19. Validation in Computable General Equilibrium Modeling

Peter B. Dixon, Maureen T. Rimmer

19.1. Introduction
19.2. Checking the Code: Homogeneity Tests and Other Checking Simulations
19.3. Validation Through the GDP Identity
19.4. Validation Through Back-of-the-Envelope (BOTE) Analysis and Other Plausibility Checks
19.5. Consistency with History
19.6. Forecasting Performance
19.7. Conclusion
Appendix: Relationship Between the Percentage Changes in Output, Inputs and Technology Variables: Derivation of (19.12) and (19.15)

# Table of Contents

## Contributors
- xlv

## Preface
- xix

## 1. Introduction
**Peter B. Dixon, Dale W. Jorgenson**

- 1.1. Overview 1
- 1.2. Single-Country Models 2
- 1.3. Global Models 9
- 1.4. Technical Aspects of CGE Modeling: Data, Parameter Estimation, Computation and Validation 12
- 1.5. Current Cutting-Edge Methodological Areas 16
- References 21

## 2. The MONASH Style of Computable General Equilibrium Modeling: A Framework for Practical Policy Analysis
**Peter B. Dixon, Robert B. Koopman, Maureen T. Rimmer**

- 2.1. Introduction 24
- 2.2. Telling a CGE Story 28
- 2.3. From Johansen to ORANI 42
- 2.4. Extending Johansen's Computational Framework: The Mathematical Structure of a MONASH Model 52
- 2.5. Responding to the Needs of CGE Consumers: The Four Closure Approach 80
- 2.6. Concluding Remarks 94
- Appendix: Theoretical Justification for the Johansen/Euler Solution Method 96
- References 100

## 3. Computable General Equilibrium Assessments of Fiscal Sustainability in Norway
**Erling Holmøy, Birger Strøm**

- 3.1. Introduction 105
- 3.2. Model Structure 108
- 3.3. Evaluating Fiscal Sustainability 115
- 3.4. Sensitivity of the Fiscal Prospects to Variations in Economic Growth and Terms of Trade 121
