Summary

1 Introduction 3

2 Definition and importance of results-based financing 5

2.1 Why do we talk about RBF in development cooperation? 5

2.2 Results-based financing versus results-based aid 7

2.2.1 Results-based financing in development cooperation 7

2.2.2 Results-based aid 9

2.2.3 Financing hybrids 9

2.3 Results-based financing in the health sector 10

3 Examples of PBF in developing countries 11

4 Evaluation criteria 17

4.1 Targeting 17

4.1.1 Definition and importance 17

4.1.2 Targeting mechanisms 18

4.2 Incentives 19

4.2.1 Definition and importance 19

4.2.2 Non-monetary incentives 19

4.2.3 Perverse incentives 19

4.3 Effectiveness of PBF 21

4.4 Efficiency of PBF 22

5 Experiences and empirical evidence from the health sector 22

5.1 Targeting and equity 22

5.1.1 Which groups does PBF target? 22

5.1.2 How do PBF schemes identify and reach their target groups? 23

5.1.3 Have programmes reached the poor? 23

5.2 The incentive structure of performance-based financing 25

5.2.1 Monetary incentives 25
5.2.2 Non-monetary incentives 30
5.2.3 Evidence for perverse incentives 31
5.3 Effectiveness and efficiency of PBF 34
5.3.1 Effectiveness of PBF 34
5.3.2 Quality improvements 40
5.3.3 Efficiency of PBF 40

6 Conclusion: main research gaps 41
