Adoption, Acceptance, and Use of Competitive Online Gaming
Outline

Abbreviations........................................................................................................vi
List of Figures and Tables .........................................................................................vii
   Figures..................................................................................................................vii
   Tables....................................................................................................................vii
1 Introduction ........................................................................................................1
   1.1 Industry Brief on Competitive Online Gaming .............................................1
   1.2 Research Background .................................................................................2
      1.2.1 Adoption, Acceptance, and Use .............................................................3
      1.2.2 Competitive Online Gaming .................................................................4
   1.3 Research Approach and Structure ...............................................................5
2 Opportunities for Research on Competitive Online Gaming: Hedonic Individual-
   Level Adoption, Acceptance, and Use in the IS Literature ..............................6
   2.1 Introduction ..................................................................................................6
   2.2 Research Approach and Data Collection .....................................................7
   2.3 Results .........................................................................................................8
   2.4 Discussion ....................................................................................................17
   2.5 Summary and Directions for Further Research ..........................................17
3 Online Gaming Adoption in Competitive Social Networks: Combining the Theory
   of Planned Behavior and Social Network Theory (reproduced from: Weiss, T.,
   Loebbecke, C. (2008) Online Gaming Adoption in Competitive Social Networks:
   Combining the Theory of Planned Behavior and Social Network Theory, Americas
   Conference on Information Systems (AMCIS), Toronto, Canada, August.) ........19
4 Cultural Influences on Hedonic Adoption Behavior: Propositions Regarding the
   Adoption of Competitive Video and Computer Online Gaming (reproduced from:
   Regarding the Adoption of Competitive Video and Computer Online Gaming
   (Round Table Paper), Pre-ICIS DIGIT Workshop, Paris, France, December.) ....30
5 Fulfilling the Needs of eSports Consumers: A Uses and Gratifications Perspective
   (reproduced from: Weiss, T. (2011) Fulfilling the Needs of eSports Consumers: A
   Uses and Gratifications Perspective, International Bled eConference, Bled, Slovenia,
   June) .....................................................................................................................49
6 On Inter-Reality Literacy: Emotions as Predictors of Performance in Virtual
   Worlds (reproduced from: Schiele, S., Weiss, T., Putzke, J. (2011) On Inter-Reality
   Literacy: Emotions as Predictors of Performance in Virtual Worlds, Research-in-
   Progress Paper, International Conference on Information Systems (ICIS),
   Shanghai, China, December.) .............................................................................58
7 Summary of Findings, Discussion, Contribution, Limitations, and Outlook to
   Further Research ...............................................................................................70
   7.1 Summary of Findings ....................................................................................70
   7.2 Discussion .....................................................................................................72
      7.2.1 Multi-Level Research Approach .............................................................72
      7.2.2 Systemic Research of End-Consumer Adoption, Acceptance, and Use ..................72
      7.2.3 Identified Drivers of Competitive Online Gaming Adoption, Acceptance, and Use ....73
   7.3 Contribution, Limitations, and Outlook to Further Research .......................73
