Introduction 1

01 The next merger boom is already here 7

1.1 Business-merger waves: patterns, theories on causes, issues 8
1.2 Four post-1980 business-merger waves, four phases 24
1.3 The fourth (and final?) post-1980 wave is already underway 28
1.4 Merger wave issue I: (T)APP-synergy divergence as the wave progresses 33
1.5 Merger wave issue II: whipsaw-merger market entry and exit missteps 35

02 Debunking the six merger fallacies that destroy value 42

2.1 Myth 1: Increased understanding of historical merger failure means that would-be acquiring firms are more inclined to avoid mergers 43
2.2 Myth 2: Significant increases to target company’s debt levels do not significantly reduce the probability of the related deal’s success 45
2.3 Myth 3: The heroic figure in the acquisition drama is the all-conquering acquirer, while shareholders of the acquired company are victims, with their firms accurately depicted as led by underperforming managers 50
2.4 Myth 4: There is no inherent conflict of interest between dealmakers and other parties compensated on the basis of fees earned upon deal closure, and the interests of acquiring firms’ shareholders 53
2.5 Myth 5: Price-to-earnings and similar multiples techniques are the leading merger valuation methodologies 56
2.6 Myth 6: Stories and process: PMI success is primarily a matter of sound process and responsive organization 60

03 Criteria: First, get the merger valuation methodology right 66

3.1 You can’t manage what you can’t measure especially when it comes to M&A 67
3.2 Criteria-setters: preeminence of continuing shareholders of the acquiring firm 70
3.3 Overview: four alternative merger valuation methods 74
3.4 Event studies (ES): exceeding the limits of rational market theory 78
3.5 Total shareholder return (TSR): most appropriate for round turn financial acquirers? 82
3.6 Value gap (VG): do synergies offset the price premium necessary to acquire the target? 91
3.7 Incremental value effect (IVE): two-scenario DCF analysis, adapted to mergers 107
3.8 Reconciling the tier I merger valuation methodologies 111
3.9 Multiples: critical confirmation role in merger valuation 117

04 Merger segmentation comes of age 134

4.1 The case for segmentation by merger type: precedent 135
4.2 Four categories, nine merger types: different deal types mean different M&A success 147
4.3 Applying the nine merger type framework 160
4.4 The path forward in merger segmentation: towards M-Score© 163

05 Mergers still fail, but does it matter? 169

5.1 More confirmation that historically, most mergers fail 170
5.2 No effective refutation of MMF 174
5.3 M&A’s core contradiction, segmentation and stakeholders’ different merger perspectives 180
5.4 Moving forward: expanding upon Hayward’s three causes of merger failure 185
06 The merger megaboom's signature IPO: Facebook  191
   6.1 The straw that stirs the drink  192
   6.2 Social networking and the 2011–19 merger megaboom  197
   6.3 Direct and indirect merger market effects of social networking sector acquisitions, 2011+  202
   6.4 Vapor numbers: when is the social networking valuation?  207

07 Towards systematic investigation and implementation of post-merger synergies  218
   7.1 Synergies: definitions, approaches, issues  219
   7.2 Net realizable synergies and merger success: value gap revisited  228
   7.3 A key category-based net realizable synergy investigatory framework  235
   7.4 Post-merger priorities explored  249
   7.5 Other PMI implementation issues: choosing the PMI implementation team  261

08 The seven keys to merger success  273
   8.1 Merger success: the seven keys  273
   8.2 Some implementation considerations  294

Epilogue  299
Appendix A: Acquisition purchase premium-related issues  300
Appendix B: Debunking the extreme acquisition leverage fallacy  305
Bibliography  314
Further Reading  319
Acronyms and glossary  322
Index  329
