Conceptual Change Research and the Role of Technology
Stella Vosniadou

Introduction ....................................................................................................................... xxiii
Chwee Beng Lee and David Jonassen

Contributors ...................................................................................................................... xxix

I. General Perspectives of the Current Research on Using Technology for
Conceptual Change in Asia-Pacific .................................................................................. 1

1. Conceptual Change Through Information and Communication Technologies
   in Australasia .................................................................................................................. 3
   Alister Jones and Cathy Buntting

2. Current Research on the Use of Technology for Conceptual Change in
   Asian Countries .......................................................................................................... 27
   Seng Chee Tan

II. Context of Learning, Learners' Characteristics and Epistemological Beliefs .......... 51

3. Conceptual Change, Epistemic Beliefs, and Technology-Enhanced Learning
   Environments ................................................................................................................ 53
   Tzung-Jin Lin, Ching Sing Chai, and Chin-Chung Tsai

4. The Influence of Students' Cognitive and Motivational Characteristics in
   Conceptual Change Using Discrepant Events ............................................................. 79
   Taehee Noh, Lawrence C. Scharmann, and Sukjin Kang
### Contents

#### III. Different Approaches to Using Technology for Conceptual Change: Issues and Implications

5. Learners’ Informal Ideas and Model Creation for Conceptual Change .......................... 119
   *Beaumie Kim, Hans G. Lossman, and Kenneth E. Hay*

6. Research of Online Learning for Conceptual Change and Scientific Reasoning .................. 141
   *Tzu-Chin Chen and Hsiao-Ching She*

   *Jan van Aalst*

8. Video Games for “Deep Learning”: Game-Based Learning as Performance in the Statecraft X Curriculum ............................................................... 199
   *Yam San Chee*

9. A Cultural Analysis of Game-Based Learning for Collective Conceptual Evolution .................. 225
   *Steven J. Zuiker and Mingfong Jan*

10. Roles of Computer-Based Simulations in Conceptual Change Learning of School Science .... 261
    *Yang Liu, Chi-Yan Tsui, and David F. Treagust*

#### IV. Future Direction for Research on Using Technology for Conceptual Change: Prospects and Challenges

11. Beyond the Process-Content and Mind-Environment Dualisms: Implications for Fostering Conceptual Change Through Emerging Technologies ......................... 289
    *Peter Reimann and Anindito Aditomo*

12. Conceptual Change and Mathematics: Challenges for Instruction in a Technological Culture ................................................................. 319
    *Judi Humberstone and Robert A. Reeve*

### Reflections

The Impact of Technology on Conceptual Change: Past and Future .......................... 345
*David Jonassen*
