1 General Introduction

2 Quality Upgrading and Price Heterogeneity: Evidence from Brazilian Exporters
   2.1 Introduction ........................................... 5
   2.2 Product innovation and market segmentation ............... 10
      2.2.1 Demand ........................................ 10
      2.2.2 Production ..................................... 11
      2.2.3 Product quality and export destinations: effect on the profile of prices 13
   2.3 Data .................................................. 15
      2.3.1 The Brazilian economy in the 1990s ................ 15
      2.3.2 Data sources .................................. 17
   2.4 Empirical strategy .................................. 21
      2.4.1 Quality upgrading ................................ 22
      2.4.2 An integrated quality and skill upgrading mechanism ............ 24
   2.5 Results .............................................. 26
      2.5.1 Quality upgrading as an explanation for price differences across firms 27
      2.5.2 Market segmentation: innovative firms upgrade quality to Northern countries ............ 27
      2.5.3 Further evidence of market segmentation: higher prices in Northern countries can not be explained only by markups 28
      2.5.4 An integrated quality and skill upgrading mechanism: upgrading workers’ skills reinforces the effect of quality on prices .... 30
   2.6 Identification of the Price Variation .................... 31
2.6.1 Price variation across countries is not observable for other sources of firm heterogeneity unrelated to quality ........................................ 31
2.6.2 A placebo exercise using 1998 (year before treatment) as the treatment year: The effect of quality on prices is not driven by firms’ characteristics ................................................................. 32
2.6.3 Results using different set of countries: The quality effect is not driven by EU and Mercosur ................................................................. 32
2.6.4 Propensity score matching and self-selection into quality upgrading 33
2.6.5 Asymmetries across products, sectors and the importance of the core product for quality upgrading .................................................. 34

2.7 Conclusion ............................................................................. 36

3 Income Inequality and Export Prices across Countries .......... 55

3.1 Introduction ........................................................................ 55
3.2 Theory ............................................................................. 58
3.3 Data and descriptive statistics ............................................. 65
  3.3.1 Brazilian firm-level data .................................................. 65
  3.3.2 Country-level variables and world trade data .................. 67
3.4 Empirical Analysis ............................................................... 70
  3.4.1 Econometric specification for cross-section analysis .......... 70
  3.4.2 Price variation across destination countries: homogeneous versus differentiated goods ................................................................. 71
  3.4.3 Are the effects asymmetric across groups of countries? ..... 76
  3.4.4 Are the effects asymmetric across groups of products? .... 78
  3.4.5 Robustness checks: ....................................................... 79
3.5 Conclusion ........................................................................... 80
3.A Descriptive Statistics ............................................................ 82
3.B Data Appendix .................................................................. 82
  3.B.1 SECEX firm-level data for the year 2000: data construction 82
  3.B.2 Methodology for construction of the Gini coefficient: ...... 84
  3.B.3 Data on foreign ownership status .................................... 85
3.C Robustness checks ............................................................... 86
CONTENTS

4 The Effect of GATT/WTO on Export and Import Price Volatility 89
  4.1 Introduction ............................................... 89
  4.2 Data ...................................................... 93
  4.3 Empirical strategy ........................................ 95
  4.4 Results ................................................... 98
    4.4.1 Results for Price Volatility ......................... 98
    4.4.2 Results for Price Levels ............................ 105
    4.4.3 Robustness checks .................................. 106
  4.5 Conclusion ............................................... 108
  4.A Data Construction ........................................ 109
    4.A.1 Summary Statistics ................................ 109
    4.A.2 List of developed and developing countries ........ 111
    4.A.3 List of countries that are not in Sample 2 (sample with tariff data) 112
    4.A.4 Adjustment for United States import data ......... 113
  4.B Additional results and robustness checks ............... 115

5 Networks and Trade: Evidence from the Jewish Diaspora 121
  5.1 Introduction ............................................... 121
  5.2 Stylized facts and data .................................. 122
    5.2.1 Jewish Networks and Trade .......................... 122
    5.2.2 The creation of the State of Israel ............... 125
    5.2.3 The Jewish population data ........................ 125
    5.2.4 Gravity data and descriptive statistics .......... 126
  5.3 Model and Empirical Specification ....................... 128
    5.3.1 Trade flows and trade costs: gravity revisited .. 128
    5.3.2 Trade costs and the proximity channel .......... 129
    5.3.3 Pseudo-maximum likelihood estimation ............ 130
    5.3.4 Trade Creation ..................................... 131
  5.4 The effects of social networks on trade ............... 132
    5.4.1 Effects of $JSH_{ij}$ on total trade flows ....... 132
    5.4.2 Direct versus indirect networks and the creation of the State of Israel 134
    5.4.3 The Novy (2008) model and trade costs over time 136
