Handbook of Research Methods and Applications in Empirical Macroeconomics

Edited by

Nigar Hashimzade
*Durham University, UK*

Michael A. Thornton
*University of York, UK*

HANDBOOKS OF RESEARCH METHODS AND APPLICATIONS

Edward Elgar
Cheltenham, UK • Northampton, MA, USA
# Contents

**List of contributors** vii

1. Introduction  
   *Nigar Hashimzade and Michael A. Thornton*  
   1

2. A review of econometric concepts and methods for empirical macroeconomics  
   *Kerry Patterson and Michael A. Thornton*  
   4

## PART I PROPERTIES OF MACROECONOMIC DATA

3. Trends, cycles and structural breaks  
   *Terence C. Mills*  
   45

4. Unit roots, non-linearities and structural breaks  
   *Niels Haldrup, Robinson Kruse, Timo Teräsvirta and Rasmus T. Varneskov*  
   61

5. Filtering macroeconomic data  
   *D.S.G. Pollock*  
   95

## PART II MODELS FOR MACROECONOMIC DATA ANALYSIS

6. Vector autoregressive models  
   *Helmut Lütkepohl*  
   139

7. Cointegration and error correction  
   *James Davidson*  
   165

8. Estimation and inference in threshold type regime switching models  
   *Jesús Gonzalo and Jean-Yves Pitarakis*  
   189

9. Testing structural stability in macroeconometric models  
   *Otilia Boldea and Alastair R. Hall*  
   206

10. Dynamic panel data models  
    *Badi H. Baltagi*  
    229

11. Factor models  
    *Jörg Breitung and In Choi*  
    249

12. Conditional heteroskedasticity in macroeconomics data: UK inflation, output growth and their uncertainties  
    *Menelaos Karanasos and Ning Zeng*  
    266

13. Temporal aggregation in macroeconomics  
    *Michael A. Thornton and Marcus J. Chambers*  
    289
## Contents

### PART III  ESTIMATION AND EVALUATION FRAMEWORKS IN MACROECONOMICS

14 Generalized Method of Moments  
   *Alastair R. Hall*

15 Maximum likelihood estimation of time series models: the Kalman filter and beyond  
   *Tommaso Proietti and Alessandra Luati*

16 Bayesian methods  
   *Luc Bauwens and Dimitris Korobilis*

17 Forecasting in macroeconomics  
   *Raffaella Giacomini and Barbara Rossi*

### PART IV  APPLICATIONS I: DYNAMIC STOCHASTIC GENERAL EQUILIBRIUM MODELS

18 The science and art of DSGE modelling: I – construction and Bayesian estimation  
   *Cristiano Cantore, Vasco J. Gabriel, Paul Levine, Joseph Pearlman and Bo Yang*

19 The science and art of DSGE modelling: II – model comparisons, model validation, policy analysis and general discussion  
   *Cristiano Cantore, Vasco J. Gabriel, Paul Levine, Joseph Pearlman and Bo Yang*

20 Generalized Method of Moments estimation of DSGE models  
   *Francisco J. Ruge-Murcia*

21 Bayesian estimation of DSGE models  
   *Pablo A. Guerrón-Quintana and James M. Nason*

### PART V  APPLICATIONS II: VECTOR AUTOREGRESSIVE MODELS

22 Structural vector autoregressions  
   *Lutz Kilian*

23 Vector autoregressive models for macroeconomic policy analysis  
   *Soyoung Kim*

### PART VI  APPLICATIONS III: CALIBRATION AND SIMULATIONS

24 Calibration and simulation of DSGE models  
   *Paul Gomme and Damba Lkhagvasuren*

25 Simulation and estimation of macroeconomic models in Dynare  
   *João Madeira*
