TABLE OF CONTENTS

INTRODUCTION	i
--------------------	---

PART I *Setting the stage*

CHAPTER 1	Sketching The Big Picture	
	The thesis	1
	What innovation is and what it is not	10
	The business of innovation	16
	To innovate or not to innovate	24
	Productivity, R&D and export sales	26
	Time scales of innovation	31
	The many kinds of innovation	33
	Innovation systems	36
	Last words	39
CHAPTER 2	The Case for More Innovation in Canada	
	Introduction	41
	Canada's place in the world; in a few numbers ...	45
	The prosperity-competence nexus	49
	Key cross-border flows in the knowledge-based economy	52
	The link between innovation and economic growth ..	56
	The deal maker	60
	Innovation and competition	62
	The recipe for growth by increased innovation ...	64
	Conclusions so far	65
CHAPTER 3	The Innovation System	
	Innovation as a change process	67
	The national innovation system	73
	The macro view	75
	The not-quite-national system of innovation	77
	Canada's regional systems of innovation	78
	Senior governments	81
	The supply and demand sides of programs	82
	National and provincial characteristics	83
	Culture	84
	The rest of the world	85
	The regional dimensions	86
	The challenge to government	90

CHAPTER 4	Wealth Creation, Value-added and The Language of Innovation	
	Value-added	94
	Wealth creation	96
	Marketing	97
	The language of innovation	97
	Definitions of innovation in the literature – a diversity . .	101
	Definition of innovation for economic impact	106
	Some system perspectives	108
	R&D and other “words that everybody knows”	111
	A very short historical perspective on R&D	121
	Intellectual property	122
CHAPTER 5	Innovation and Productivity	
	Productivity of labour	126
	Multi-factor productivity	127

PART II *Where we are now*

CHAPTER 6	From Gigaprojects to Small Potatoes: The Cost of Innovation	
	Introduction	133
	A framework for business innovation – the quad taxonomy	134
	Research-based innovation, new venture (R-N) . . .	135
	Design-based innovation, established firm (D-E) . .	139
	Research-based innovation, established firm (R-E) .	142
	Design-based innovation, new venture (D-N)	145
	Canada’s national spending on innovation	147
CHAPTER 7	Four Models of Industrial Innovation in Canada	
	Models of innovation	152
	The four quadrants of innovation space	153
	A new model for the D-N quadrant	161
	A new model for the R-N quadrant	163
	Griller’s four modes of innovation	164
	Standing back a bit	165
CHAPTER 8	The Role of Post-secondary Education	
	Introduction to the system	167
	Innovation and university research in Canada . . .	172
	Students and two other sources of innovation	177
	University-industry research partnerships	180
	Basic research	183
	What can be done in a system designed for something else	188

CHAPTER 9	Innovation in Services	
	Introduction	193
	The importance of services in the Canadian economy	195
	The definition of services	196
	Competition in services	199
	Services in the quad taxonomy of innovation . . .	200
	Innovation in public sector and government services.	205
CHAPTER 10	Interactions for Innovations	
	People working with people	211
	Clusters	215
	Six examples of clusters in Canada	218
	Innovation intermediaries	235
	Partnerships	245
	What this all adds up to.	247
CHAPTER 11	Innovations in Innovation	
	Open innovation	249
	Innovation in business models	253
	Open source	259
	User innovation	262
	Social innovation.	265
CHAPTER 12	What Corporate Data Show	
	Introduction	267
	The data	269
	The four faces of R&D intensity	272
	What the data show	275
	A model of industrial R&D in Canada	308
	Some loose ends.	311
PART III <i>What needs to be done</i>		
CHAPTER 13	An Innovation Policy for Canada	
	Innovation Action Plan	317
	Ten principles of an innovation policy	318
	Nine program principles	328
	Final words.	335
INDEX	337
