Foreword
Summary
List of tables and figures

1 Introduction
Philip Booth
The euro: the beginning, the middle and ... the end? 25
The beginning 26
The middle 31
... and the end? 33
References 38

2 Britain and the euro zone – a triumph of economics over politics
Patrick Minford
The euro project and the UK’s national interest 39
The case for the euro and the UK’s decision not to join 39
The euro zone in the light of events 44
The evolution of the EU during this crisis and its effect on the UK 47
Conclusions 50
References 50
3 The euro – the story of a suboptimal currency area
Jamie Dannhauser

Introduction 52
The theory of optimal currency areas 56
EMU as an optimal currency area in practice – fact or fiction? 61
Concluding remarks 78
References 80

4 Lessons from monetary history
John Chown

Introduction 83
Past monetary unions and how they ended 85
Precursors of EMU 89
Secondary and inflation-proof currencies 92
Other compromise solutions 94
General conclusion – and the future? 100
References 105

5 Better off in?
Andrew Lilico

Are balance of payments ‘imbalances’ an issue in themselves, or are they symptoms of other issues? 106
To what extent are competitiveness differentials sustainable within a currency union? 108
Internal versus external devaluations 112
What has been the past currency experience of euro members when addressing deficit and debt issues? 116
A fiscal transfer union, but not a debt union 118
Conclusion 121
6 Saving monetary union? A market solution for the orderly suspension of Greece
Pedro Schwartz with Francisco Cabrillo and Juan E. Castaneda

Why is the euro failing? 124
Two lessons from the past 128
The chaotic euro zone non-exit strategy 132
Parallel currencies and transition problems 133
The proposed monetary regime 139
Conclusion and wider implications for remaining members of the euro zone 143
References 145

7 Managing the transition - a practical exit strategy
Neil Record

Introduction 147
Summary of the exit route 147
The plan 148
Effect of euro abandonment on stateless 'euros' 155
Exit and transition timetable 157
A German-only back-up plan 162
After the exit 163
Conclusion 166

8 Where should the euro zone 'club' go from here?
How a return to credible and enforceable rules will sustain the monetary union
Bodo Herzog and Katja Hengstermann

Sustained economic governance: back to the roots! 169
EMU's performance and a theory of optimal rules 171
Creating sustainable rules for EMU 174
The lack of enforcement of rules 177
Enforcing enforceable rules 180
9 Back to the future: a free banking solution for the euro zone

Kevin Dowd

Historical record of free banking

Monetary standard

Abolition of central banking, financial regulation and state support

Sound accounting standards

Strong governance and extended liability

Fiscal reform

Unrealistic?
