Chapter 5
Innovation and design in services and products
Introduction 125
How does innovation impact on design? 127
Why is good design so important? 130
The stages of design - from concept to specification 131
What are the benefits of interactive design? 141
Summary answers to key questions 147
Case study: Chatsworth - the adventure playground decision 148
Problems and applications 150
Selected further reading 150
Useful websites 151

Chapter 6
Supply network design 152
Introduction 152
The supply network perspective 153
Configuring the supply network 155
Where should an operation be located? 160
Long-term capacity management 168
Break-even analysis of capacity expansion 174
Summary answers to key questions 175
Case study: Disneyland Resort Paris (abridged) 176
Problems and applications 180
Selected further reading 182
Useful websites 182

Supplement to Chapter 6
Forecasting 183
Introduction 183
Forecasting - knowing the options 183
In essence forecasting is simple 184
Approaches to forecasting 185
Selected further reading 190

Chapter 7
Layout and flow 191
Introduction 191
What is layout? 193
The basic layout types 193
What type of layout should an operation choose? 200
How should each basic layout type be designed in detail? 204
Summary answers to key questions 217
Case study: North West Constructive Bank (abridged) 218
Problems and applications 220
Selected further reading 222
Useful websites 222

Chapter 8
Process technology 223
Introduction 223
Operations management and process technology 225
What do operations managers need to know about process technology? 225
How are process technologies evaluated? 237
How are process technologies implemented? 242
Summary answers to key questions 246
Case study: Rochem Ltd 247
Problems and applications 249
Selected further reading 249
Useful websites 250

Chapter 9
People, jobs and organization 251
Introduction 251
People in operations 253
Human resource strategy 253
Organization design 256
Job design 259
Allocate work time 271
Summary answers to key questions 273
Case study: Service Adhesives try again 274
Problems and applications 276
Selected further reading 277
Useful websites 277

Supplement to Chapter 9
Work study 279
Introduction 279
Method study in job design 279
Work measurement in job design 282

Part Three
DELIVER - PLANNING AND CONTROLLING OPERATIONS 287

Chapter 10
The nature of planning and control 288
Introduction 288
What is planning and control? 290
The effect of supply and demand on planning and control 293
Planning and control activities 299
Controlling operations is not always routine 314
Summary answers to key questions 316
Case study: subText Studios, Singapore (abridged) 317
Problems and applications 320
Selected further reading 321
Useful websites 321

Chapter 11
Capacity management 322
Introduction 322
What is capacity management? 324
How is capacity measured? 326
Coping with demand fluctuation 334
How can operations plan their capacity level? 343
How is capacity planning a queuing problem? 348
Summary answers to key questions 353
Case study: Blackberry Hill Farm 354
Problems and applications 358
Selected further reading 360
Useful websites 360

Supplement to Chapter 11
Analytical Queuing Models 361
Introduction 361
Notation 361
Variability 361
Incorporating Little’s law 363
Types of queuing system 363

Chapter 12
Inventory management 368
Introduction 368
What is inventory? 370
Why should there be any inventory? 372
How much to order – the volume decision 376
When to place an order – the timing decision 388
How can inventory be controlled? 392
Summary answers to key questions 398
Case study: supplies4medics.com 400
Problems and applications 401
Selected further reading 402
Useful websites 402

Chapter 13
Supply chain management 404
Introduction 404
What is supply chain management? 406
The activities of supply chain management 409
Single- and multi-sourcing 413

Relationships between operations in a supply chain 419
How do supply chains behave in practice? 424
How can supply chains be improved? 426
Summary answers to key questions 433
Case study: Supplying fast fashion 434
Problems and applications 437
Selected further reading 438
Useful websites 438

Chapter 14
Enterprise resource planning (ERP) 439
Introduction 439
What is ERP? 440
How did ERP develop? 441
Implementation of ERP systems 449
Summary answers to key questions 451
Case study: Psycho Sports Ltd 452
Problems and applications 454
Selected further reading 455
Useful websites 455

Supplement to Chapter 14
Materials requirements planning (MRP) 456
Introduction 456
Master production schedule 456
The bill of materials (BOM) 458
Inventory records 459
The MRP netting process 459
MRP capacity checks 461
Summary 463

Chapter 15
Lean synchronization 464
Introduction 464
What is lean synchronization? 465
How does lean synchronization eliminate waste? 471
Lean synchronization applied throughout the supply network 474
Lean synchronization compared with other approaches 486
Summary answers to key questions 489
Case study: The National Tax Service (NTS) 490
Problems and applications 492
Selected further reading 493
Useful websites 494
Chapter 16
Project management

Introduction
What is project management?
How are projects planned and controlled?
What is network planning?
Summary answers to key questions
Case study: United Photonics Malaysia Sdn Bhd
Problems and applications
Selected further reading
Useful websites

Chapter 17
Quality management

Introduction
What is quality and why is it so important?
How can quality problems be diagnosed?
Conformance to specification
Achieving conformance to specification
Total quality management (TQM)
Summary answers to key questions
Case study: Turnround at the Preston plant
Problems and applications
Selected further reading
Useful websites

Supplement to Chapter 17
Statistical process control (SPC)

Introduction
Control charts
Variation in process quality
Control charts for attributes
Control chart for variables
Process control, learning and knowledge
Summary
Selected further reading
Useful websites

Chapter 18
Operations improvement

Introduction
Why is improvement so important in operations management?
The key elements of operations improvement
The broad approaches to managing improvement
What techniques can be used for improvement?
Summary answers to key questions
Case study: GCR Insurance
Problems and applications
Selected further reading
Useful websites

Chapter 19
Risk management

Introduction
What is risk management?
Assessing the potential causes of and risks from failure
Preventing failure
How can operations mitigate the effects of failure?
How can operations recover from the effects of failure?
Summary answers to key questions
Case study: Slagelse Industrial Services (SIS)
Problems and applications
Selected further reading
Useful websites

Chapter 20
Organizing for improvement

Introduction
Why the improvement effort needs organizing
Linking improvements to strategy
What information is needed for improvement?
What should be improvement priorities?
How can organizational culture affect improvement?
Key implementation issues
Summary answers to key questions
Case study: Re-inventing Singapore’s libraries
Problems and applications
Selected further reading
Useful websites
Chapter 21
Operations and corporate social responsibility (CSR) 672

Introduction 672
What is corporate social responsibility? 674
The wider view of corporate social responsibility 679

How can operations managers analyse CSR issues? 686
Summary answers to key questions 689
Case study: CSR as it is presented 690
Problems and applications 691
Selected further reading 691
Useful websites 691

Notes on chapters 693
Glossary 700
Index 713
