Menggang Li

Research on Industrial Security Theory

Springer
Contents

1 Introduction ................................................................. 1
  1.1 Significance of Studying Theories of Industrial Security .......... 1
     1.1.1 Theoretical Significance of Studying Industrial Security ... 1
     1.1.2 Practical Significance of Studying Industrial Security .... 2
     1.1.3 Practical Significance of Studying Industrial Security .... 2
  1.2 Background of the Study of Industrial Security Issue .......... 4
     1.2.1 Status Quo of Foreign Industrial Security Study .......... 4
     1.2.2 Status Quo of the Domestic Industrial Security Study .... 5
  1.3 Logical Framework of This Book .................................. 7
  1.4 Main Content of This Book ........................................ 8
  1.5 Main Innovations of This Book ................................... 10
  1.6 Study Methods of This Book ...................................... 11
     1.6.1 The Method Combining Empirical Analysis and Normative Analysis ................. 11
     1.6.2 The Method Combining Qualitative Analysis and Quantitative Analysis .......... 12
     1.6.3 The Method Combining Statistical Analysis and Comparative Analysis ............ 12
     1.6.4 The Method of Case Study ................................... 13
  1.7 Evolution of Security Outlook .................................... 13
     1.7.1 Security and Security Outlook ................................ 14
References ........................................................................ 14

2 Evolution of Security Outlook ........................................ 15
  2.1 National Security ..................................................... 16
  2.2 National Security Outlook .......................................... 18
     2.2.1 Realist Security Outlook ...................................... 19
     2.2.2 Liberalist Security Outlook .................................. 20
     2.2.3 Constructivist Security Outlook .............................. 21
2.3 Traditional National Security Outlook

2.3.1 The Theoretical System of Traditional National Security Outlook
2.3.2 Features of the Traditional National Security Outlook
2.3.3 External Factor and the Traditional National Security Outlook

2.4 Nontraditional National Security Outlook

2.4.1 Definition of Nontraditional National Security Outlook
2.4.2 Theory System of Nontraditional National Security Outlook
2.4.3 Characteristics of Nontraditional National Security Outlook
2.4.4 Internal Factors and Nontraditional National Security Outlook
2.4.5 Comparison of Traditional National Security Outlook and Nontraditional National Security Outlook

2.5 Theory of National Economic Security

2.5.1 Formation of National Economic Security Outlook
2.5.2 Meaning of National Economic Security Outlook
2.5.3 Position of National Economic Security
2.5.4 Overview of Foreign Theories of National Economic Security
2.5.5 Overview of Domestic Studies on National Economic Security
2.5.6 Main Contents of National Economic Security

2.6 National Industrial Security Outlook

2.6.1 Position of Industrial Security
2.6.2 Formation of National Economic Security Outlook
2.6.3 Basic Theories of Industrial Security
2.6.4 Definition of Industrial Security

References

3 Basic Theories of Industrial Security

3.1 Industrial Classification
3.1.1 Meaning of Industrial Security
3.1.2 Industrial Security and Its Correlativity

3.2 New Theories of Industrial Security
3.2.1 Industrial Security Is a New Market Failure
3.2.2 Industrial Security Is a Social Responsibility
3.2.3 Maintenance of Industrial Security Needs Judicial Guarantee

3.3 Basic Characteristics of Industrial Security
3.3.1 Strategic Characteristic of Industrial Security
3.3.2 Comprehensive Characteristic of Industrial Security
3.3.3 Urgent Characteristic of Industrial Security
4.1.3 Current Situation of China’s Industrial Organization Security ........................................... 181
4.1.4 Maintenance of China’s Industrial Organization Security .............................................. 183
4.2 Industrial Structure Theory and Industrial Structure Security ........................................... 188
4.2.1 Industrial Structure Theory .......................................................... 188
4.2.2 Industrial Structure Security ....................................................... 190
4.2.3 Current Situation of Industrial Structure Security of China ........................................... 198
4.2.4 Maintenance of Chinese Industrial Structure Security ................................................. 202
4.3 Industrial Layout Theory and Security ............................................................................... 205
4.3.1 Industrial Layout Theory .............................................................. 205
4.3.2 Industrial Layout Security ............................................................ 209
4.3.3 Current Situation of Industrial Layout Security of China ................................................. 212
4.3.4 Maintenance of Industrial Layout Security of China ....................................................... 214
4.4 Industrial Policy and Security of Industrial Policy ............................................................ 221
4.4.1 Industrial Policy ................................................................. 221
4.4.2 Industrial Policy Security ..................................................... 225
4.4.3 Actual Situation of Industrial Policy Security in China ................................................... 229
4.4.4 Maintenance of Industrial Policy Security in China ....................................................... 233
References .......................................................................................................................... 239

5 Construction of Theoretical System of Industrial Safety ......................................................... 241
5.1 Theory of Industry Protection ............................................................................................... 242
5.1.1 Industry Protection Theoretical Review .......................................................... 242
5.1.2 Definition of Industry Protection ............................................................................ 246
5.1.3 Classification of Industrial Protection .............................................................. 247
5.1.4 Effect of Industrial Protection .............................................................................. 248
5.1.5 Industry Protection Theory in the Opening Market ................................................... 250
5.1.6 The Main Features of Protectionist in New Situation .................................................. 254
5.1.7 Industrial Protective Influence of the Global Economy Under the New Situation .... 257
5.2 Theory of Industrial Damage ............................................................................................... 260
5.2.1 Definition of Industrial Damage ............................................................................ 260
5.2.2 The Causes for Industrial Injury ............................................................................ 261
5.2.3 Industry Injury Investigation ............................................................................... 262
5.2.4 The Predication of the Damage Magnitude of the Industry ........................................ 268
5.2.5 The Relief of Industry Damage ............................................................................. 270
5.2.6 The Connotation of Industry Injury Theory ............................................................ 272
5.2.7 The Practice of Our Country’s Anti-industry Injury .................................................... 273
5.3 Industry International Competition Theory ........................................................................ 277
5.3.1 Industry Competitiveness Is the Core of Industry Safety ........................................... 278
5.3.2 Theoretical Review of Industrial International Competitiveness .......................... 280
5.3.3 Industrial Competitiveness, National Competitiveness, and Enterprise’s Competitiveness .......................................................... 282
5.3.4 Basic Method of Analyzing Industry Competitiveness .......................... 285
5.3.5 The Development Stages of Industry’s International Competitiveness ..................... 286
5.3.6 The Analysis Framework of the Evaluation of Industrial International Competitiveness .......................................................... 291
5.3.7 Theoretical Connotation of Industrial International Competitiveness ..................... 291
5.4 Industrial Control Theory .......................................................... 292
5.4.1 Review of Industrial Control Theory .................................................. 292
5.4.2 The Definition of Industrial Control .................................................. 299
5.4.3 Content of Industrial Control .......................................................... 301
5.4.4 Credit Rating Criteria .......................................................... 303
5.5 The Evaluation and Early Warning of Industrial Safety ............................................ 308
5.5.1 Industrial Safety Evaluation .......................................................... 309
5.5.2 Early Warning System of Industry Safety ............................................. 309
5.6 The Index System of Industrial Safety Evaluation ................................................. 315
5.6.1 The Design Principles of the Index System ............................................ 315
References .......................................................... 316

6 Industrial Security Evaluation System and Early Warning .......................... 319
6.1 Introduction .......................................................... 319
6.1.1 Principles .......................................................... 319
6.1.2 Design Procedures of the Indicator System ............................................. 321
6.2 Industrial Security Evaluation Model .................................................. 321
6.2.1 Choosing Industrial Security Evaluation Model ........................................ 321
6.2.2 Output of Industrial Security Evaluation Result ....................................... 327
6.3 Construction of Typical Industrial Security Evaluation System ....................... 327
6.3.1 Design Procedures of Indicator System ................................................. 327
6.3.2 Main Content of the Indicator System .................................................. 329
6.3.3 Industrial Security Evaluation Model .................................................. 349
6.3.4 Industrial Security Evaluation System and Degree of Security Estimate Analysis Framework .................................................. 352
6.4 Industrial Security Early Warning .................................................. 352
6.4.1 Industrial Security Early Warning Method ............................................. 355
6.4.2 Industrial Security Early Warning Model on the Basis of Quantitative Model .................................................. 356
6.5 Industrial Security Early Warning System Execution ........................................ 367
References .................................................. 369
7 The Evaluation System and Pre-warning of Industry Security .... 371

7.1 An Empirical Analysis of Industrial Security .................. 371
  7.1.1 Manipulation of Different Statistical Criteria .............. 371
  7.1.2 The Evaluation of Industrial International Competitiveness .... 373
  7.1.3 The Evaluation of Industrial Foreign Dependency .......... 376
  7.1.4 Evaluation of Industrial Control .......................... 381
  7.1.5 The Preliminary Estimate of Chinese Industrial Safety .... 383

7.2 Chinese Industrial Foreign-Controlled Report in 2008/2009 .... 384
  7.2.1 Market Control of Foreign Direct Investment in Chinese Industry .... 384
  7.2.2 Foreign Direct Investment in Chinese Industrial Brand Control .... 390
  7.2.3 Foreign Direct Investment Stake in China's Industrial Control .... 392
  7.2.4 Technical Control of FDI Over Industries of China .......... 395
  7.2.5 FDI Controlling Over Major Enterprises of Our Industry: Taking the Equipment Manufacturing as the Research Subject .... 399
  7.2.6 Comprehensive Thinking Over the Control of FDI Over Our Industries .... 399

7.3 Real Evidence of the Insurance Industry Security Early Warnings .... 400
  7.3.1 Security Problems Caused by the Characteristics of Insurance Industry .... 400
  7.3.2 The Analysis and Method Selection of Insurance Industry Security Early Warning System .... 402
  7.3.3 The Analysis and Construction of the Insurance Industry Safety Warning Index System .... 410

7.4 China's Logistics Industry Safety Evaluation Report ........ 428
  7.4.1 The Basic Theoretical Explanation of the Logistics Industry Security .... 428
  7.4.2 The Safety Qualitative Analysis of China's Logistics Industry .... 431
  7.4.3 Quantitative Analysis on the Logistics Industry Safety .... 436

References .......... 442
