7.4.3.1 Transactional Applications

7.4.3.2 Enterprise Business Intelligence/Analytics

7.4.4 Gaps in Enterprise IT Infrastructure Architecture

7.5 Step 4: Identify the IT Roadmap

7.5.1 The Organization or Business Unit's Business Direction and Financial Goals

7.5.2 The Organization or Business Unit's Overall Enterprise Architecture

7.5.3 Technical Migration Plan

7.5.4 Timeline

7.5.5 IT Budget

7.6 Takeaways

8 From a Business Unit's IT Roadmap to an Enterprise IT Roadmap

8.1 Chapter Objective

8.2 The "What"
8.3 The “How” ................................................................. 119
8.4 Takeaways ............................................................... 120

9 IT and Mergers and Acquisitions (M&A) Activities ............... 123
9.1 Chapter Objective ....................................................... 123
9.2 Mergers and Acquisitions Evaluation Process .................. 123
9.3 IT Due Diligence Questionnaire .................................. 124
9.4 Takeaways ............................................................... 124

10 Change Management .................................................. 129
10.1 Chapter Objective ..................................................... 129
10.2 Key Recommendations ............................................. 129
10.3 Takeaways ............................................................... 131
Reference ....................................................................... 132

SECTION V FROM IT ROADMAP FORMULATION TO EXECUTION

11 Strategy Is Execution .................................................... 135
11.1 Chapter Objective ..................................................... 135
11.2 Getting Organized for Execution ................................ 135
   11.2.1 Business and IT Governance Board ..................... 135
   11.2.2 Business Unit IT Steering Committee ................. 136
11.3 What to Review? ...................................................... 136
   11.3.1 Business Goals Review ..................................... 136
   11.3.2 IT Roadmap Execution Progress Review .............. 144
   11.3.3 IT Budget Review ............................................ 145
11.4 Revision to the IT Roadmap ....................................... 145
11.5 Takeaways ............................................................... 145

12 Parting Thoughts ......................................................... 147

SECTION VI CASE STUDIES

13 Case Study 1: Commercial Case Study: All About HatWare .... 151
13.1 Current Enterprise Business Architecture ..................... 152
   13.1.1 Business Goals .................................................. 152
   13.1.2 Business Processes .......................................... 153
   13.1.3 Team Structure ............................................... 155
13.2 Current Enterprise IT Application Architecture ............... 156
13.3 Current Enterprise IT Data Architecture ....................... 158
13.4 Current Enterprise IT Infrastructure Architecture ............ 158
13.5 Future Business Strategy and Its New Enterprise Business Architecture ................................................................. 162
   13.5.1 Competitive Analysis ................................................................. 162
   13.5.2 All About HatWare's New Business Strategy ................. 164
      13.5.2.1 Future Goals and Direction ........................................ 164
      13.5.2.2 Future Enterprise Business Processes .................. 169
      13.5.2.3 Future Team Structure ............................................. 170
13.6 Future Enterprise IT Application Architecture ......................... 170
13.7 Future Enterprise IT Data Architecture .................................. 173
   13.7.1 Future Enterprise IT Transactional Data Architecture .... 173
   13.7.2 Future Enterprise IT BI/Analytics Data Architecture .... 174
13.8 Future Enterprise IT Infrastructure Architecture ...................... 175
13.9 Gaps in Enterprise Business Processes .................................... 175
13.10 Gaps in Enterprise IT Application Architecture ..................... 177
13.11 Gaps in Enterprise IT Data Architecture .................................. 178
13.12 Gaps in Enterprise IT Infrastructure Architecture .................... 180
13.13 IT Roadmap Components ............................................................ 181
   13.13.1 Business Strategy, Direction, and High-Level Goals .... 182
   13.13.2 Enterprise Architecture .................................................. 183
   13.13.3 Business and Technology Initiatives Prioritization .... 184
   13.13.4 Timeline ........................................................................ 184
   13.13.5 IT Budget .................................................................... 186
13.14 All About HatWare's IT Roadmap Execution ............................ 186

14 Case Study 2: Nonprofit Case Study: US Against Illiteracy ............ 193
14.1 Current Enterprise Business Architecture ................................ 194
   14.1.1 Business Goals ................................................................. 194
   14.1.2 Business Processes ............................................................ 195
   14.1.3 Team Structure ................................................................. 195
14.2 Current Enterprise IT Application Architecture ......................... 196
14.3 Current Enterprise IT Data Architecture .................................. 199
   14.3.1 Enterprise IT Transactional Data Architecture .......... 199
   14.3.2 Enterprise IT BI Data Architecture ............................ 199
14.4 Current Enterprise IT Infrastructure Architecture ...................... 202
14.5 Future Business Strategy and Its New Enterprise Business Architecture ........................................................................ 202
   14.5.1 Future Goals and Direction ............................................. 205
   14.5.2 Future Team Structure ..................................................... 206
   14.5.3 Future Enterprise Business Processes ......................... 206
14.6 Future Enterprise IT Application Architecture ......................... 208
14.7 Future Enterprise IT Data Architecture .................................. 208
   14.7.1 Future Enterprise IT Transactional Data Architecture ... 208
   14.7.2 Future Enterprise IT BI Data Architecture ................. 210
14.8  Future Enterprise IT Infrastructure Architecture .......................... 211
14.9  Gaps in Enterprise Business Processes ........................................... 212
14.10 Gaps in Enterprise IT Application Architecture ............................... 213
   14.10.1 Enterprise IT Transactional Applications ................................. 213
   14.10.2 Enterprise IT BI Applications .............................................. 214
14.11 Gaps in Enterprise IT Data Architecture ......................................... 214
14.12 Gaps in Enterprise IT Infrastructure Architecture ............................. 214
14.13 IT Roadmap Components ............................................................. 217
   14.13.1 Business Strategy, Direction, and Goals .................................. 218
   14.13.2 Enterprise Architecture ........................................................ 219
   14.13.3 Business and Technology Initiatives Prioritization ..................... 220
   14.13.4 Timeline .............................................................................. 221
   14.13.5 IT Budget ............................................................................ 221
14.14 US Against Illiteracy's IT Roadmap Execution ................................. 223

Appendix A: The 10 Questions an IT Leader Should Ask His or Her CEO or Board Members ................................................................. 225
Appendix B: The 10 Questions the CEO or Board Member Should Ask His or Her IT Leader ................................................................. 227
Appendix C: Leveraging Social Media for Business Strategy .................. 229
Appendix D: Leveraging Mobile Technology for Business Strategy .......... 233
Appendix E: Leveraging Cloud Computing for Business Strategy .......... 235
Appendix F: The Business Case for a New Business Technology Project ... 239
Appendix G: Buy or Build (Commercial Off-the-Shelf Package Implementation or In-House Software Development)? ................................. 241
Glossary ............................................................................................... 245
Index ................................................................................................. 253
