1. Prologue	1
1.1 Linking the legal regimes of trade and climate change	2
1.2 Comparing the trade and climate regimes	11
1.3 Multilayered governance in climate change and trade	15
1.3.1 Criteria for the distribution of powers	19
1.4 Structure of the book	21
1.5 What this book is not about	23
<b>PART 1 SETTING THE SCENE</b>	
2. The climate change challenge in the context of international trade	27
2.1 Introduction	27
2.2 What causes climate change?	30
2.3 The international community's acknowledgement	33
2.4 Effects of climate change	37
2.5 Climate migration	43
2.5.1 Introducing the issue	44
2.5.2 Where climate migrants will go	48
2.5.3 Linking the concepts: climate migration and international trade	54
3. Environmental protection and the international trade system	80
3.1 Introduction	80
3.2 Background to legal instruments	91
3.2.1 The Montreal Protocol	92
3.2.2 The Convention on International Trade in Endangered Species (CITES)	93
3.2.3 The Basel Convention	94
3.2.4 The Cartagena Protocol	96

3.3	The WTO and the environment	96
3.3.1	Principal legal aspects	96
3.3.2	Dispute resolution within the WTO	99
3.3.3	The proportionality principle in WTO law	101
3.3.4	Eco-labeling and the WTO	117
3.4	Unilateral trade-related climate change measures	132
3.4.1	An overview	133
3.4.2	The WTO and subsidies for renewable energy	136
3.4.3	EU Emissions Trading Scheme	150
3.4.4	Conclusion	176
<b>PART 2 THE CURRENT STATE OF PLAY</b>		
4.	Legal and policy responses to climate change	179
4.1	Introduction	179
4.2	Earth Summit: The UNFCCC (1992)	181
4.2.1	Objectives	181
4.2.2	Major guidelines	183
4.3	COP-1: The Berlin Mandate (1995)	187
4.4	COP-2: Geneva (1996)	187
4.5	COP-3: The Kyoto Protocol (1997)	187
4.5.1	Stronger GHG emissions commitments	187
4.5.2	Explaining the negotiations	189
4.6	COP-6: The Hague (2000)	190
4.7	COP-13: The Bali action plan (2007)	191
4.8	COP-15: The Copenhagen Accord (2009)	193
4.8.1	Political (rather than legal) commitments	193
4.8.2	Main features	195
4.9	COP-16: The Cancún Agreements (2010)	201
4.9.1	An overview	201
4.9.2	Climate finance	207
4.10	COP-17: Durban (2011)	213
4.10.1	Extension of the Kyoto Protocol to a second commitment period	214
4.10.2	The Durban Platform	215
4.10.3	Creation of the institutions outlined in the Cancún Agreements	216
4.10.4	Overall assessment	217
5.	Analyzing the Kyoto Protocol	219
5.1	Introduction	219
5.2	What is the Kyoto Protocol?	220

5.3	Main points of the Kyoto Protocol	223
5.4	Major mechanisms of the Kyoto Protocol	227
5.4.1	The CDM	228
5.4.2	Joint implementation	241
5.4.3	Emissions trading	243
5.5	Problems with the Kyoto Protocol	244
5.5.1	Implementation	245
5.5.2	Enforcement mechanism	247
5.6	Position of the main players	249
5.6.1	U.S. position	249
5.6.2	Chinese position	268
5.6.3	EU position	278
5.7	Options under the current situation	284

### PART 3 MOVING FORWARD

6.	Top-down and bottom-up approaches to climate change and trade	291
6.1	Introduction to collective irresponsibility	291
6.2	Paradigm shift: justifying a bottom-up approach	294
6.3	Current centralized legal framework: Waiting for Godot?	300
6.4	The incremental development of multilateral regimes	306
6.5	Explaining the bottom-up approach	311
6.5.1	Advocating greater flexibility	311
6.5.2	Why a bottom-up approach?	314
6.5.3	National and sub-national initiatives	316
6.5.4	Looking ahead: will new climate regimes be up to par?	319
6.5.5	An incremental bottom-up approach for climate change	321
6.6	Plausible avenues	325
6.6.1	Variable geometry	325
6.6.2	A sectoral regulatory approach	339
6.7	Incentives for cooperative compliance	342
6.7.1	Compliance	343
6.7.2	The Montreal Protocol as a success story of regulatory cooperation	345
6.7.3	Incentives to reduce GHG emissions	351
6.7.4	Enforcement	355
6.8	Conclusion	359

7.	Regional trade agreements and climate change	363
7.1	Introduction	363
7.2	Overview of RTAs	365
7.3	Motivations for RTA conclusion	369
7.4	The mandate of regional integration	373
7.4.1	GATT Article XXIV	373
7.4.2	The enabling clause	376
7.4.3	GATS Article V	378
7.5	Main trends in RTAs	380
7.5.1	From MFN liberalization to RTAs	381
7.5.2	Geographical shift	382
7.5.3	Cross-regional RTAs	385
7.5.4	Mega-bloc RTAs	386
7.6	Effects of regionalism on multilateralism	390
7.7	Advantages and disadvantages of RTAs	397
7.8	Using RTAs to promote climate change mitigation	405
7.8.1	Moving away from multilateralism	405
7.8.2	A greener type of trade	407
7.8.3	Climate-related provisions within RTAs	408
7.8.4	Proposed FTAs for climate purposes	412
7.8.5	Concluding remarks	416
7.9	Conclusion	416
8.	Geoengineering the climate and possible trade implications	419
8.1	Introduction	419
8.2	Limitations and controversies	422
8.3	Considerations around geoengineering	425
8.3.1	Moral and policy concerns	426
8.3.2	Technology	427
8.3.3	Governance	430
8.3.4	Legal considerations relating to international trade	434
8.4	Conclusion	454
9.	Recommendations	455
	<i>Bibliography</i>	472
	<i>Index</i>	503
