Werner Hennings

Development Research

Sāmoa and Other Pacific Island States between Modernity, Dependency, Subsistence, Sustainability and Fragmentation

The Centre for Sāmoan Studies
National University of Sāmoa

Apia 2011
Table of contents

Table of contents ........................................................................................................... 1
Figures ............................................................................................................................. 4
Tables ............................................................................................................................... 5

1 Introduction .................................................................................................................... 7

2 History and problems of the development concept ...................................................... 11
  2.1 On the "Failure" of the theories and the "En" of the concept of development .................. 11
  2.2 Really a failure? ........................................................................................................ 12
  2.3 What can, what should development theory accomplish? ........................................... 14
  2.4 Do we need new theories of development? ............................................................... 15
  2.5 Comparative development research? ....................................................................... 16
  2.6 Five decades of development research - five theories of development ....................... 17

3 Methodological premises ............................................................................................... 19
  3.1 The object of examination and the concept ............................................................. 19
  3.2 The function of concepts ......................................................................................... 21
  3.3 Definition of concepts ............................................................................................ 22
  3.4 Operationalising concepts ....................................................................................... 22
  3.5 Processing and analysis of the data ........................................................................ 23

4 Market economy perspectives and modernisation theories ......................................... 26
  4.1 Theoretical definition of terms ............................................................................... 26
  4.2 Operational definition and choice of indicators ...................................................... 28
  4.3 Structures in Sāmoa from a market-economy perspective .......................................... 29
  4.4 Developments in Samoa from a market economy perspective .................................... 32
  4.5 The market-economy structures of other Pacific states ............................................. 36
  4.6 Cluster analysis, correlation analysis and factor analysis ......................................... 41
  4.7 Market economy development of other Pacific states ............................................. 44
4.8 From empirical data to market economy theory: Modernisation theories

4.9 From theory to practice: Market-economy development policy in Sāmoa

5 The Marxist perspective and dependency theories

5.1 Theoretical definition of the concept

5.2 Operational definition and choice of indicators

5.3 Structures in Sāmoa from a dependency perspective

5.4 Development in Sāmoa from the perspective of dependency

5.5 Structures of other Pacific states from the perspective of dependency theory

5.6 Cluster analysis, correlation analysis and factor analysis

5.7 Development of other Pacific states from the dependency perspective

5.8 From empiricism to theory: Dependency approaches

5.9 From theory to its application: Development policy in the dependency perspective

6 From the macro- to the micro-perspective: The Bielefeld application approach

6.1 Conceptual-theoretical definition

6.2 Operational definition

6.3 Choice of indicators and sectoral categorisation

6.4 Sectoral structures and forms of production in Sāmoa

6.5 Development of sectoral activities

6.6 From empiricism to theory: The Bielefeld application approach

6.7 From theory to development policy: A plea for the subsistence perspective

7 The ecological perspective and the sustainability approach

7.1 Conceptual-theoretical definition

7.2 Operational definition and choice of indicators

7.3 Structures and developments in Sāmoa from the perspective of sustainability

7.4 Structures and developments in other Pacific states from the perspective of sustainability
